GS21 General Specifications

Item	Specifications	
Operating Ambient Temperature	0 to 55°	
Storage Ambient Temperature	-20 to 60°	
Operating/Storage Ambient Humidity	10 to 90%RH, non-condensing (The wet bulb temperature is 39°) When the ambient temperature exceeds 40°, maintain the absolute humidity at 40° and 90%	
Vibration Resistance	Conforms to IEC 61131-2	
	Under intermittent vibration	Frequency: 5 to 8.4Hz Acceleration: 9.8m/s ² Half-Amplitude: 3.5mm Sweep Count: 10 times each in X, Y and Z directions
	Under continuous vibration	Frequency: 5 to 8.4Hz Acceleration: 4.9m/s ² Half-Amplitude: 1.75mm Sweep Count: -
Shock Resistance	Conforms to IEC 61131-2 (147m/s ² , 3 times each in the X, Y, and Z directions)	
Operating Atmosphere	Must be free of lamp black, corrosive gas, flammable gas, or excessive amount of electro conductive dust particles. Must be no direct sunlight. (Same as for saving)	
Operating Altitude (*1)	2000m or less	
Overvoltage Category (*2)	II or less	
Pollution Degree (*3)	2 or less	
Cooling Method	Self-cooling	
Grounding	Type D grounding (100Ω or less). Connect to panel if unable to ground.	

Notes:

- Do not use or store the GOT under pressures higher than the atmospheric pressure of altitude 0m (0ft). Failure to observe this instruction may cause a malfunction. When the air inside the control panel is purged by pressurization, the surface sheet may be lifted by high pressure. As a result, the touch panel may be difficult to press, and the sheet may be peeled off.
- This indicates the section of the power supply to which the equipment is assumed to be connected between the public electrical power distribution network and the machinery within the premises. Category II applies to equipment for which electrical power is supplied from fixed facilities. The surge voltage withstand level for up to the rated voltage of 300V is 2500V.
- This index indicates the degree to which conductive pollution is generated in the environment where the equipment is used. In pollution degree 2, only non-conductive pollution occurs but temporary conductivity may be produced due to condensation. Do not use or store the GOT under direct sun light or in an environment with excessively high temperature, dust, humidity or vibration. For inquiries relating to the status of conforming to UL, cUL, and CE directives and shipping directives, please contact your local sales office.
