MITSUBISHI ELECTRIC

Changes for the Better

for a greener tomorrow

Programmable Controllers
MELSEC-Q series [QnU]

Reaching higher, to the summit of the Q Series

MELSEC Q series

iQ Platform

GLOBAL IMPACT OF MITSUBISHI ELECTRIC

Through Mitsubishi Electric's vision, "Changes for the Better" are possible for a brighter future.

Changes for the Better

We bring together the best minds to create the best technologies. At Mitsubishi Electric, we understand that technology is the driving force of change in our lives. By bringing greater comfort to daily life, maximizing the efficiency of businesses and keeping things running across society, we integrate technology and innovation to bring changes for the better.

Mitsubishi Electric is involved in many areas including the following

Energy and Electric Systems
A wide range of power and electrical products from generators to large-scale displays.

Electronic Devices
A wide portfolio of cutting-edge semiconductor devices for systems and products.

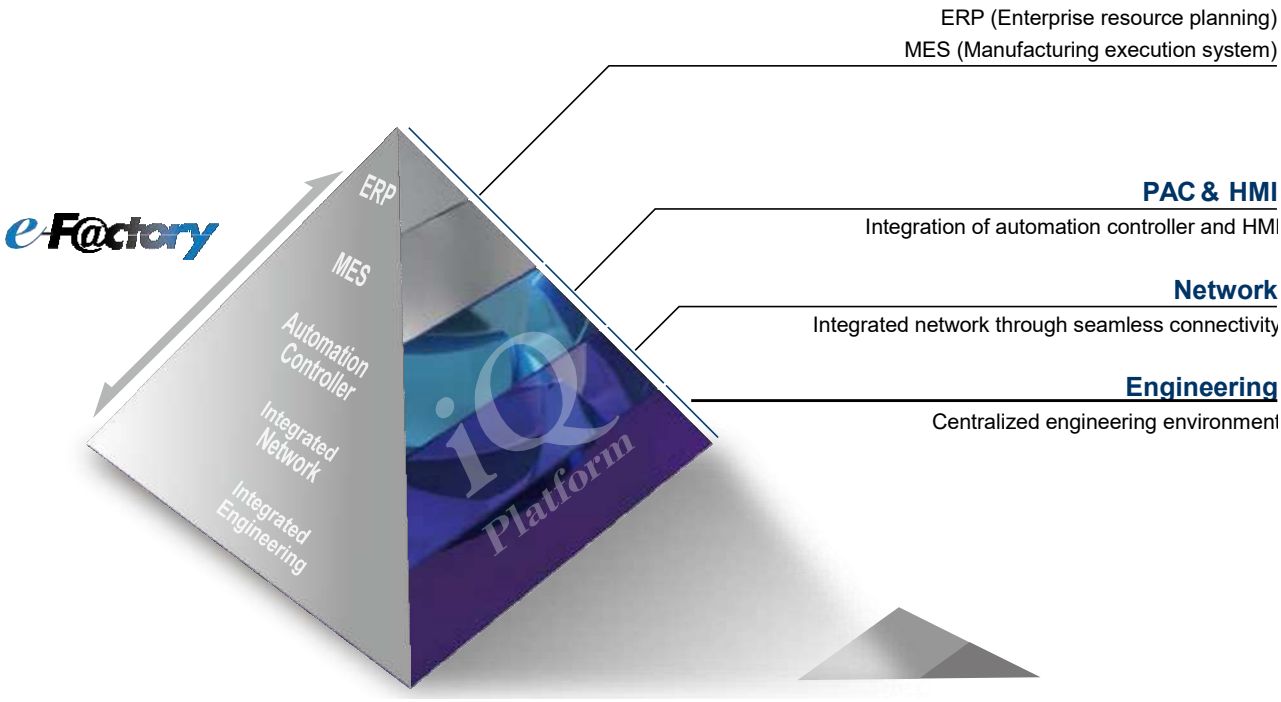
Home Appliance
Dependable consumer products like air conditioners and home entertainment systems.

Information and Communication Systems
Commercial and consumer-centric equipment, products and systems.

Industrial Automation Systems
Maximizing productivity and efficiency with cutting-edge automation technology.

iQ Platform for maximum return on investment

Minimize TCO, Seamless integration, Maximize productivity, Transparent communications: these are common items that highlight the benefits of the iQ Platform and e-F@ctory. The iQ Platform minimizes TCO at all phases of the automation life cycle by improving development times, enhancing productivity, reducing maintenance costs, and making information more easily accessible across the plant. Together with e-F@ctory, offering various best-in-class solutions through its e-F@ctory alliance program, the capabilities of the manufacturing enterprise is enhanced even further realizing the next level for future intelligent manufacturing plants.



Further reduce TCO while securing your manufacturing assets

Automation Controller

Improve productivity and product quality

1. High-speed system bus realizing improved system performance
2. On-screen multi-touch control enabling smooth GOT (HMI) operations

Integrated Network

Best-in-class integrated network optimizing production capabilities

1. CC-Link IE supporting 1 Gbps high-speed communication
2. Seamless connectivity within all levels of manufacturing with SLMP

Centralized Engineering

Integrated engineering environment with system level features

1. Automatic generation of system configuration
2. Share parameters across multiple engineering software via MELSOFT Navigator
3. Changes to system labels are reflected between PAC and HMI

Performance on a different level brought to you with the Programmable Controller

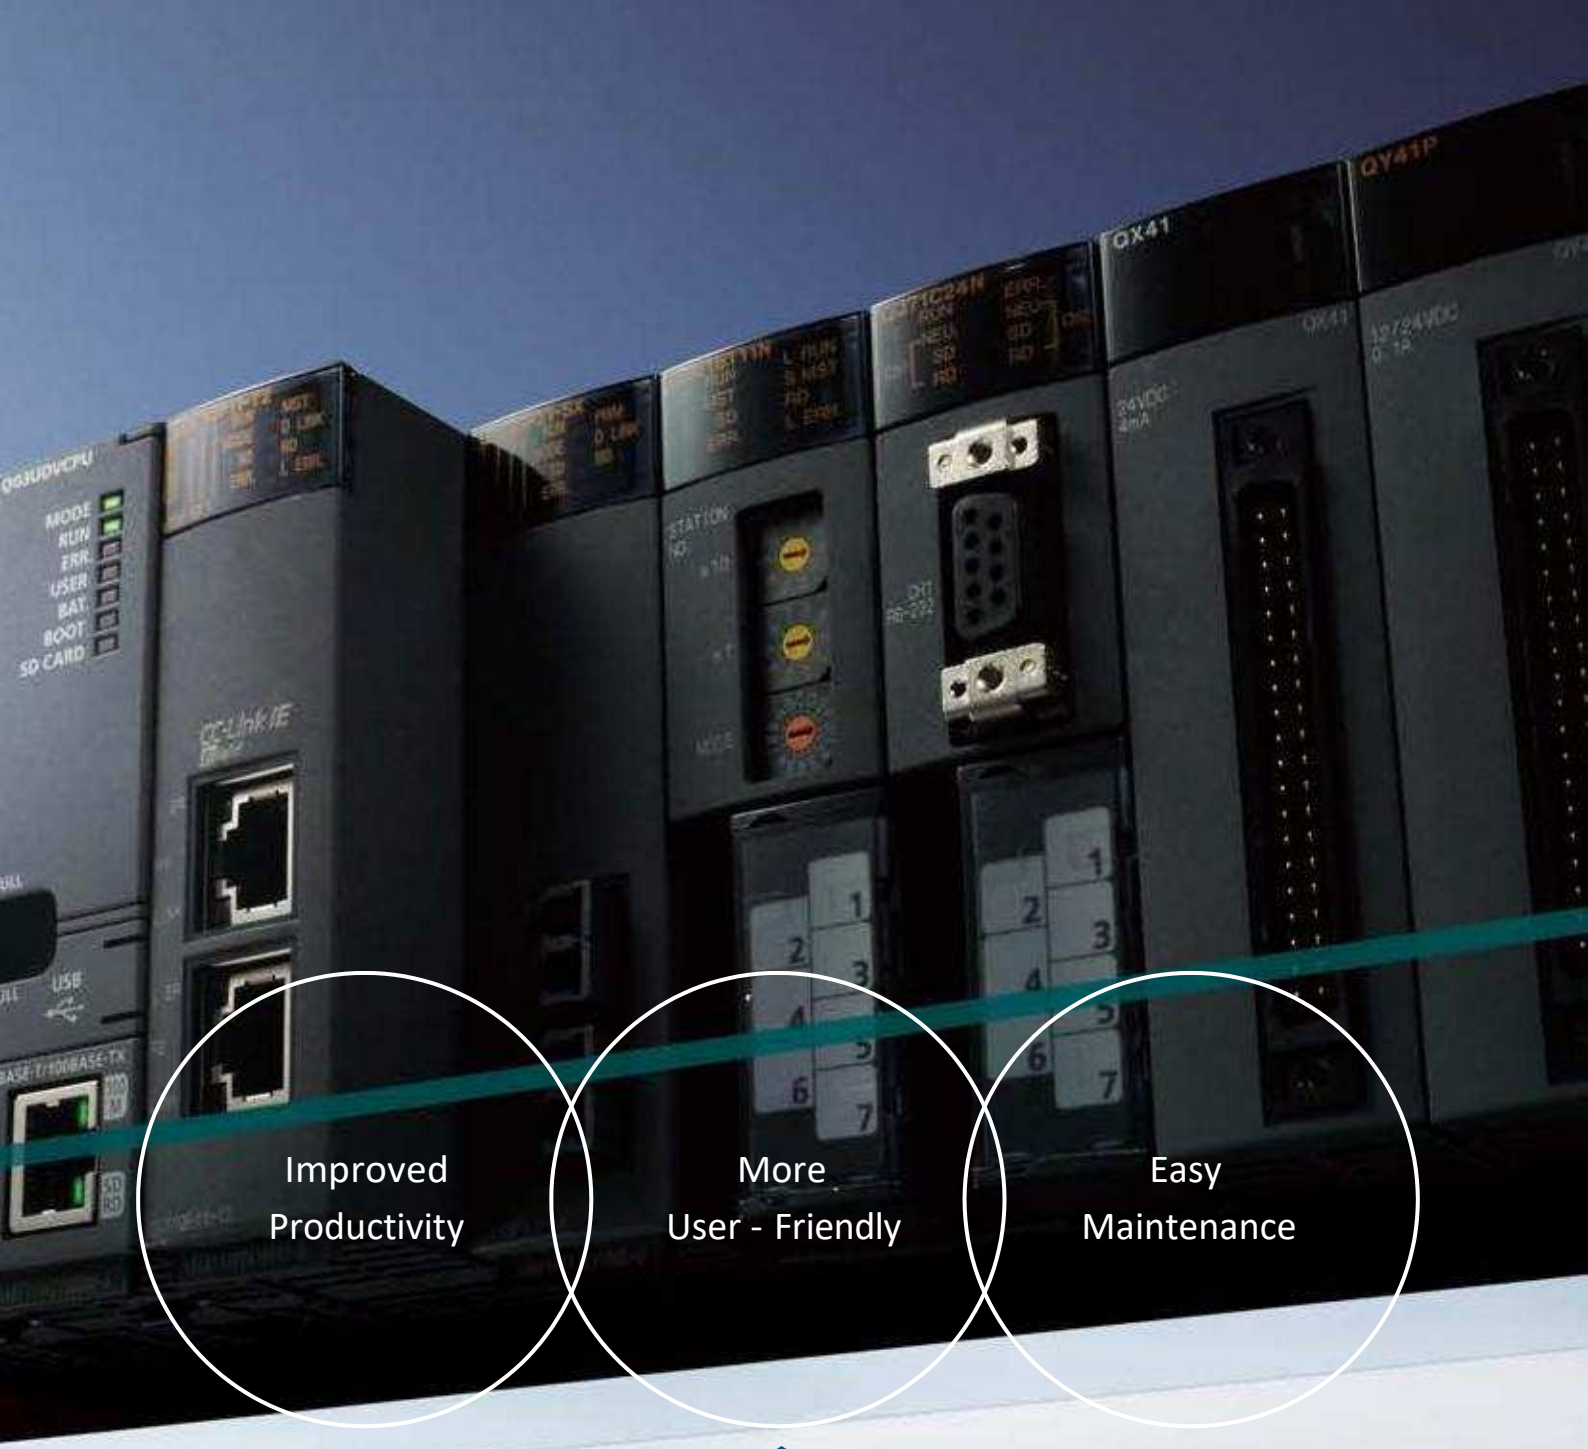
Continuously evolving Universal Model

Current production requirements are calling for an increase in productivity and carrying out production processes even faster due to an increase in production information such as production results and traceability.
The MELSEC-Q Series programmable controller “Universal model QnU” is a leader for these market needs. High-speed basic instruction processing on a micro scale dramatically increases your system and machine performance.
Inheriting the high robust and ease of use design of the Q Series, the MELSEC QnU programmable controller will open up new possibilities in automation solutions.

- High-speed 1.9 ns
- Large capacity 1000K steps
- Built-in Ethernet
- Built-in USB
- SD memory card slot
- Security
- Data logging function

MELSEC Q series

QnU



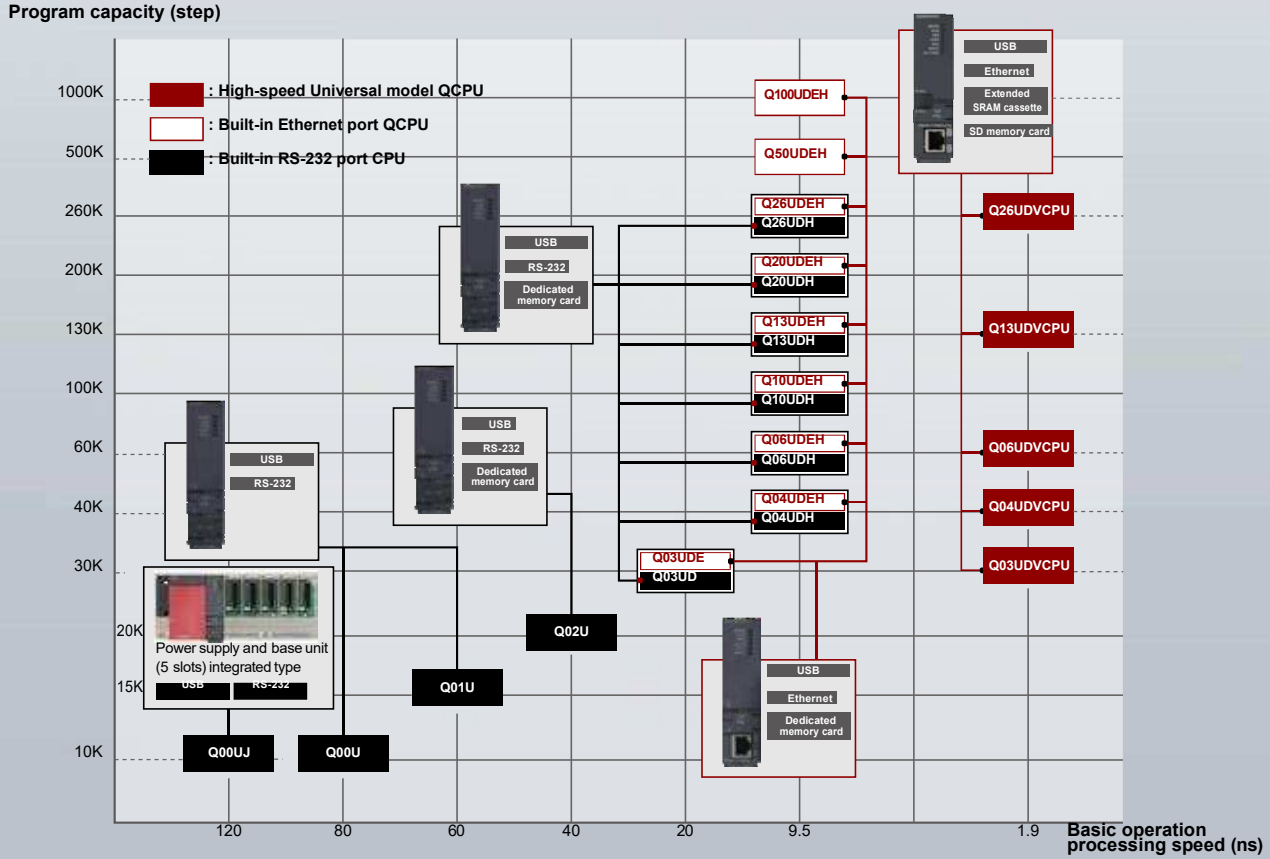
Customer experiences created this programmable controller

■ Support for shorter operation cycle times ■ Support for higher quality control requirements ■ Complex and large-scale equipment and systems
■ Expanding control and production control data ■ Shorter product cycles ■ Support for higher equipment operation rates

INDEX

Reaching higher,
to the summit of the Q Series

■ MELSEC-Q Series Universal model lineup



High-speed Universal model QCPU

Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV

Basic operation processing speed (LD instruction) 1.9 ns	Program capacity 260K steps		
Ethernet	USB	SD memory card slot	Extended SRAM cassette
Data logging function	Security		

*: This CPU type is only supported by GX Works2 (not supported by GX Developer).

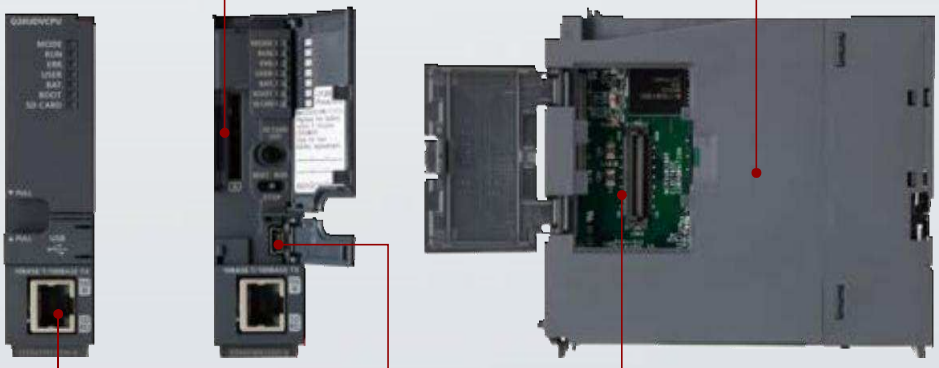
■ High-speed Universal model QCPU

SD memory card slot

€Data logging function
€Boot operation
€Backup/Restore

CPU

€Basic operation processing speed (LD instruction): 1.9 ns
€Program capacity: maximum 260K steps
€Fixed Scan interrupt program (minimum interval): 100 µs



Ethernet port

USB port

Cassette port

€Expand standard RAM (up to 8 MB)
€Use simultaneously with SD memory card
€Continuously access file registers

Enhanced security functions

Maximum of 32 character password is supported.
A mix of alphanumeric and special characters (*, @, and & etc.) can be used further strengthening the security of the password.
In addition, protection of intellectual property can be enhanced by blocking any unauthorized devices and only allowing registered devices to access the CPU.

Improved Productivity

Basic operation processing speed (LD instruction):

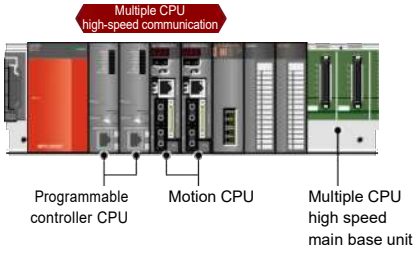
1.9 ns

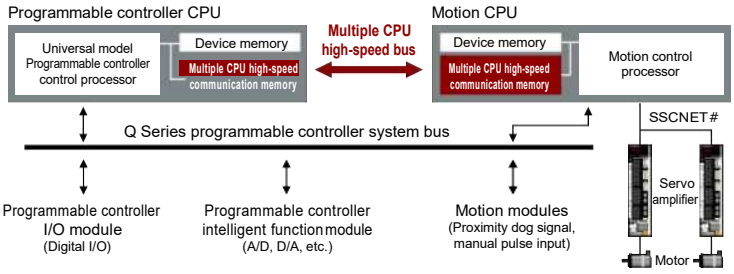
Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV

■ High-speed, high-accuracy machine control

To achieve high-speed synchronized control between multiple CPUs, a dedicated bus is used, independent of sequence program operation. (0.88 ms operation cycle)*1

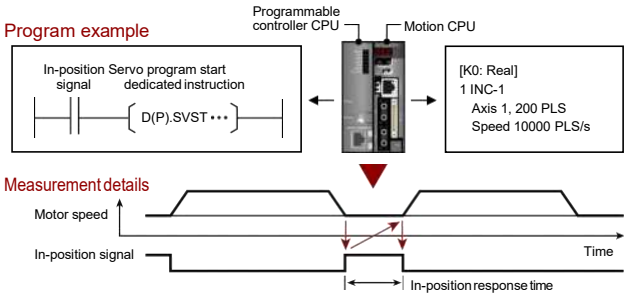
This multiple CPU high-speed communication is synchronized with motion control to maximize efficiency. Additionally, the performance of the motion control CPU is twice as fast as the previous model, ensuring high-speed, high-accuracy machine control.

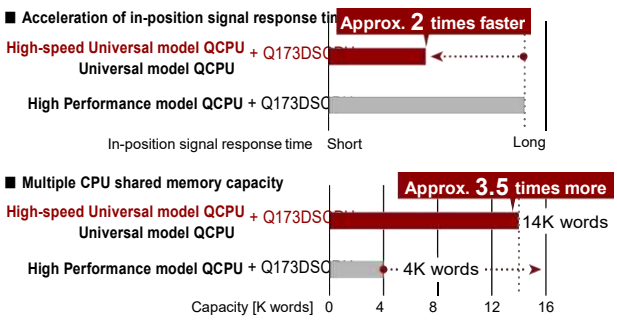




In-position response time

Fast in-position response time is realized between the motion CPU and programmable controller. The in-position signal is triggered by the servo amplifier of the first axis, with the time taken between the second axis at start-up and the speed command output of the programmable controller CPU.





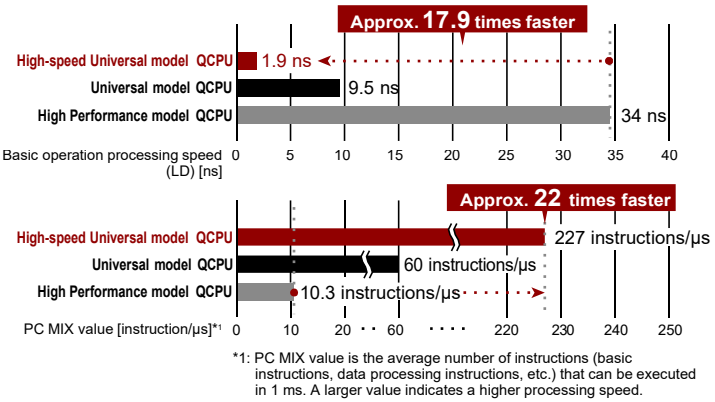
*1: Q00UJ, Q00U, Q01U and Q02U are not supported.

■ Improved production time with ultra-high-speed processing

Improved performance!

As applications are getting larger and more complex it is essential to shorten the system operation cycle time. To achieve this, the ultra high-speed of 1.9 ns (LD instruction) processing enables to realize shorter operating cycles.

System performance can be improved by reducing the overall scan time, preventing any variances in performance. In addition to realization of high-speed control which is normally associated with microcomputer control.

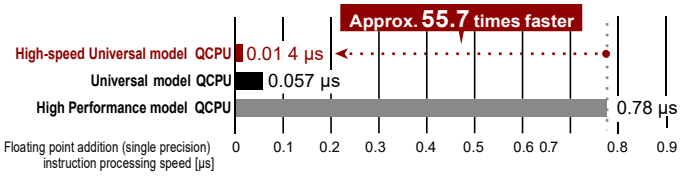


*1: PC MIX value is the average number of instructions (basic instructions, data processing instructions, etc.) that can be executed in 1 ms. A larger value indicates a higher processing speed.

■ High-speed, high-precision data processing

Improved performance!

The floating point addition processing speed has been increased to 0.014 µs to support high-speed, high-precision operation processing. Also, double-precision floating-point operation instruction is included to simplify programming and reduce calculation errors when implementing complex equations.



CPU	Addition (E+)	
	Single precision [µs]*2	Double precision [µs]*2
High-speed Universal model QCPU	0.014	1.8
Universal model QCPU	0.057	4.3
High Performance model QCPU	0.78	87*3

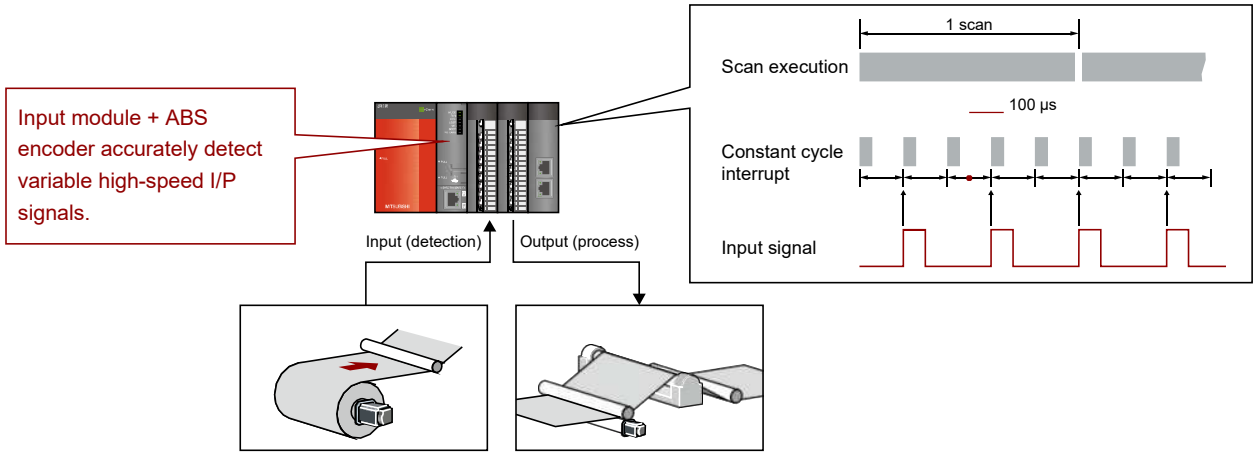
*2: Minimum value *3: Indicates internal double-precision operation processing speed.

■ Shorter fixed scan interrupt time realizing higher system accuracy

Improved performance!

Reduced minimal fixed scan interrupt program time to 100 µs*4.
High-speed I/O signals resulting in high-accuracy control system.

Example: High-speed position detection of film paper feed system



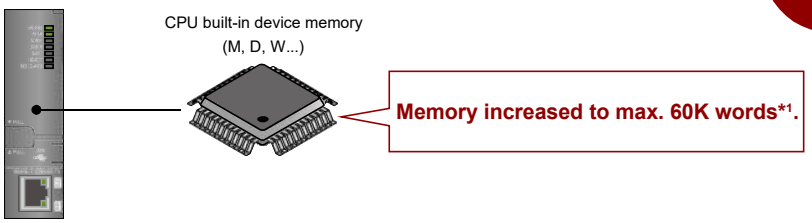
*4: Only supported by High-speed Universal model QCPU.

Improved Productivity

■ Improved basic functions Improved performance!

The CPU's built-in device memory capacity has been increased to a max. of 60K words*1.
Support increasing control and quality data with high-speed processing.

Increased capacity!



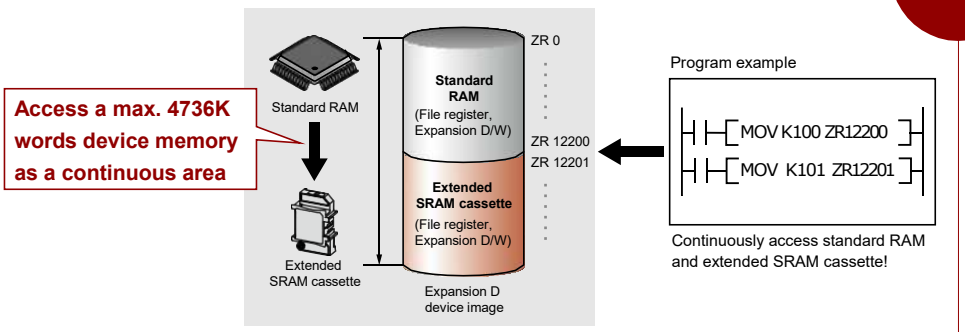
*1: Only for Q13UDVCPU and Q26UDVCPU.

■ Large data volume at high-speed Improved performance!

Conventionally, continuous access to the standard RAM and SRAM card's file register area could not be achieved which had to be reflected in the user program.
When an 8 MB extended SRAM cassette is installed in the High-speed Universal model QCPU, the standard RAM can be as one continuous file register with up to 4736K words capacity, simplifying the user program.
Even if the device memory is insufficient, the file register area can be expanded easily by installing the extended SRAM cassette.

High-speed Universal model QCPU

Continuous access!*2



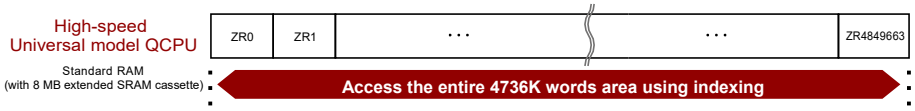
*2: Only supported by High-speed Universal model QCPU.

©File register capacity*3

Model	Q03UDV	Q04UDV	Q06UDV	Q13UDV	Q26UDV
Extended SRAM cassette not installed (Standard RAM capacity)	96K words (192 KB)	128K words (256 KB)	384K words (768 KB)	512K words (1024 KB)	640K words (1280 KB)
with Q4MCA-1MBS (1 MB)*4	608K words	640K words	896K words	1024K words	1152K words
with Q4MCA-2MBS (2 MB)*4	1120K words	1152K words	1408K words	1536K words	1664K words
with Q4MCA-4MBS (4 MB)*4	2144K words	2176K words	2432K words	2560K words	2688K words
with Q4MCA-8MBS (8 MB)*4	4192K words	4224K words	4480K words	4608K words	4736K words

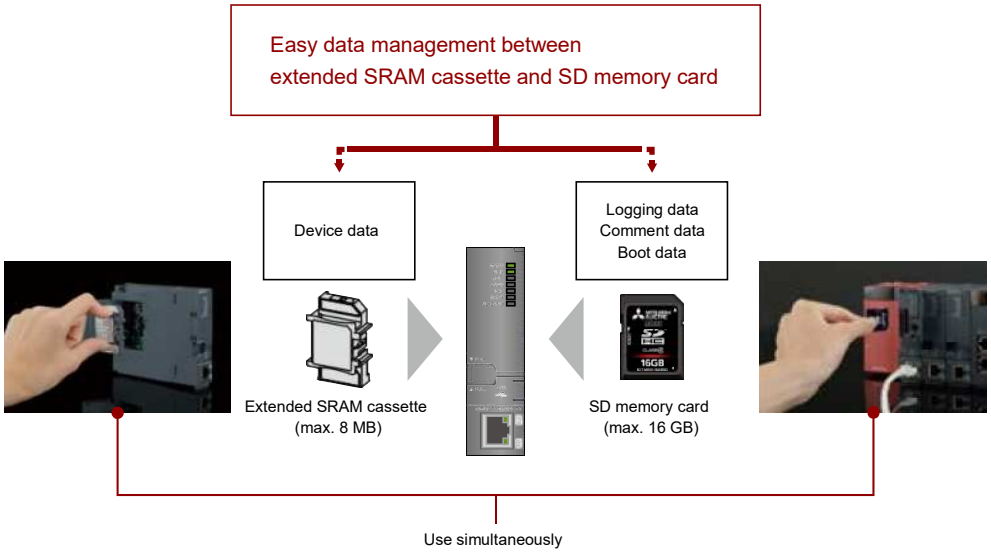
*3: Maximum capacity when using extended SRAM cassette file as a file register. Total when CPU's standard RAM and extended SRAM cassette are installed.
*4: Only High-speed Universal model QCPU.

The index register has been extended to 32 bits to allow programming beyond the conventional 32K words and to enable use of the entire file register area.
The processing speed for indexing, which is essential for efficient operation of structured (array) data, has been increased. The scan time can be shortened when indexing is used in repetitive programs, such as FOR to NEXT instructions.



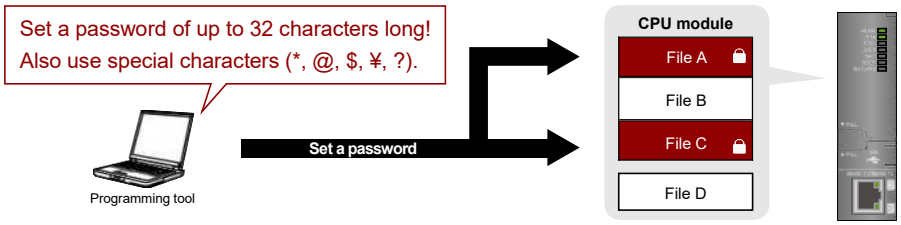
SD memory card Improved functionality!

SD memory card is supported by High-speed Universal model QCPU allowing easy data exchange with a personal computer. The SD memory card and extended SRAM cassette can be used at the same time allowing extension of file registers (with extended SRAM cassette), data file logging, boot data, and storing of large comment data (SD memory card).

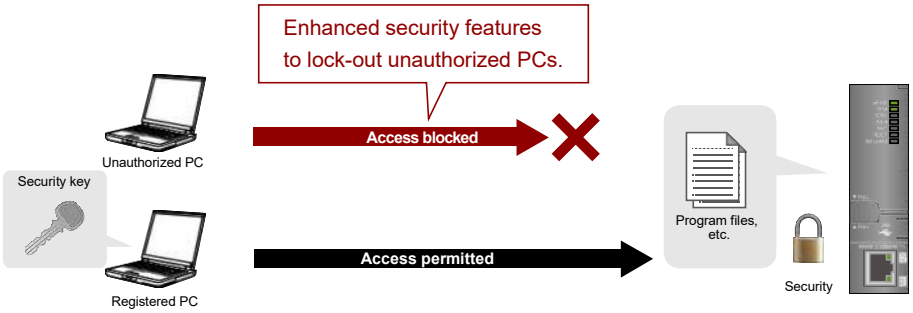


Protect important data with enhanced security Improved functionality!

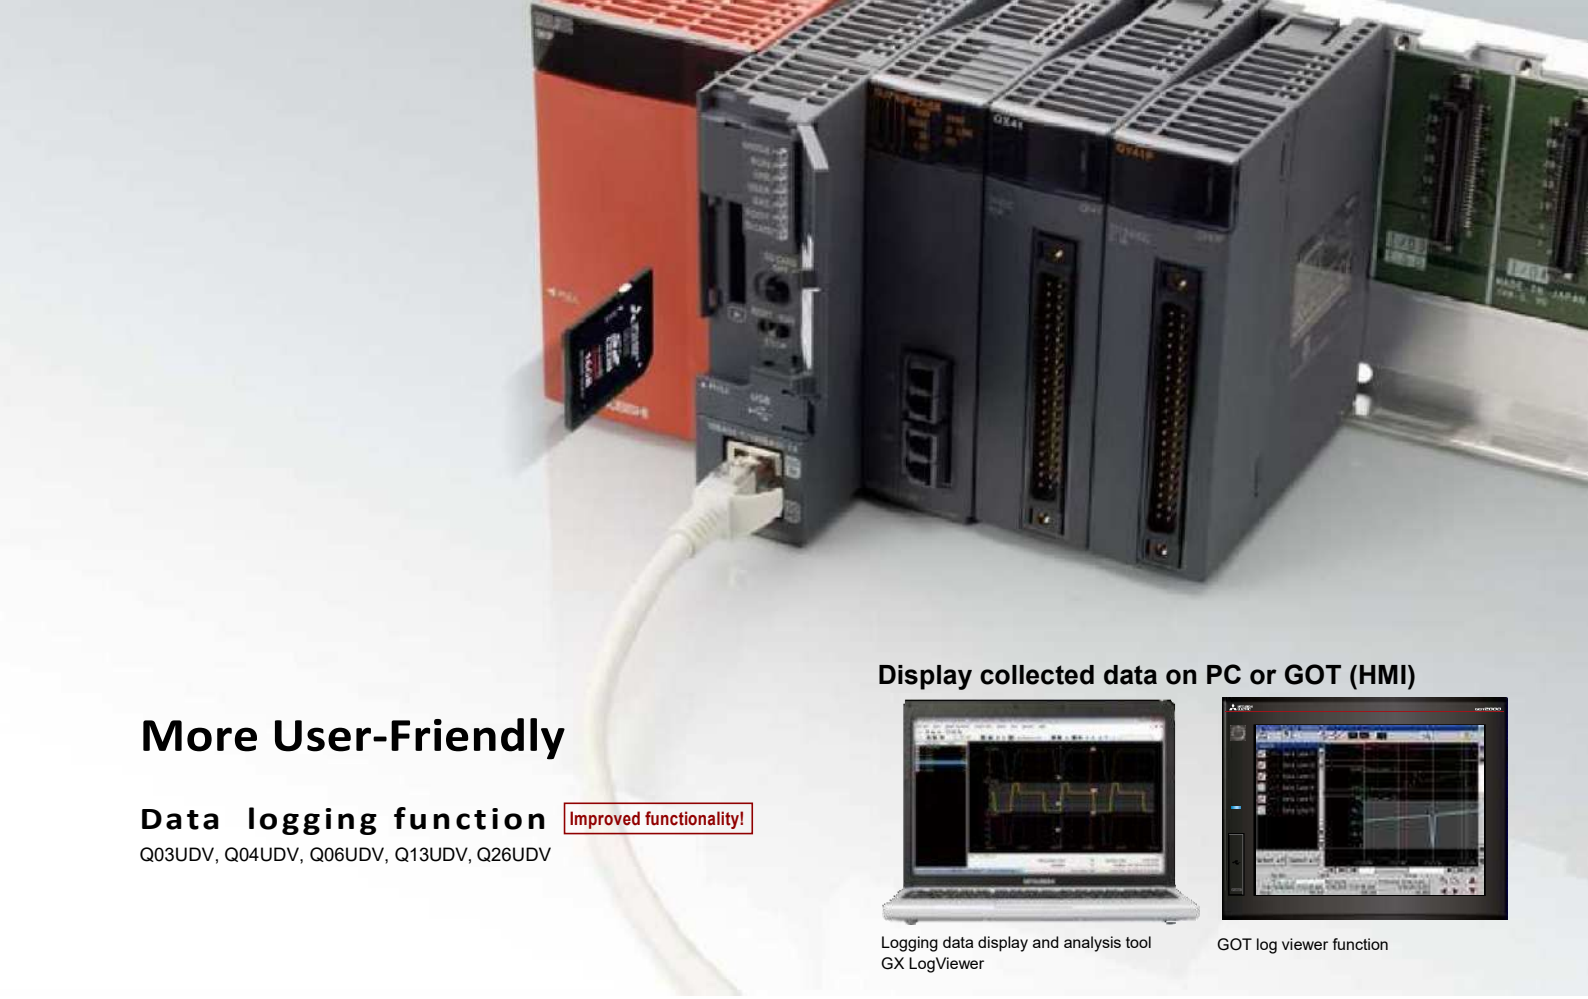
A max. 32-character file password can be set*1.
Special characters (*, @, &, etc.) can be used in addition to alphanumeric characters making it harder to compromise the password.



Also protection of valuable intellectual property can be enhanced by only allowing preregistered devices to access the CPU, blocking out unauthorized users*2.



*1: Only supported by High-speed Universal model QCPU. Other models use 4 character password system.
*2: Only supported by High-speed Universal model QCPU.



More User-Friendly

Data logging function

Improved functionality!

Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV

Display collected data on PC or GOT (HMI)

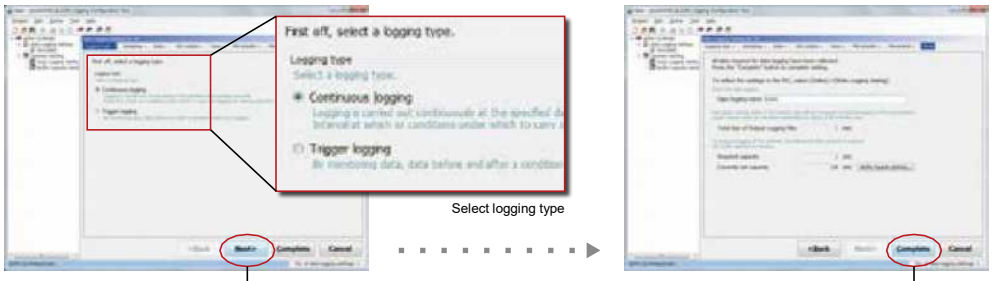
Logging data display and analysis tool
GX LogViewer

GOT log viewer function

Easy logging without a program

Save collected data in CSV format on a SD memory card just by completing easy settings with the dedicated setting tool wizard. Various reference materials including daily reports, form creation and general reports can be created easily within the saved CSV file. This data can be used for a wide variety of applications requiring traceability, production data, etc.

■ Setting with Wizard screen



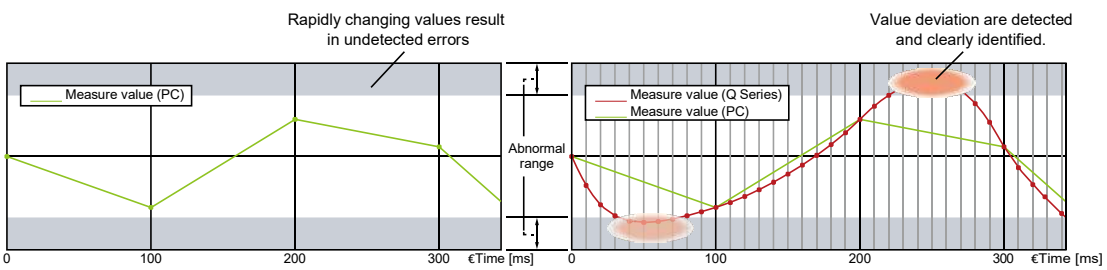
Easy configuration using Wizard

Logging of control data variances

Data is collected during each scan or within millisecond intervals allowing detection of control deviation even at very high speeds. Therefore, identification of errors can be conducted faster and in more detail.

■ **Generic sample data from a PC or external device at 100 ms intervals**

■ **Q Series CPU data logging function is capable of sampling data at much higher intervals as to detect fast changing values.**

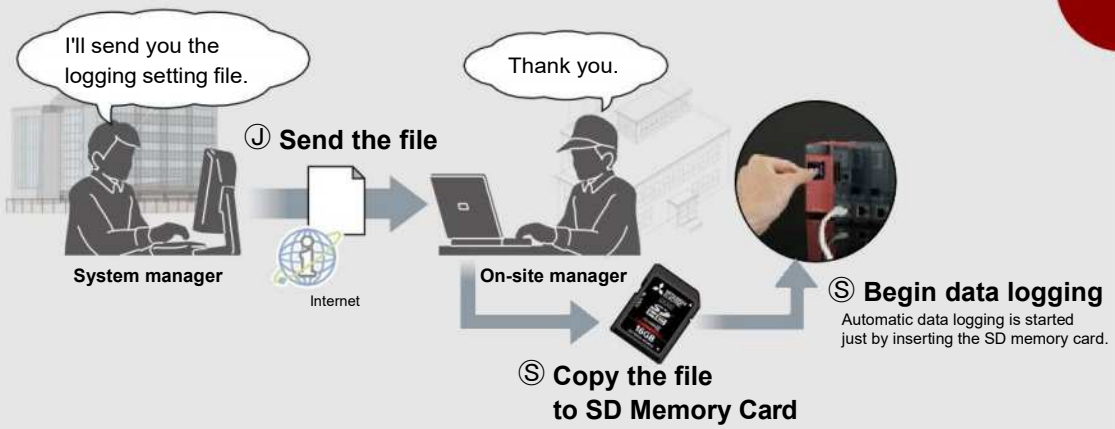


Automatic logging just by using a SD memory card

Automatic data logging realized just by inserting the SD memory card into the CPU, which is achieved as the memory card includes the logging configuration file. Instructing data logging remotely is also realized just by sending the configuration file by e-mail and copying onto the SD memory card.

Easy logging

Example: Quickly setup for automatic data logging on-site

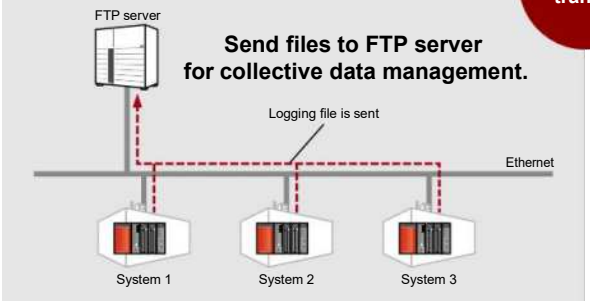


Automatically send logging files to FTP server

Automatically transfer

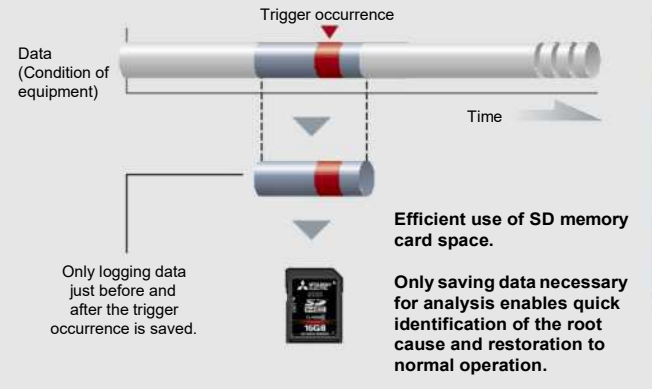
Data logging files stored on the SD memory card can be sent to FTP server just by making a simple setting with the Logging configuration tool.
As the logging server can handle multiple files, management and maintenance tasks can be reduced.

■ File transfer feature



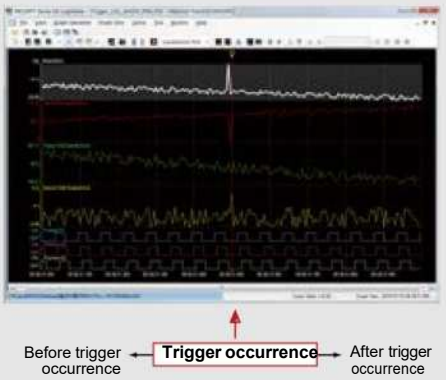
Quick troubleshooting response

Error causes and solutions can be quickly done as only the required data related to the problem is extracted, without having to spend time on filtering large volumes of diagnostic data.



Efficient use of SD memory card space.

Only saving data necessary for analysis enables quick identification of the root cause and restoration to normal operation.



"GX LogViewer*1" and "Logging configuration tool*2" available for free

To obtain a copy of GX LogViewer and Logging configuration tool, please contact your local Mitsubishi Electric representative.

*1: Refer to page 57 for details on GX LogViewer.
*2: The logging configuration tool is enclosed with GX Works2.

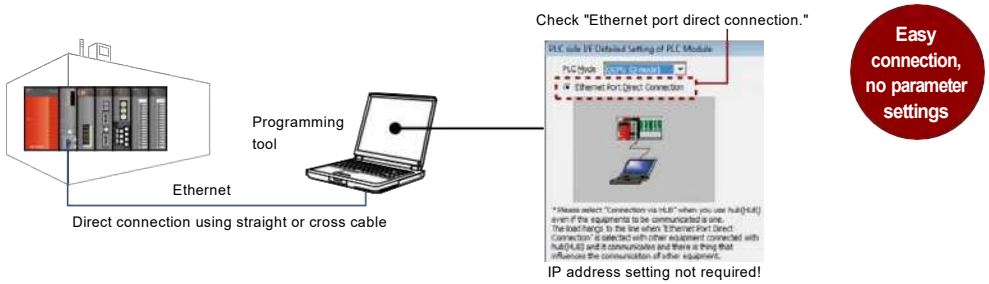
More User-Friendly

CPU modules with Built-in Ethernet Por t

Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV
Q03UDE, Q04UDEH, Q06UDEH, Q10UDEH, Q13UDEH, Q20UDEH, Q26UDEH, Q50UDEH, Q100UDEH

Easily connect to CPUs via Ethernet

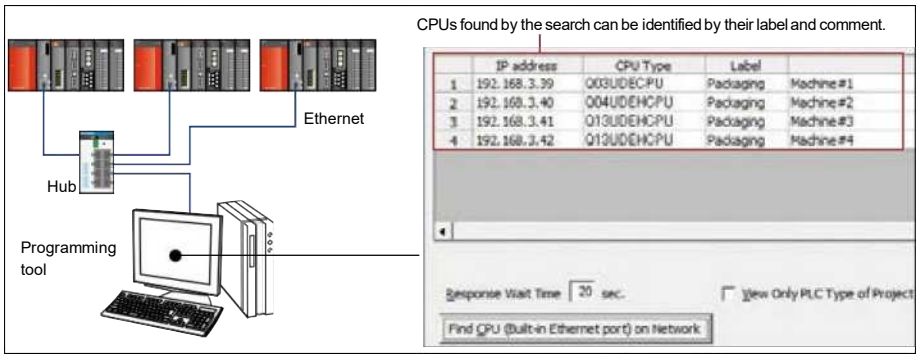
IP address settings are not required to connect to CPU modules directly (one-to-one connection) using GX Works2 or GX Developer. Both straight and cross cables can be used, and are automatically identified by the CPU module. Therefore this connection method is as easy as using USB. Even operators who are not familiar with network settings can easily establish a connection.



Easy connection, no parameter settings

Search and display a list of connected CPUs

When multiple CPUs are connected via an Ethernet hub, GX Developer or GX Works2 can search for and display a list of all connected CPUs. This allows the user to quickly and easily find the correct station even if the IP address is unknown. Then programming and maintenance functions can be performed without wasting any time.

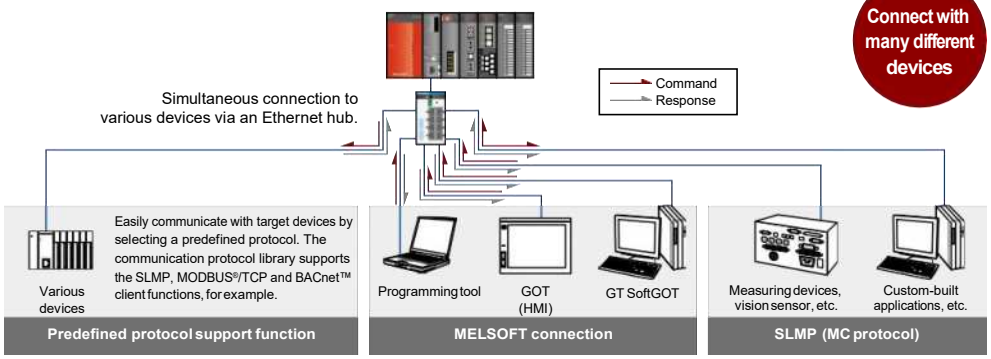


Easily connect to BACnet™ and MODBUS®/TCP

Improved function

Ethernet realizes a high-speed connection, such as communication with external devices. By using predefined protocol support function*1, various devices that require open network protocol support, such as BACnet™ and MODBUS®/TCP are supported.

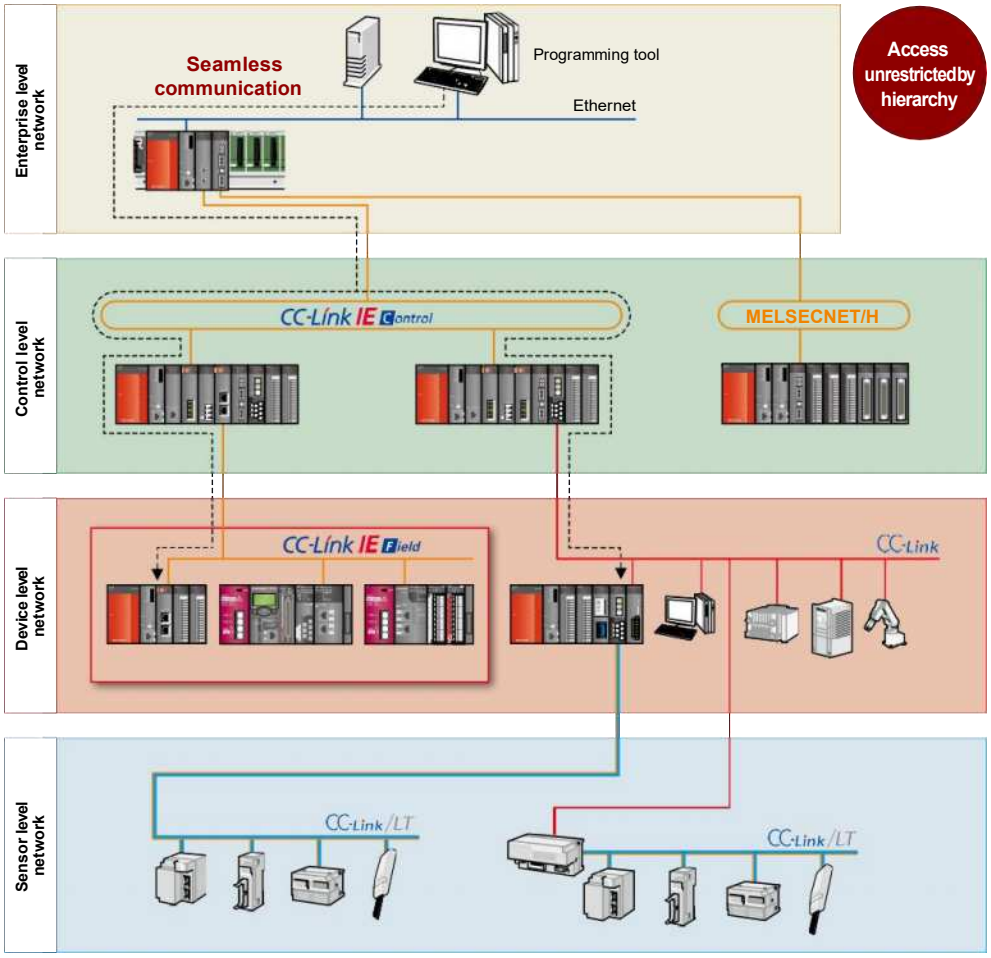
Connect with many different devices



*1: Only supported by High-speed Universal model QCPU.

Seamless communication across all layers

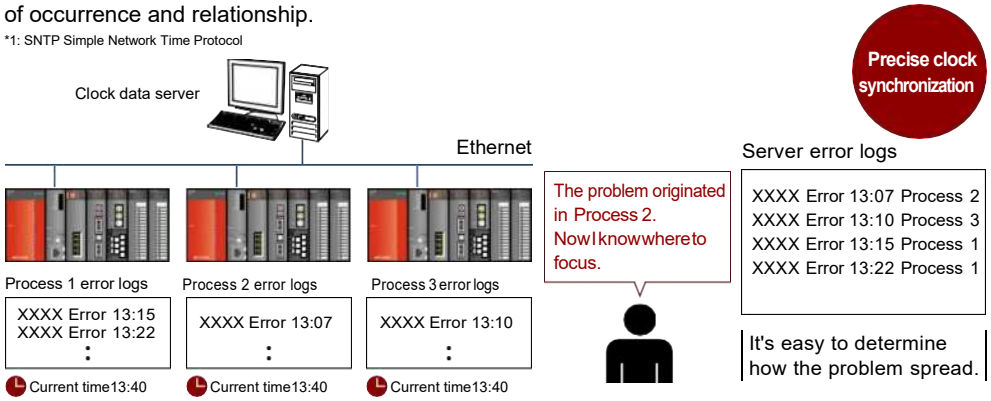
The Universal model QCPUs support a multitude of networking technologies including the high-speed, high-capacity CC-Link IE Control Network and CC-Link IE Field Network. Along with MELSECNET/H, Ethernet, and CC-Link, these networks may be accessed seamlessly beyond network type or hierarchy. Each programmable controller on the network can be accessed for programming and maintenance duties by using a personal computer with the appropriate engineering tools connected via Ethernet.



Accurate clock data

The CPU module's clock is automatically corrected with the SNTP*1 clock synchronization function. When CPU clock data is reliably synchronized between systems, any time-stamped events or errors that involve more than one CPU can be easily understood in terms of their order of occurrence and relationship.

*1: SNTP Simple Network Time Protocol



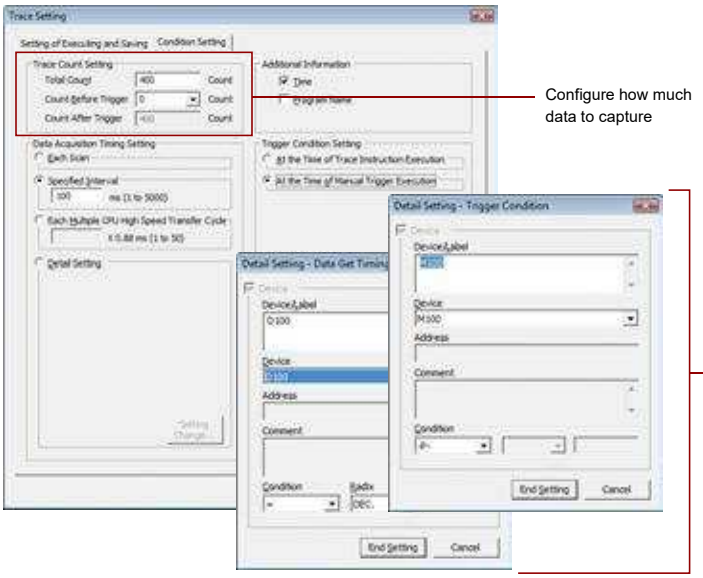
More User-Friendly

Save valuable time using the sampling trace function*1

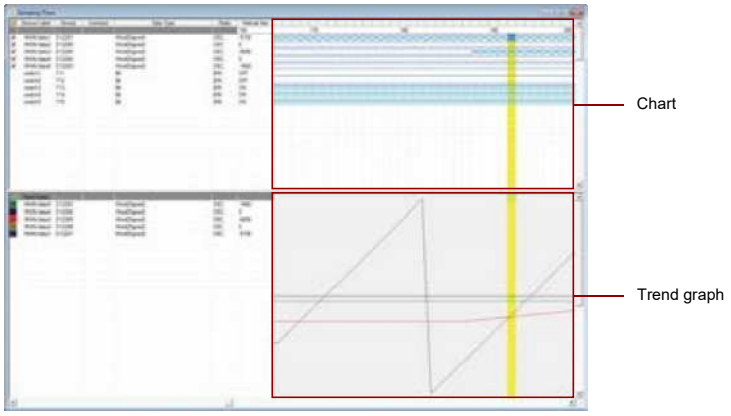
The sampling trace function is a useful diagnostic tool for analyzing error data, and sequence of events for program debug, etc. It can help reduce the overall time required for startup and commissioning of equipment.
In the multiple CPU configuration it can help to determine the timing and transfer of data between CPU modules. Collected data can be easily analyzed within the programming software tool with differences in word device and bit device values conveniently shown in chart and graph form.
In addition, the results from sampling trace can be exported to GX LogViewer CSV file format for analysis within the software.

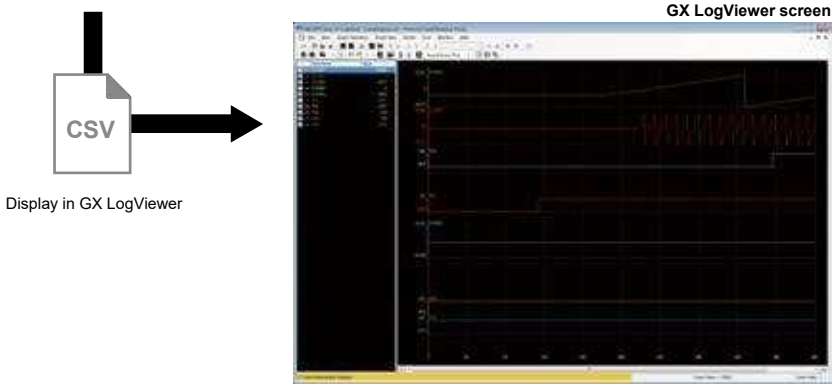
Sampling trace execution condition settings

Configuring data collection is simple



Sampling Trace window: example results

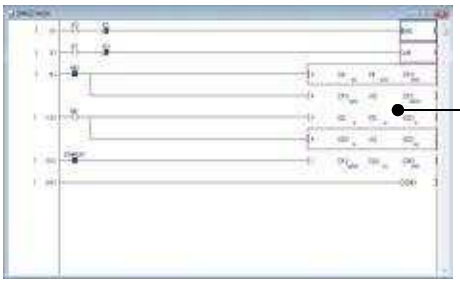




*1: Not supported by Q00UJ.

Simplify the debugging process

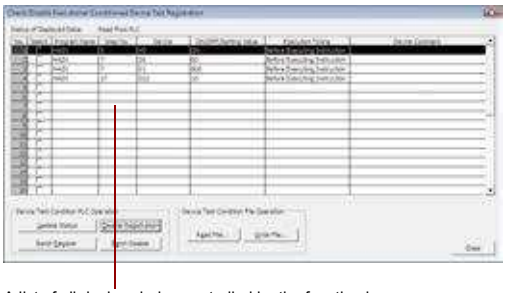
Universal model CPUs have the ability to use the "Executional conditioned device test" function, which automatically sets device values to user specified values at any step during program simulation. Traditionally, to simulate real I/O or other device value change, a separate program would need to be written to perform debugging. By using the "Executional conditioned device test" function, it is possible to debug even small portions of simple ladder programs without the need to modify the program or add rungs of ladder. Therefore, debugging can be completed faster and easier.



Devices that have been added to the executional conditioned device test are highlighted by a pink box for easy identification.

No program modifications required

Configure the device setting by choosing the step No. and execution timing (before/after instruction execution).



A list of all devices being controlled by the function is automatically generated and can be saved and recalled for further debugging at a later time.

Improved flexibility of device point assignment

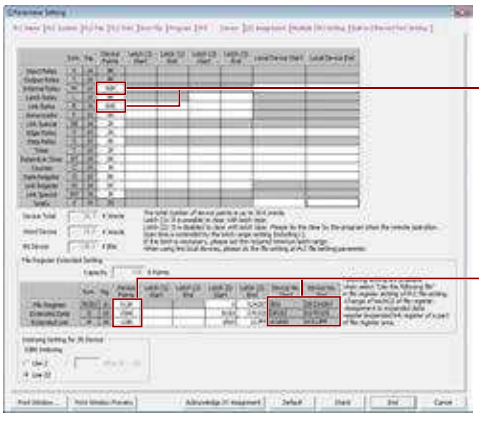
Extended range of bit devices

Bit devices, internal relay (M) and link relay (B), can now be assigned up to 60K points each. Previous models are limited to 32K points.
The total number of device points remains the same, however greater flexibility of device utilization and programming is achieved.

Expand bit and word devices

File register extended setting: data registers and link registers*1

The number of Data Register (D) and Link Register (W) device points of can be extended using standard ROM or a memory card. Previous models only allow the extension of File Register (R/ZR) device points. Using this setting, it is easy to create more data or link registers to accommodate program changes, etc.



Extended range of bit devices
Internal relays (M) and link relays (B) can be assigned up to 60K points.

File register extended setting
For example, the 896K points of word devices in the standard ROM area of a Q100UDEHCPU can be divided as follows.

- File register (R): 512K points
- Extended data register (D): 256K points
- Extended link register (W): 128K points

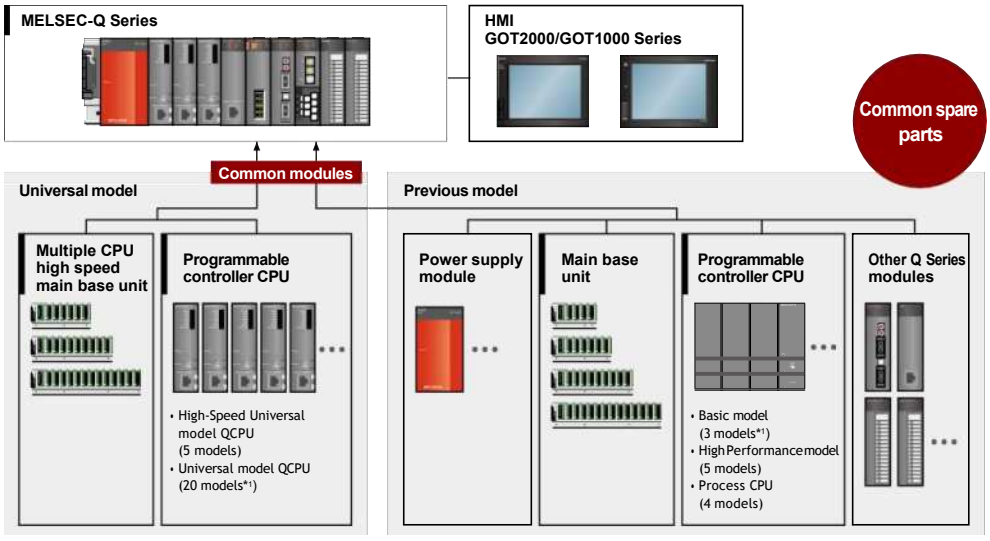
*1: Not supported by Q00UJ.

Easy Maintenance

■ Fully compatible with standard Q Series

Use existing Q Series modules

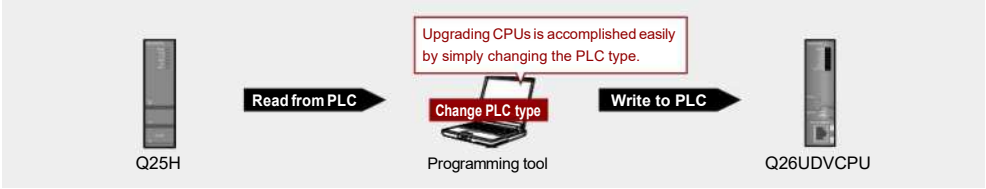
Conventional Q Series modules are compatible with the Universal model QCPU Series. Therefore, when requiring an upgrade, system maintenance costs of existing systems can be kept to a minimum with little disruption when changing over.



*1: The Q00UJCPU and Q00JCPU are all-in-one type, with integrated power supply, 5-slot base unit, and CPU.

Use existing Q Series programs

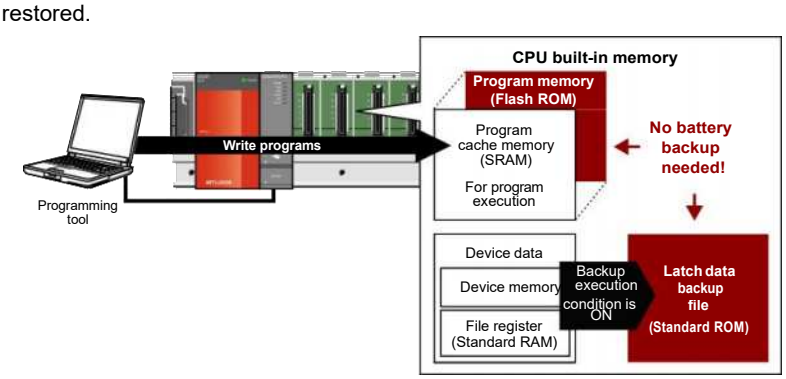
Conventional QCPU programs can be used just by changing the PLC type*2 within the programming tool, which enables easy upgrade to the Universal model Series with little re-engineering required.



*2: Depending on the program, the number of steps may vary when the PLC type is changed.

Automatically backup critical data

Programs and parameter files are automatically backed up to the program memory (Flash ROM) which does not require battery backup. This prevents loss of program and parameter data owing to failure in battery replacement. Also, back-up of important data such as device data can be registered to the standard ROM in order to prevent data loss due to a flat battery in case of planned outage during consecutive holidays. The backup data is restored automatically when the power is restored.

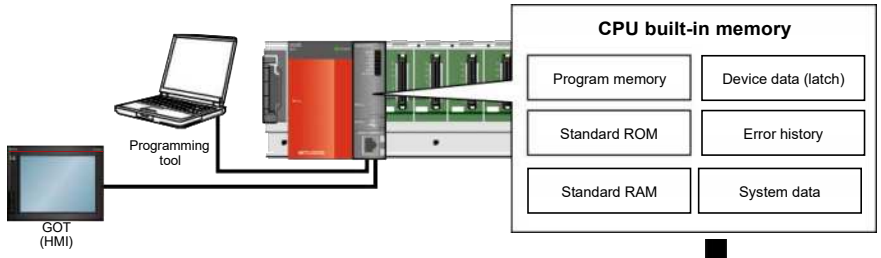


No battery required for data protection

Shorten system down recovery time

CPU module change function*1

The CPU module change function allows the user to create a comprehensive backup of all CPU information to a memory card. In the unlikely event of a CPU failure or other catastrophic event, the backup data can be used to quickly program a new CPU module.
Using this function, the system can rapidly be made operational and downtime can be minimized.



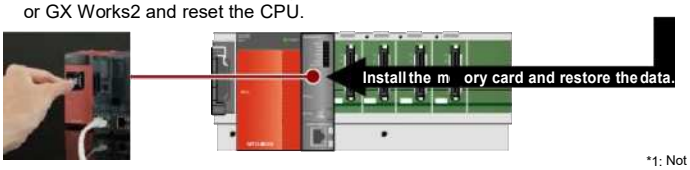
Create full backups of all CPU data

STEP 1 Insert a memory card into the desired CPU module and perform a backup operation.

STEP 2 When necessary, insert the memory card containing the backup information into a replacement CPU.

STEP 3 Execute the restore function using GX Developer or GX Works2 and reset the CPU.

Back up onto SD memory card or memory card

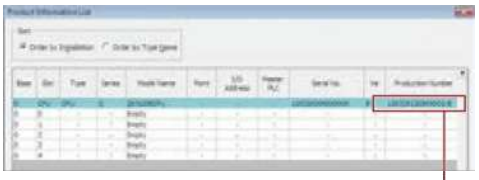


*1: Not supported by Q00UJ, Q00U and Q01U.

Serial numbers are now printed on the front of modules

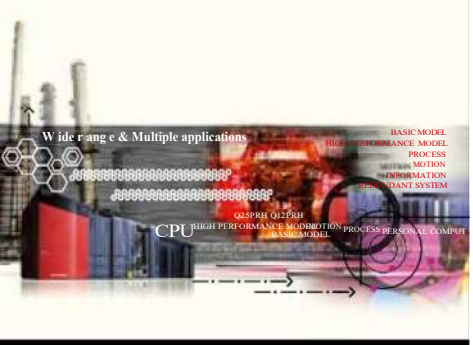
Serial numbers can be checked quickly without having to remove them from the base unit (No interruption of operation is necessary).
Also, serial numbers may be checked using the "product information list" feature included in GX Developer and GX Works2.

Serial numbers are located on the bottom front of modules



The serial numbers of connected modules appear in the Product Information List and can be exported in CSV format.

Easily check serial numbers



CPU Lineup

MELSEC Q series QnU

The iQ Platform incorporates many different CPU types to integrate multiple control disciplines

The MELSEC-Q Series offers programmable controller, process, redundant, C language, motion, robot and CNC CPUs to cover various different control requirements.
With the multiple CPU configuration, a best-fit control system can be realized. In addition, high availability systems can be easily realized with the high-reliability redundant system range.

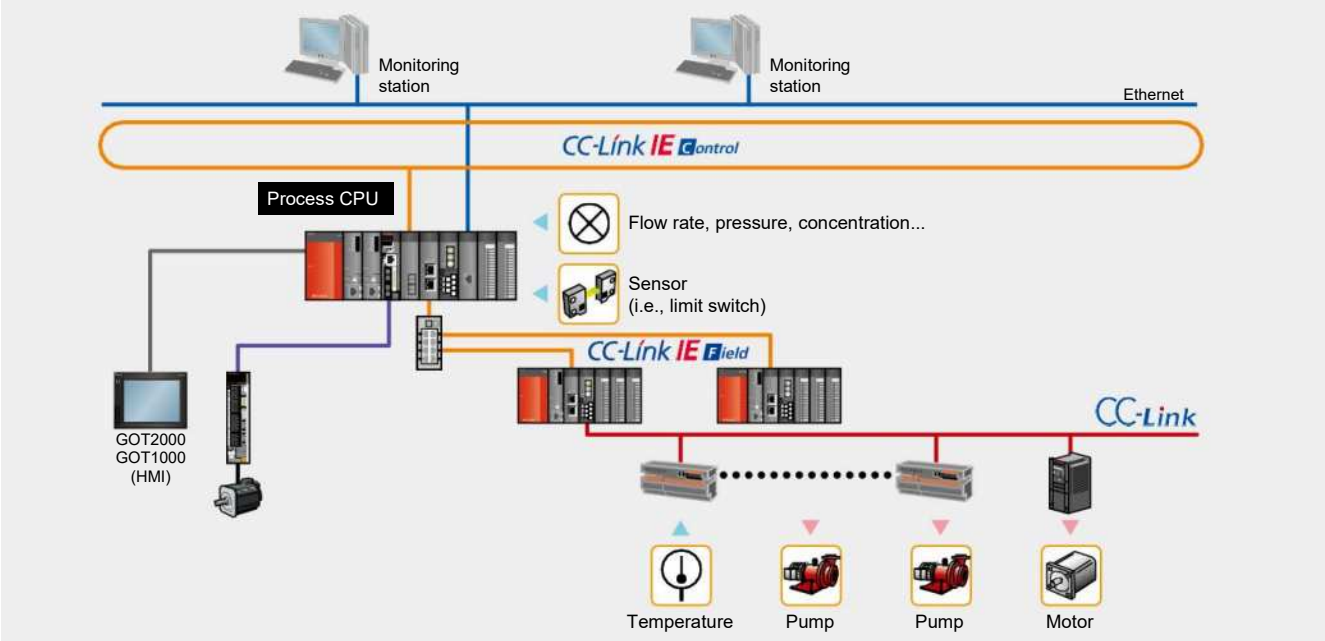
MELSEC PROCESS

MELSEC process control is a flexible, highly reliable platform with advanced functionality designed to cost-effectively meet the needs of a wide range of industries.

Realize detailed instrument control to match the process state

● **Process CPU**····· **Q02PHCPU, Q06PHCPU, Q12PHCPU, Q25PHCPU**

Q Series process controllers offer features that rival those of costly DCS systems at a fraction of the cost. A single CPU can control a large number of PID loops while simultaneously performing standard sequence control. The process CPUs are complemented by a range of channel isolated high resolution analog I/O modules with online change (hot-swap) capability, and the function block programming and engineering software environment, PX Developer.
In addition, PX Developer now supports GX Works2 programming software.
With this connection between the two software, both sequence control and loop control programs can be used in the process CPU.



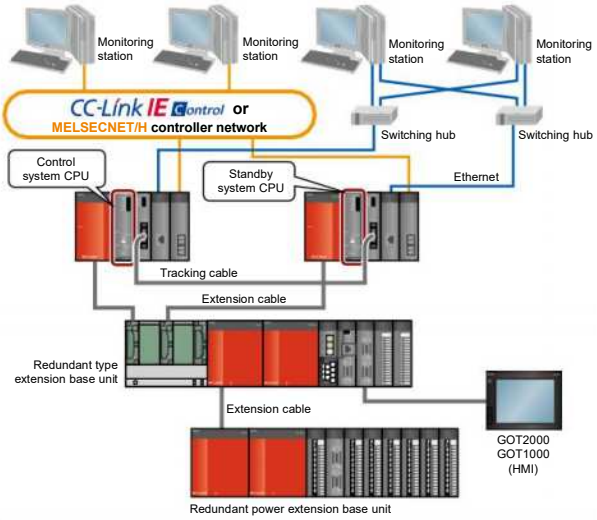
Redundancy to improve your system reliability

● Redundant CPU·····Q12PRHCPU, Q25PRHCPU

The redundant systems are designed to provide the users with systems that have the properties of Q Series and are not affected by sudden failures. The basic system including CPU module, power supply module, main base unit and network module is redundant to prevent system down. Programming can be performed without consciousness of redundancy.
In addition, PX Developer now supports GX Works2 programming software.
With this connection between the two software, both sequence control and loop control programs can be used in the process CPU.

Redundant local I/O system

The CPU directly accesses I/O modules.
Ideal for systems requiring high-speed response.

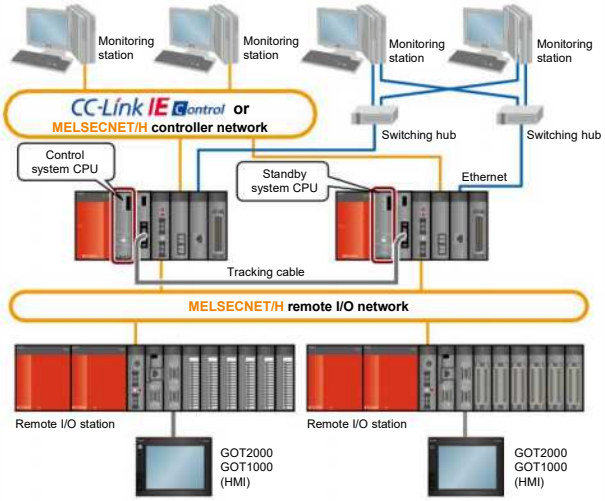


System switching time (Reference)

Approximately 50 ms (Local I/O response time)
· Standby CPU tracking data acquisition time
· CPU switching time: Min. 32 ms (without signal flow tracking)

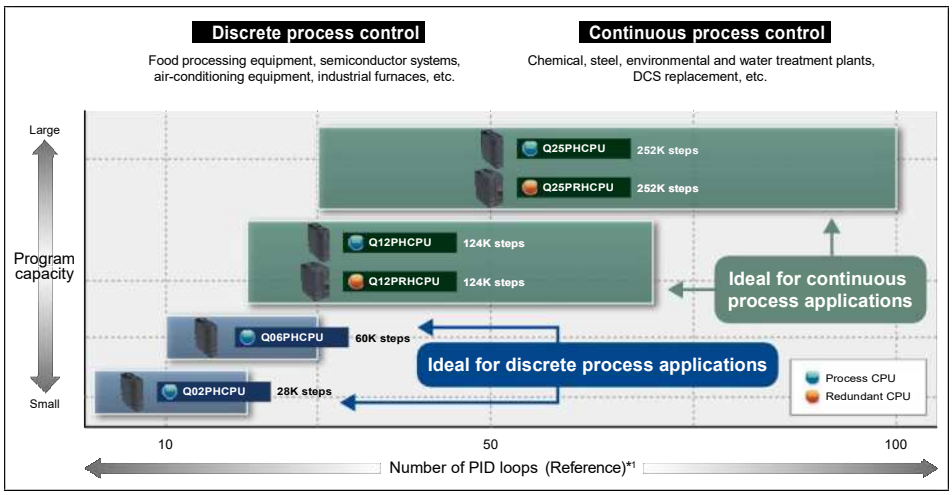
Redundant remote I/O system

Ideal for distributed systems with multiple remote I/O stations.



System switching time (Reference)

Approximately 800 ms (Remote I/O response time)
· Standby CPU tracking data acquisition time
· Output holding time of remote I/O station during control system switching: 700 to 800 ms
· CPU switching time: Min. 21 ms (without signal flow tracking)



*1: The number of PID loops may change if programs (other than loop control) are large.
Refer to the PX Developer Version 1 Programming Manual or Process Technical Guide for details.

For further details, please refer to the "MELSEC Process Control / Redundant System" catalog (L(NA)08030E).

New possibilities for pre-installed systems connected from the C Controller

● C Controller CPU

Q24DHCCPU-V, Q24DHCCPU-VG*1, Q24DHCCPU-LS, Q12DCCPU-V

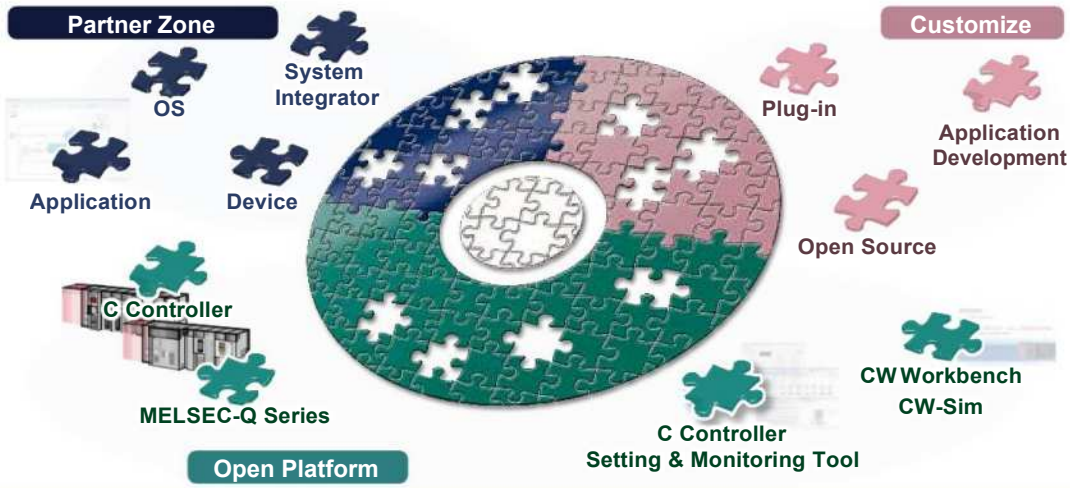
The C Controller is a generic open platform controller that can execute C language type programs, based on the MELSEC system architecture. It utilizes industrial performance such as long term parts supply, high availability, and advanced functionality. The high-end model Q24DHCCPU-V/-VG comes pre-installed with VxWorks®, and supports advanced information processing and control system I/O. The standard model Q12DCCPU-V is a space saving controller that realizes high-speed I/O control. The Q24DHCCPU-LS is an OS independent controller. Linux® based control can be easily realized by installing 3rd Party partner OS, supporting advanced information processing with a user interface environment close to conventional personal computers. Wide scope of applications are realized with the availability of these 4 C Controllers, used together with MELSEC-Q Series I/O modules, 3rd Party products, open source, and customized applications/programs. Providing freedom with a robust, easier and high-performance system.

*1: Set product (Q24DHCCPU-VG-B000/B002) with GENWARE® 3-VG by International Laboratory Corporation.

For further details, please refer to the "iQ Platform Real Time Operating System C Controller (L(NA)08165E)" catalog.

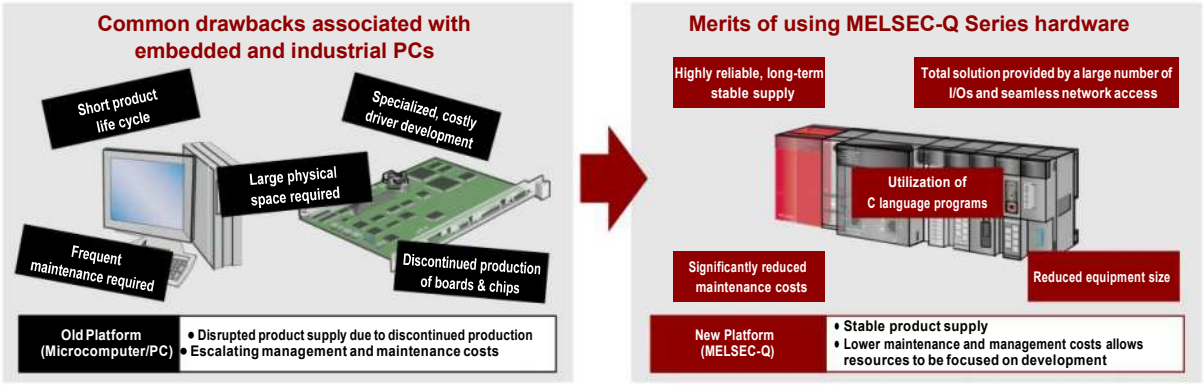
Ideal for a diverse range of systems, based on a generic platform architecture

Leveraging the C Controller to realizing customized systems, by utilization of 3rd Party applications, installation of 3rd Party partner OS, utilization of programs, and open source applications.



The C Controller overcomes the overheads associated with maintaining embedded PCs (micro boards, etc.) and industrial PCs realizing a cost effective solution.

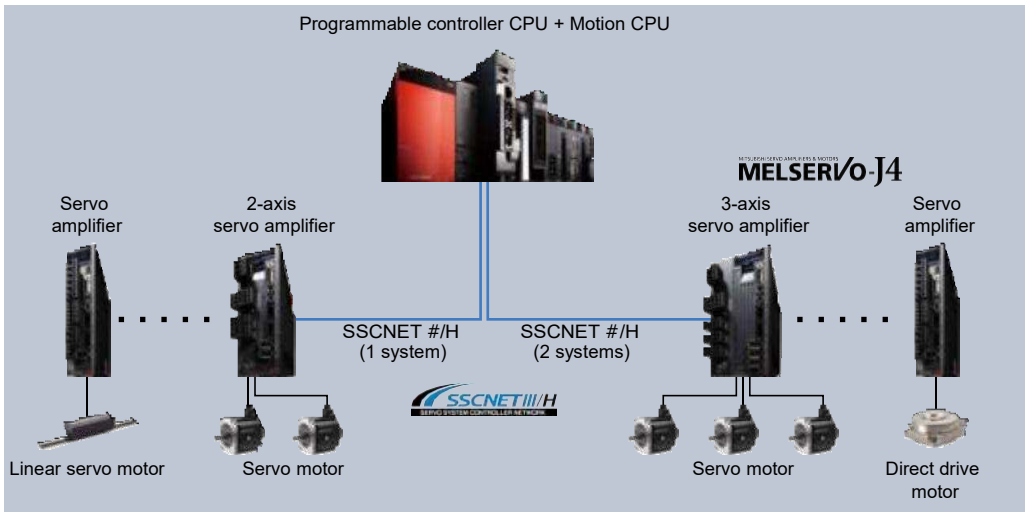
The C Controller platform is a solution that realizes personal computer level functionality without the burden of high maintenance costs usually associated with personal computers. In addition, it includes a robust design that is ideal for industrial environments by being based on the high quality MELSEC control system.



Flexibly connecting with servo amplifiers and servo motors, etc., via SSCNET #/H

● **Motion CPU**····· **Q173DSCPU, Q172DSCPU**

Each MELSEC-Q Series Motion controller is capable of high-speed control of up to 32 axes (96 axes when using three CPUs together). Each Motion CPU is the same size as a standard Q Series programmable controller. The new generation Motion controller is packed with advanced functions while saving space with its smaller size.

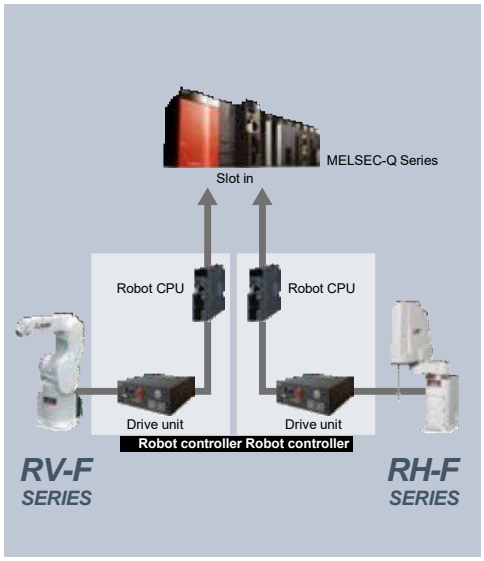


For further details, please refer to the "Servo System Controllers (L(NA)03062)" catalog.

Automating production sites with robots

● **Robot controller**····· **CR750-Q, CR751-Q**

The iQ Platform compatible robot controller increases the speed of data communications between CPUs and dramatically reduces I/O processing times using a high-speed standard base between multiple CPUs.

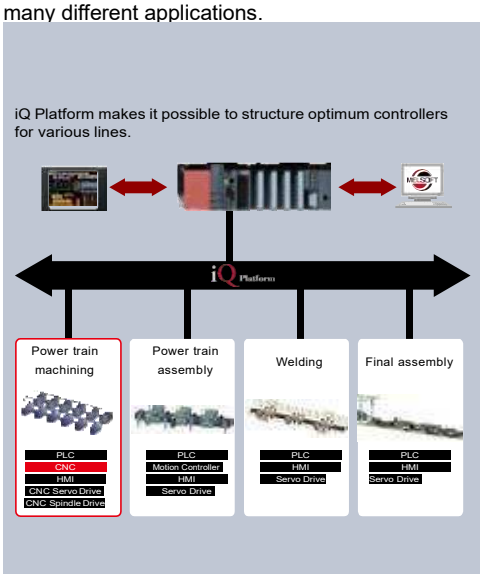


For further details, please refer to the "INDUSTRIAL ROBOT MELFA F Series (L(NA)-09067ENG)" catalog.

Integrating the high-performance CNC with high-speed PLC

● **CNCCPU**····· **Q173NCCPU**

This CNC controller is part of the Mitsubishi FA integration solution "iQ Platform".
The integration of the high-performance CNC and high-speed programmable controller helps reduce the total operation cycle time. Supporting a wide range of interface and I/O modules flexible to many different applications.



For further details, please refer to the "iQ Platform CNC C70 Series (BNP-A1214(ENG))" catalog.

Network

MELSEC Q series

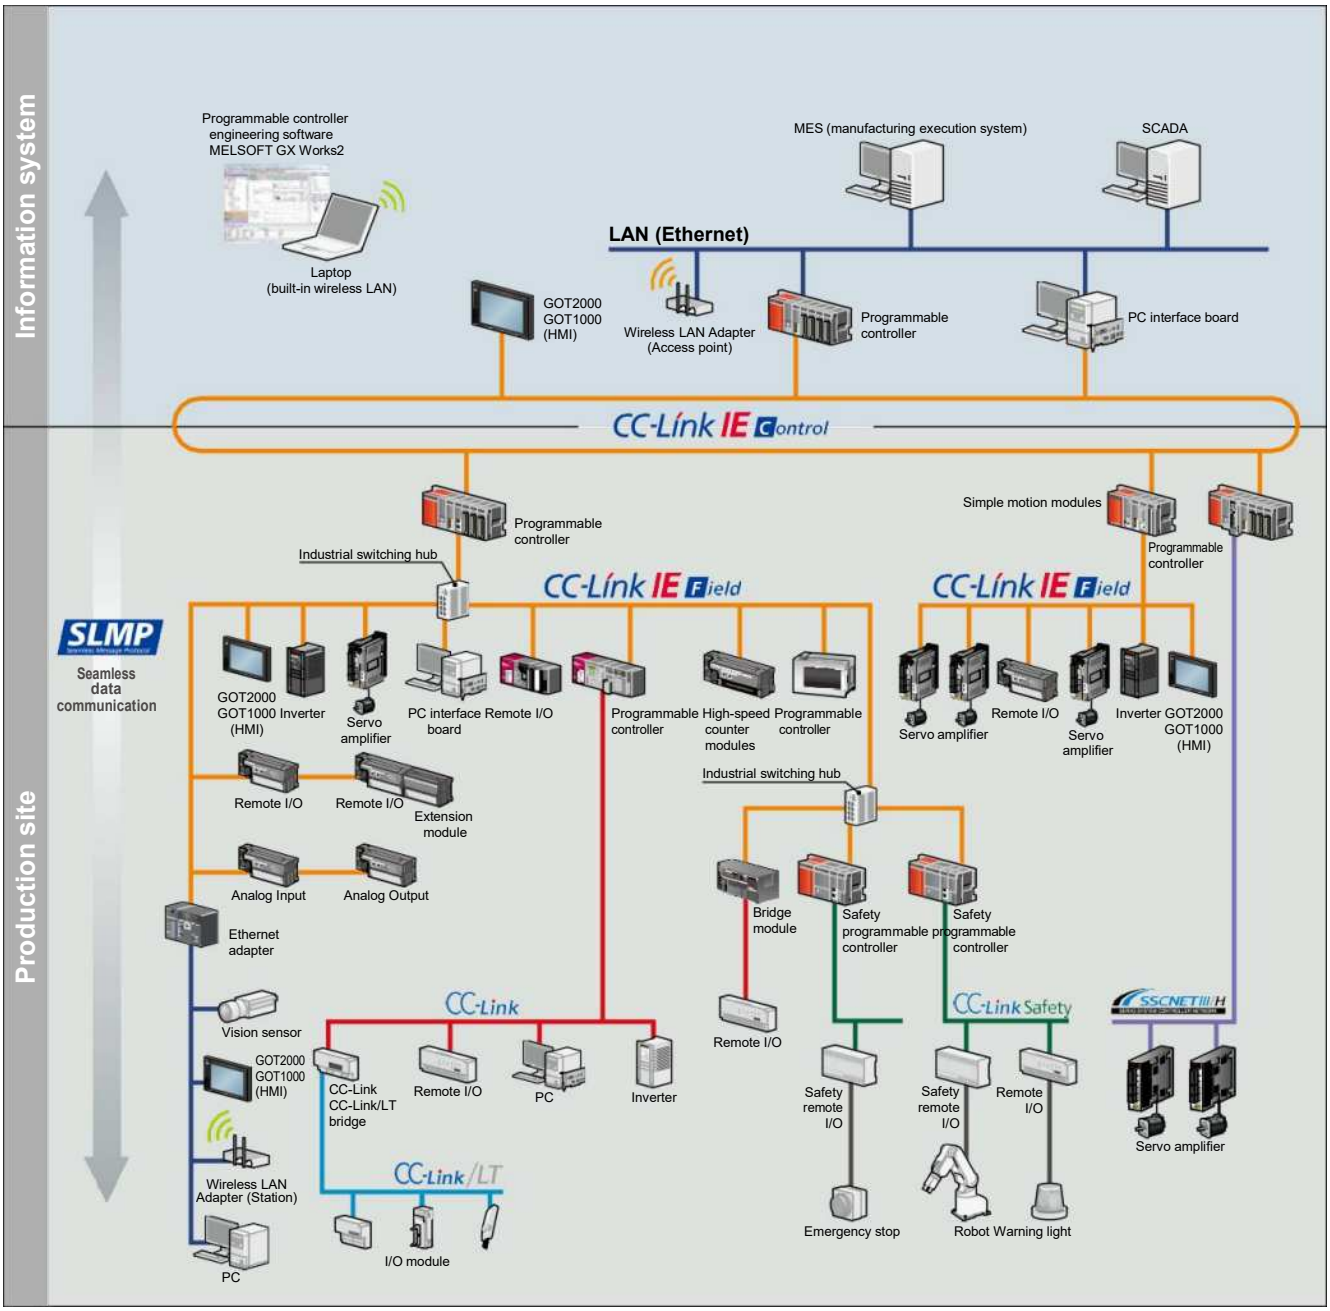
QnU

Seamless communication between upper-level information systems and lower-level field systems; scalable to fit any application size

Today there is an increasing demand from production facilities for high speed control, effective management of data, flexible wiring, easy parameter settings, and predictive maintenance.

To answer these demands, Mitsubishi Electric has teamed up with the CC-Link Partner Association to provide reliable, open-standards networks that operate seamlessly with one another. Together, these and other Mitsubishi networks allow for flexible integration at any network level. The latest addition to the CC-Link portfolio is IE Field; an Ethernet based gigabit network designed to provide cost-effective, reliable connectivity to field devices.

■ Network Configurations



Seamless communication

Seamless data communication through Ethernet, CC-Link IE Control, CC-Link IE Field, and CC-Link networks allow easy access to information, no matter where it resides on the network. Through this technology, it is possible to “drill down” from the Enterprise or IT layer through multiple networks accessing programming controllers using GX Works2 programming or other related software.

In addition, many devices supporting SLMP*1 such as vision sensors and RFID controllers may be connected to the CC-Link IE Field Network.

*1: SLMP (SeamLess Message Protocol) is a protocol advocated by the CC-Link Partner Association.

CC-Link IE Control

CC-Link IE Control is a high-reliability distributed control network designed to handle very large data communications (128K word) over a high-speed (1 Gbps) dual loop optical cable topology.

*: Compatible modules: QJ71GP21-SX, QJ71GP21S-SX

CC-Link IE Field

CC-Link IE Field is an all-round versatile gigabit Ethernet based network integrating controller, I/O control, safety control, and motion control in a flexible wiring topology supporting star, ring, and line configurations.

*: Compatible modules: QJ71GF11-T2, QS0J71GF11-T2 (safety control), QD77GF16 (motion control)

CC-Link

CC-Link is a high-speed and high-reliable deterministic I/O control network which realizes reduced wiring whilst offering multi-vendor compatible products. This open field network is a global standard originating from Japan and Asia.

*: Compatible modules: QJ61BT11N

CC-Link Safety

CC-Link Safety is a safety field network that prevents risks on the shop floor. This realizes a highly-reliable and a high-speed communication with less wiring.

*: Compatible modules: QS0J61BT12

SSCNETIII/H

SERVO SYSTEM CONTROLLER NETWORK

SSCNETIII/H is a dedicated high-speed, high-performance, and highly reliable servo system control network which offers flexible long distance wiring capabilities based on optical fiber cable topology.

*: Compatible modules: QD77MS2, QD77MS4, QD77MS16

CC-Link/LT

CC-Link/LT is a wire-saving sensor level network which is designed for use in panels between simple discrete devices. Its wiring system is based on reducing incorrect wiring and is based on CC-Link realizing high-speed and robust noise resistance features.

*: Compatible module: QJ61CL12

BACnet™

This network supports the communication protocol standard BACnet™ client function. This network is mainly used to monitor and control air-conditioning, lighting and fire detection, etc. in building automation system applications.

*: Compatible modules: QnUDVCPU, QJ71E71-100 (client only)

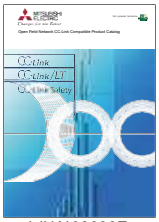
MODBUS®

Q-Series is now supporting the MODBUS® protocol network, realizing easy communication, with various MODBUS® slave devices compatible with Ethernet MODBUS®/TCP or RS-232/422/485 serial communication.

*: Module supporting MODBUS®/TCP : QJ71MT91 (master/slave functions), QnUDVCPU, QJ71E71-100 (master only)

*: Modules supporting MODBUS®: QJ71MB91 (master/slave functions), QJ71C24N (-R2/R4) (master only)

L(NA)08111E



L(NA)08038E

For further details about CC-Link networks, please refer to the "CC-Link IE" or "CC-Link Compatible Products" catalogs.

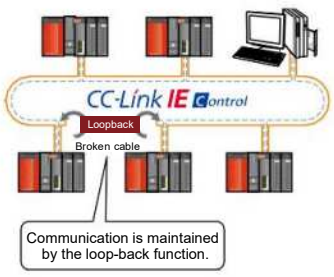
	LW	16K points (16384 points, 32 KB)	128K points (131072 points, 256 KB)
	LX	8K points (8192 points, 1 KB)	8K points (8192 points, 1 KB)
	LY	8K points (8192 points, 1 KB)	8K points (8192 points, 1 KB)
Communication speed		1 Gbps	
Number of stations per network		120 (1 control station plus 119 normal stations)	
Connection cable		Optical fiber cable (Multi-mode fiber)	
Overall cable distance		66000 m (When 120 stations are connected)	
Station-to-station distance (Max.)		550 m (Core/Clad = 50/125 (m))	
Max. number of networks		239	
Max. number of groups		32	
Network topology		Ring	

*1: When the control station is a Universal model QCPU.
*2: To use extended mode, (QJ71GP21(S)-SX) network modules and Universal model CPUs whose first five serial number digits are 12052 or later are required. All stations in the network must support the extended mode. Also, GX Works2 version 1.34 L or later is required.

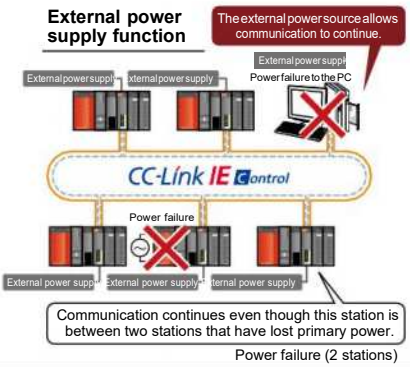
Designed to continue functioning even in the worst possible scenarios

- The use of fiber optic cables which are completely immune to EMI and RFI noise allows the network to function in environments where other networks cannot. The dual loop design allows the network to continue functioning even if cables become damaged or the power is lost to a station.
- Additionally, CC-Link IE stations can be powered using an external supply. That allows communication to continue normally in the event of a loss of the primary power supply, without relying on the loop-back function.

Loopback function

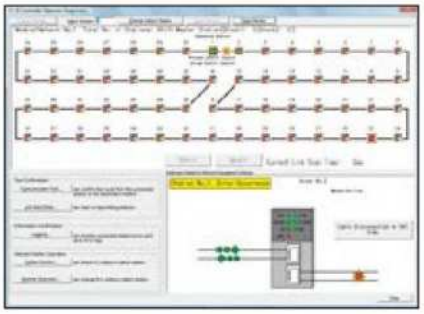


External power supply function



Power failure (2 stations)

Visual display of network connection status



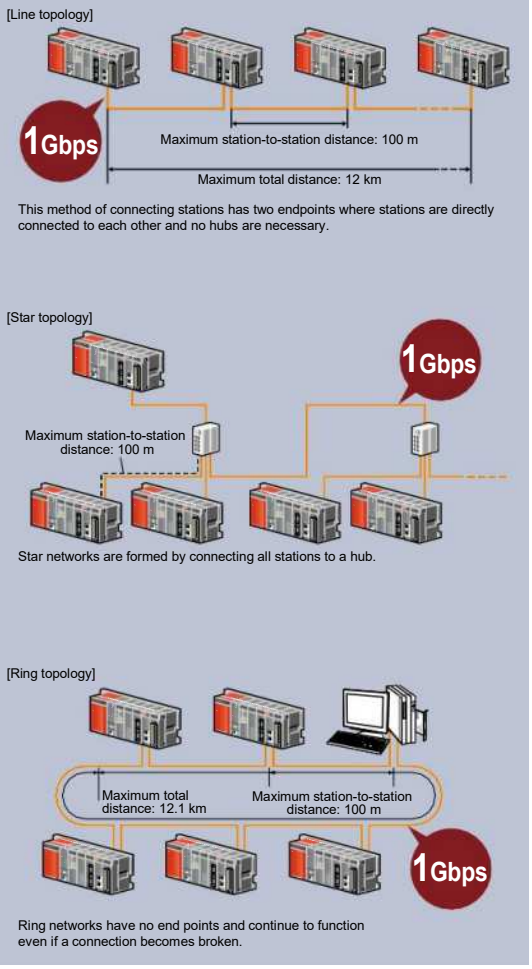
View the network connection status of entire system to identify problems at a glance. The cause of problems can be quickly identified and suggested remedies implemented to minimize down time.

Connect to remote I/O stations and other programmable controllers for high-speed distributed control with advanced functionality

● CC-Link IE Field Network module····· QJ71GF11-T2

» Tremendous speed and bandwidth using commercially available cables and connectors. The network design (topology) is highly flexible to fit any layout.
» Operates as either a master or local station. Perfect for managing remote I/O control and distributed control.
» Devices from other stations can be accessed easily via transient communication using dedicated instructions.
» Function blocks for transient communication are available to further simplify messaging.
» The network can ensure 32-bit data integrity using the station-based block data assurance function. This forces pairs of word data to get updated together during link refresh.
» The QJ71GF11-T2 CC-Link IE Field Network module can function as a slave or master station.

CC-Link IE Field



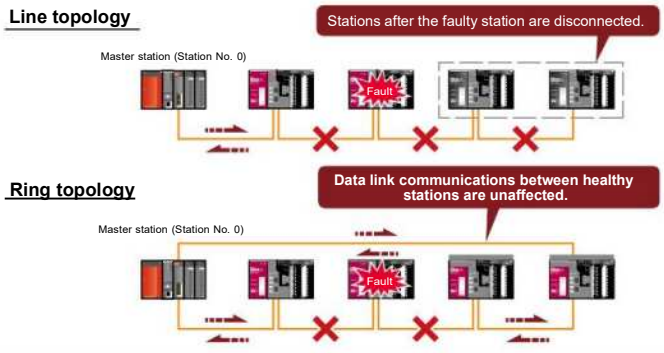
■ Performance Specifications

Item		Specification
Max. link points per network	RX	16K points (16384 points, 2 KB)
	RY	16K points (16384 points, 2 KB)
	RWr	8K points (8192 points, 16 KB)
	RWw	8K points (8192 points, 16 KB)
Max. link points per station	RX	2K points (2048 points, 256 B)
	RY	2K points (2048 points, 256 B)
	RWr	1K points (1024 points, 2 KB)
	RWw	1K points (1024 points, 2 KB)
Communication speed		1 Gbps
Number of stations per network		121 (1 master plus 120 slave stations)
Connection cable		Ethernet cable of category 5e or higher (Double shielded cable) which satisfies 1000BASE-T standard
Maximum overall cable distance	Line topology	12 km (with 1 master and 120 slaves connected)
	Star topology	Depends on the system configuration.*1
	Ring topology	12.1 km (with 1 master and 120 slaves connected)
Max. station-to-station distance		100 m
Max. number of networks		239
Network topology		Line, star, line and star mixed, or ring*2

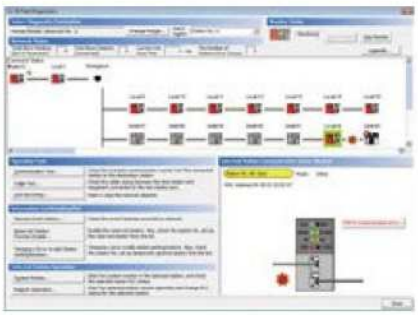
*1: Up to 20 hubs can be connected per network.
*2: Ring networks may not be mixed with line or star networks. QJ71GF11-T2 network modules whose first five serial number digits are 12072 or later are required for ring networks. Additionally, GX Works2 version 1.34 L or later is required.

Easy diagnosis functions

• In certain situations such as power loss, a station could be prevented from communicating. In a line network this can cause perfectly healthy stations can become separated from the network. In a ring network, only the faulty station is separated, thus increasing the system reliability.



Visual display of network connection status



The network diagnostic tools in GX Works2*3 allow problems to be identified rapidly. In addition to a visual overview of the network and several other tools, detailed monitoring of CPUs and modules from any station, to any station is possible.

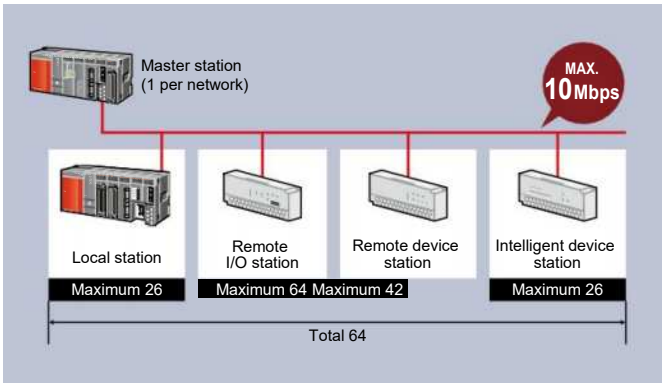
*3: Not supported by GX Developer.

Superior cost-performance field network with many compatible devices

● CC-Link network module ····· QJ61BT11N

» By building on reliable field bus technology, CC-Link is capable of moving large volumes of bit data, like ON/OFF relay status, and word data at high-speed.
» CC-Link keeps cyclic transmission consistent and guarantees punctuality by separating it from message (transient) communication. Even if message communication becomes saturated, it will not affect the link scan time.
» The QJ61BT11N module supports CC-Link version 1 and 2, and may be used as a local or master module.

CC-Link



■ Performance Specifications

Item			Specification
Communication speed			Can select from 156 kbps/625 kbps/2.5 Mbps/5 Mbps/10 Mbps
Transmission path			Bus (RS-485)
Maximum number of link points per system*1			Remote inputs/outputs (RX, RY): 8192 points Remote registers (RWw): 2048 points Remote registers (RWr): 2048 points
Maximum number of link points per system	Expanded cyclic setting	Single	Remote inputs/outputs (RX, RY): 32 points (30 points for local station) Remote registers (RWw): 4 points Remote registers (RWr): 4 points
		Double	Remote inputs/outputs (RX, RY): 32 points (30 points for local station) Remote registers (RWw): 8 points Remote registers (RWr): 8 points
		Quadruple	Remote inputs/outputs (RX, RY): 64 points (62 points for local station) Remote registers (RWw): 16 points Remote registers (RWr): 16 points
		Octuple	Remote inputs/outputs (RX, RY): 128 points (126 points for local station) Remote registers (RWw): 32 points Remote registers (RWr): 32 points
Maximum number of connected stations (master station)			64*2
Total distance/speed (When using Ver. 1.10)			1200 m/156 kbps, 900 m/625 kbps, 400 m/2.5 Mbps, 160 m/5 Mbps, 100 m/10 Mbps (Using repeaters, it is possible to extend the network distance up to 13.2 km)

*1: For CC-Link version 2.
*2: Using only remote I/O stations.

Device level wire-saving network

● CC-Link/LT network module ····· QJ61CL12

» The maximum of 64 stations can be updated in as little as 1.2 ms (at 2.5 Mbps). Choose from 3 transmission speeds according to the required transmission distance.
» CC-Link/LT slave stations do not require any parameters, only the transmission speed needs to be specified by the master station.
» The QJ61CL12 CC-Link/LT network module can only function as a master station.

CC-Link/LT

■ Performance Specifications

Item		Specification
Communication speed		156 kbps/625 kbps/2.5 Mbps
Transmission path		T-branch topology
Max. connected modules		64
Overall distance	Length of trunk line	35 m/2.5 Mbps, 100 m/625 kbps, 500 m/156 kbps
	Max. length drop line	4 m/2.5 Mbps, 16 m/625 kbps, 60 m/156 kbps
	Overall length drop lines	15 m/2.5 Mbps, 50 m/625 kbps, 200 m/156 kbps

Cost-effective distributed control network compatible with A and AnS Series

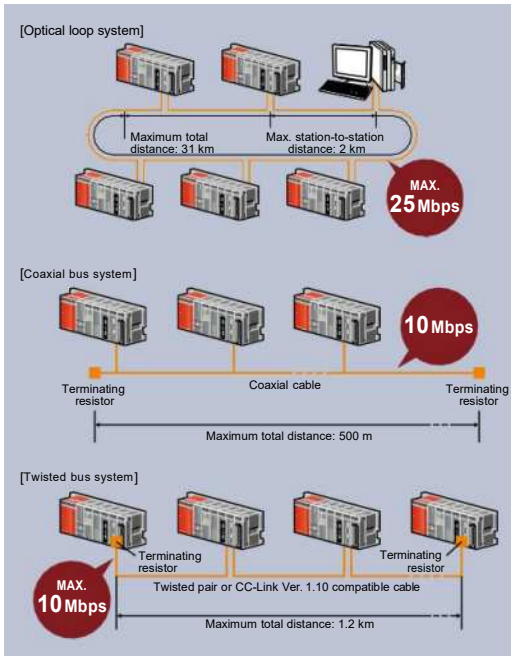
● **MELSECNET/H network module**

Optical loop type···**QJ71LP21-25, QJ71LP21S-25, QJ71LP21G, QJ72LP25-25, QJ72LP25G** (Remote I/O station)

Coaxial bus type ····· **QJ71BR11, QJ72BR15** (Remote I/O station)

Twisted bus type····· **QJ71NT11B**

» MELSECNET/H network systems support controller-to-controller, controller-to-personal computer, and controller-to-remote I/O station communications. Multiple wiring types are available and many functions designed to increase reliability are included, such as support for redundant systems.
» Optical loop type: Communication speeds up to 25 Mbps. Fiber optic cable is immune to EMI/RFI noise. Up to 2 km between stations using GI type cable.
» Coaxial bus type: Using low cost coaxial cable allows networks to be constructed at less cost than optical loop networks.
» Twisted bus type: The combination of an affordable network module and twisted-pair cables allows a network system to be built at very low cost.



■ Performance Specifications

Item			Specification					
Network configurations			Optical loop system		Coaxial bus system		Twisted bus system

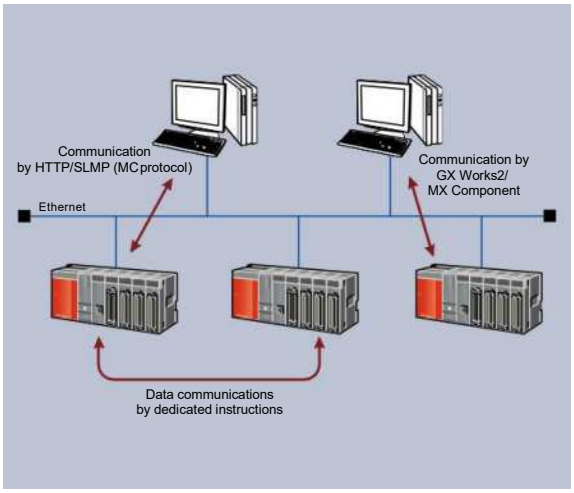
Interface module connectable with multiple Ethernet devices

● **Ethernet interface module**

10BASE-T/100BASE-TX ····· **QJ71E71-100**
10BASE-5 ····· **QJ71E71-B5**
10BASE-2 ····· **QJ71E71-B2**

» Use dedicated instructions for communication between programmable controller CPUs.
» A communication library and sample code is available to allow a web server to access any of the Ethernet modules and exchange information with the programmable controller CPU module. In this way, the web server may host a web page that allows remote operation of a programmable controller over the Internet via web browser.
» To improve programming, maintenance, and debugging efficiency, multiple CPU connections may be established simultaneously using GX Developer and GX Works2.
» The E-mail Function allows Ethernet modules to send e-mail with attachments in binary, ASCII, and CSV formats via a mail server.
» Perform existence checks and keep connections open using the KeepAlive or PING functions. This can be used to ensure connectivity and quickly discover errors.

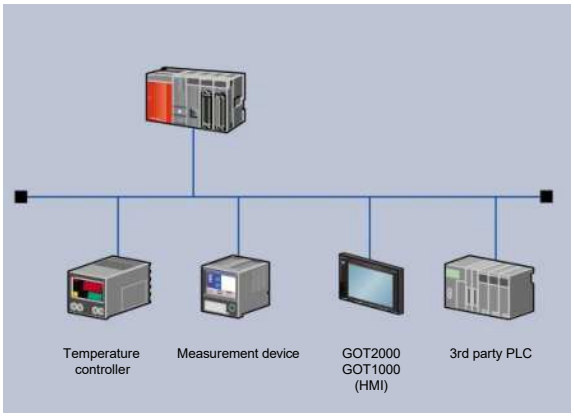


Connect with a large variety of devices using the MODBUS® interface module

● **MODBUS® interface module**

RS-232 1ch, RS-422/485 1ch ····· **QJ71MB91**
10BASE-T/100BASE-TX ····· **QJ71MT91**

» Using the master function, communicate with 3rd party MODBUS® compatible slave devices.
» Slave mode is also supported, which allows communication with other MODBUS® masters such as 3rd party programmable controllers.
» Using the QJ71MB91 synchronization function, a master station may be connected to CH1 (RS-232) and communicate with multiple slaves connected to the CH2 (RS-422/485) interface.
» The QJ71MT91 module is able to operate using the master and slave functions simultaneously.

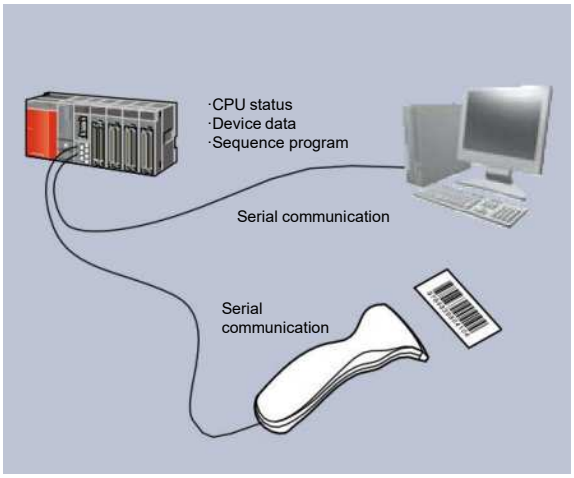


These highly flexible communications modules allow connection to practically any serial device

● **Serial communication module**

RS-232 1ch, RS-422/485 1ch ····· **QJ71C24N**
RS-232 2ch ····· **QJ71C24N-R2**
RS422/485 2ch ····· **QJ71C24N-R4**

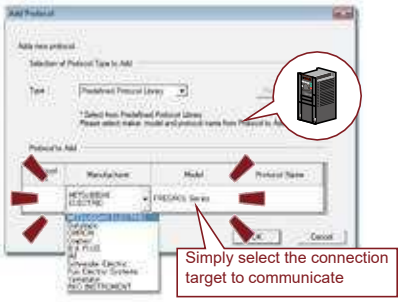
» Push the limits of serial technology: baud rates up to 230.4 kbps, distance up to 1200 m, and multiple block batch read/write up to 960 words from QCPU device memory.
» External devices (personal computer, HMI, etc.) may read and write data in the programmable controller CPU using MC protocol.
» Connect with intelligent devices using their native protocol (barcode reader, measurement device, etc.) by selecting non-procedure protocol and using a sequence program for communication control.
» MELSOFT engineering tools can establish a connection to the programmable controller CPU through the serial connection to perform programing and maintenance duties.
» Dedicated functions are available to facilitate RS-232 communication over public telephone lines using a serial modem. One of them, the remote password function, prevents unauthorized access to programmable controllers via the modem line.



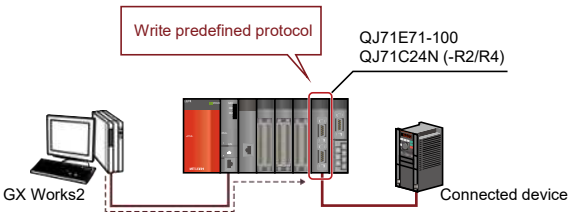
Easier to use through combination of Ethernet/serial communication module and GX Works2 (predefined protocol support function)

Communication with any device can be started quickly only by selecting the device from the predefined protocol library.

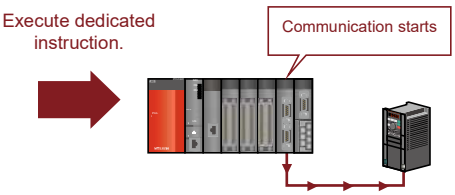
Select the manufacturer and model (series) of the device to be connected.
There is no need for complicated predefined protocol setting for the device.
Simply select from communications protocol libraries such as MODBUS® and BACnet™, which are prepared in advance.



Ⓐ Write the predefined protocol to the module.
Write the set predefined protocol to QJ71E71-100, QJ71C24N (-R2/R4) module. Up to 128 protocols can be set in one module.

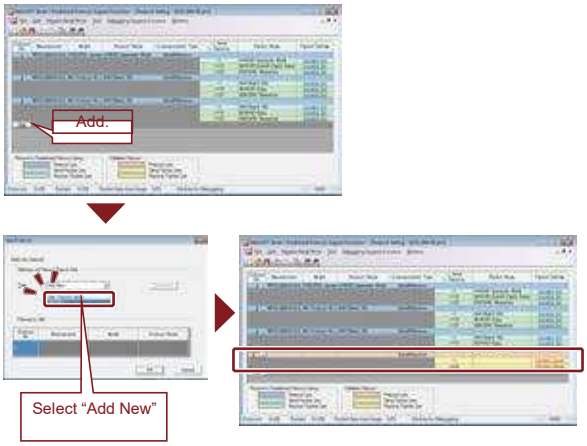


Ⓐ Execute the protocol with ladder program.
With ladder program, communication with any external device can be made only by executing a dedicated predefined protocol starting instruction.

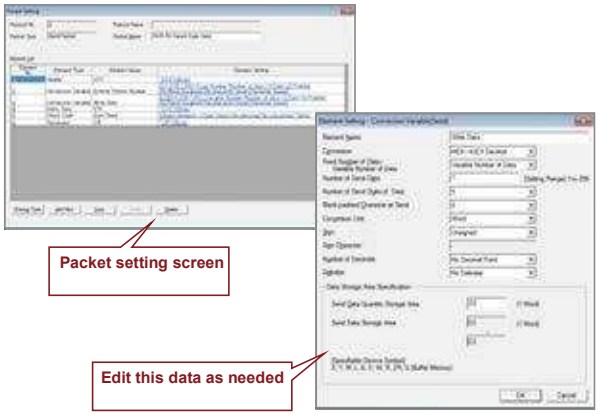


Easy to prepare and edit predefined protocol

- Even if the device to be connected is not contained in the predefined protocol library, the device can be added easily.



- The contents of the prepared predefined protocol can be displayed in list form. The protocol can be edited easily.



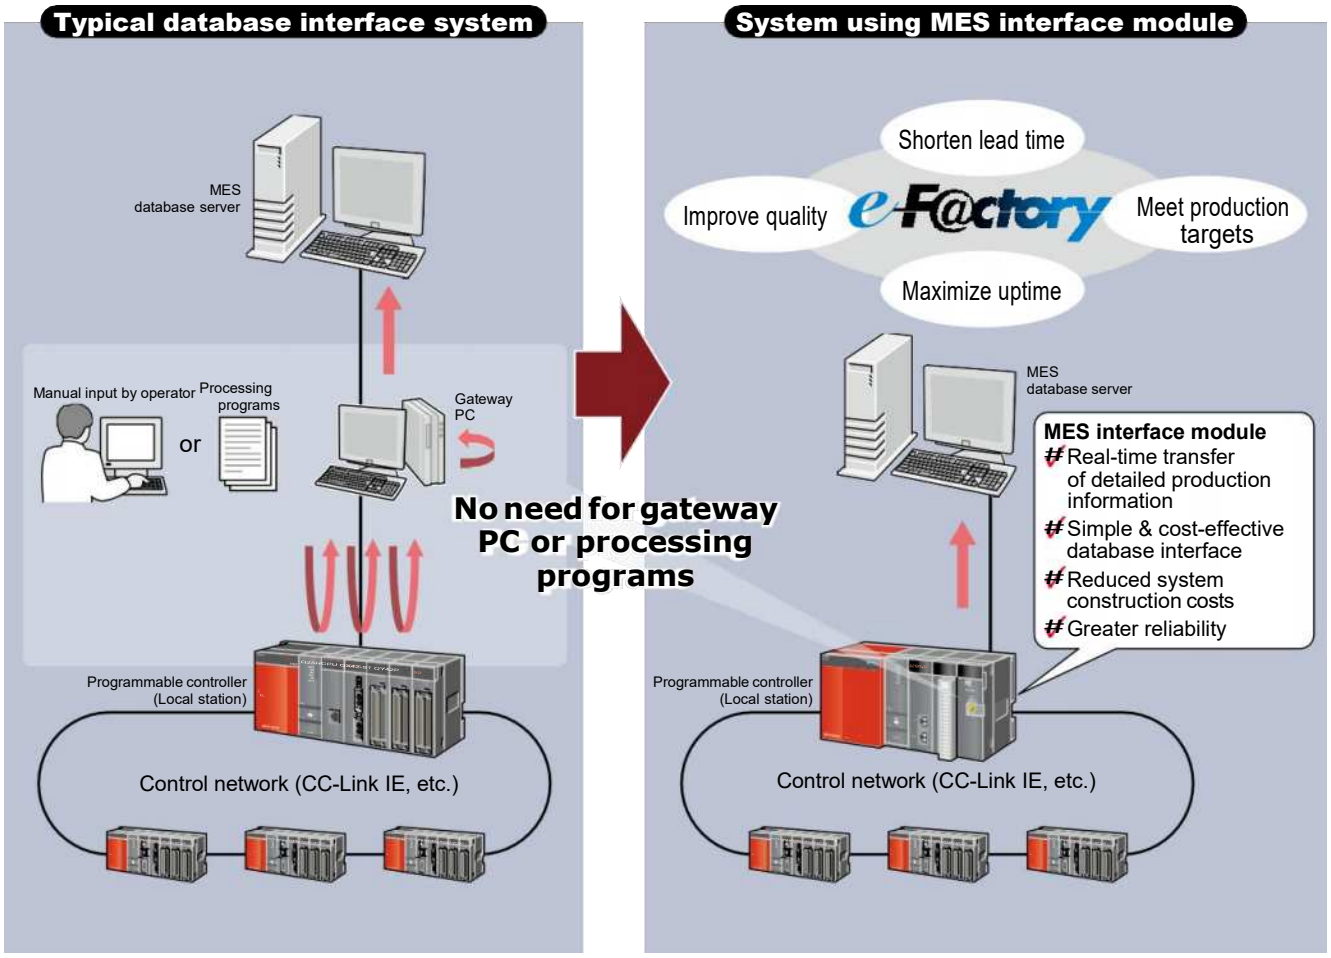
* Supported by QJ71C24N (-R2/R4) with the function version B and a serial number whose first 5 digits are 11062 or higher.
* Supported by products with the first five digits of the QJ71E71-100 product number of 15042 or later.

Make the jump from shop floor data to valuable information in real time

● **MES interface module** ····· **QJ71MES96**

» Simplify the process of connecting to enterprise system databases such as an MES*1 by connecting directly. Configuration of the module is easy, and does not require any programming.
» When user-defined trigger conditions occur, the specified data is read and transferred via SQL text. This event-driven communication method reduces network loading when compared to conventional solutions, which are based on polling architecture.
» Executes pre-registered SQL jobs. Also receives production instructions from MES and downloads production information from the database.

*1: MES (Manufacturing Execution System): A system that manages and controls production activities to optimize quality, production volume, delivery, costs, etc.



The e-F@ctory concept aims to achieve the maximum benefit from manufacturing equipment by providing detailed information, from the shop floor directly to a MES (Manufacturing Execution System). This enables real-time decision making and production site optimization.

Fulfill the need for traceability and discover a powerful troubleshooting tool

● High speed data logger module ····· QD81DL96

» High speed data sampling function
The high speed data sampling function has the power to synchronize with the sequence program scan, ensuring that every value available to the program is logged for analysis. Using this method it is possible to perform detailed operational analysis and identify existing or potential problems.

» Trigger logging function
Trigger logging allows the user to specify, in great detail, when data should be saved. This greatly simplifies the process of investigating why a problem has occurred and assists in the quick identification of solutions. Additionally, it allows CompactFlash memory card space to be used efficiently.

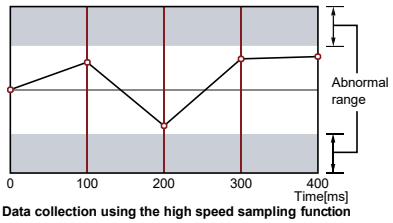
» The logging data display and analysis tool, GX LogViewer, has a simple and effective interface that is user customizable and includes features to maximize the efficiency of analyzing collected data. The High speed Data Logger Module Configuration Tool enables the user to create sophisticated data collection rules using an intuitive step-by-step process. The wizard like interface is beginner-friendly and includes features like importing global labels and device comments.

» Automatic generation of reports including graphs
By creating an Excel® layout file and transferring it to the module, the report function can automatically fill in the numbers using sampled data to create reports on a reoccurring basis. All kinds of reports may be created that include charts, graphs, and other visual aids. It is even possible to e-mail the reports automatically!

High speed data sampling function

Generic sample data from PC or external device at 100 ms intervals

Traditional data logging methods are unable to detect the abnormal values.

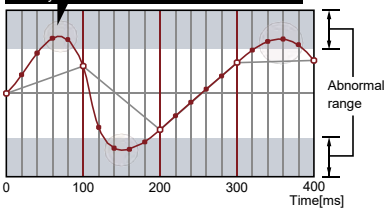


Data collection using the high speed sampling function

The high speed data logger module is capable of sampling data at much higher intervals as to detect fast changing values.
(fastest down to 1 ms)

Synchronize the sample rate to the scan time to reveal all values entering the sequence program.

At 20 ms intervals, the high speed data logger clearly identifies the abnormal values.



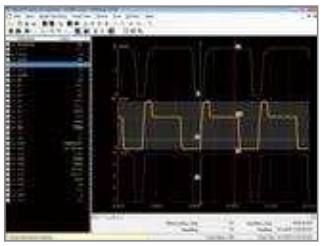
CPUs that support the high speed data sampling function

- High-speed Universal model QCPU Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV
- Universal model QCPU Q03UD(E), Q04UD(E)H, Q06UD(E)H, Q10UD(E)H, Q13UD(E)H, Q20UD(E)H, Q26UD(E)H, Q50UDEH, Q100UDEH
  (Compatible with QnU CPU modules starting with serial No. "11012" or higher.)

* The high speed data sampling function supports only the host control CPU. (Other stations on the network are not supported.)

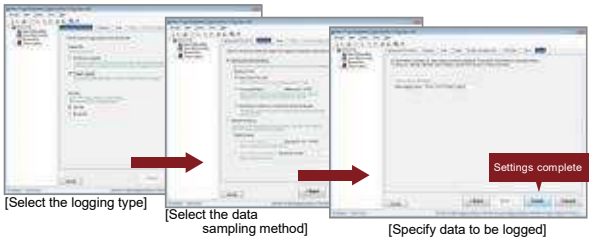
High speed data logger module tools

Data display and analysis tool: GX LogViewer



View a list of events or a trend graph [pictured left] either in real-time (online) or historical (saved file) modes. Helpful features ensure key information is immediately visible.

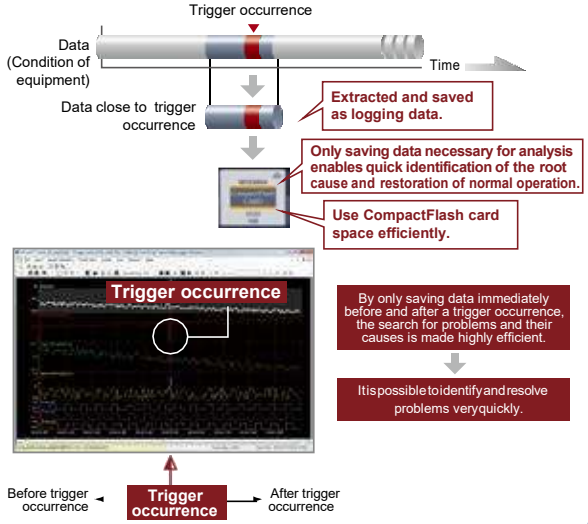
High speed data logger module configuration tool



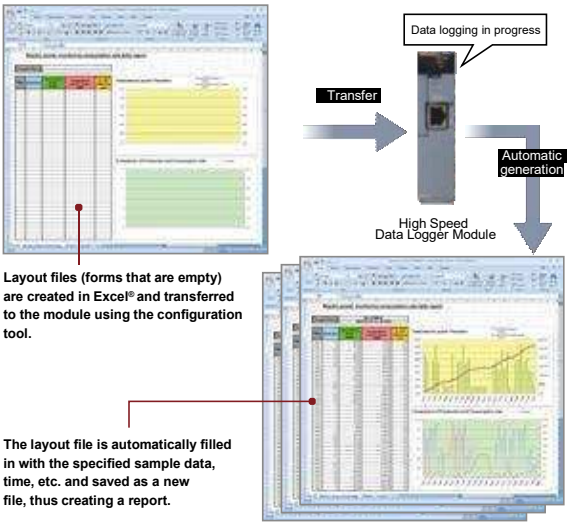
Even making sophisticated data collection rules is easy to do using the intuitive step-by-step configuration process.

* The High speed Data Logger Module Tools are available at no additional cost. Please contact your nearest Mitsubishi Electric representative for details.

Trigger logging function



Automatic generation of reports including graphs



Layout files (forms that are empty) are created in Excel® and transferred to the module using the configuration tool.

The layout file is automatically filled in with the specified sample data, time, etc. and saved as a new file, thus creating a report.

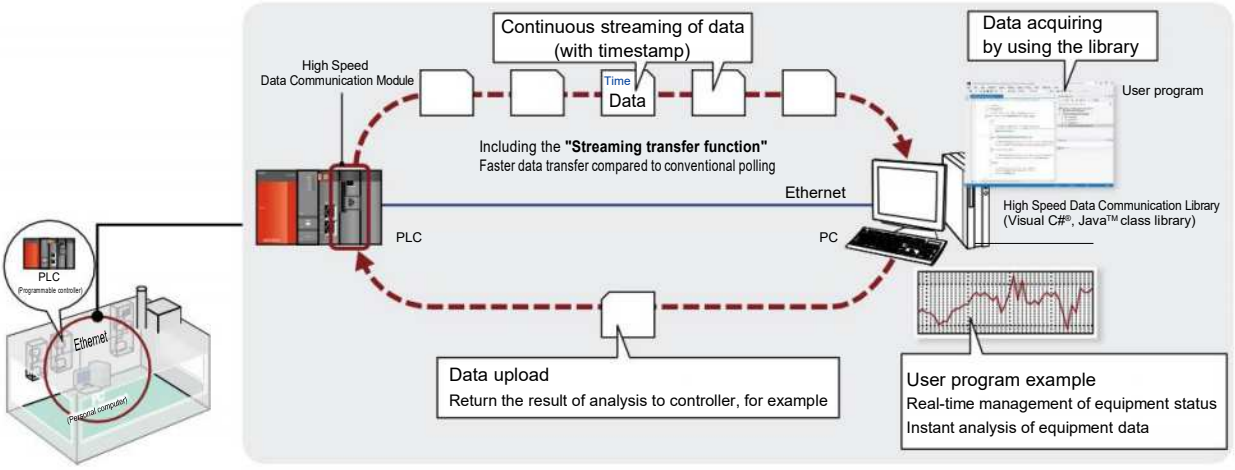
Supporting productivity and enhanced device value through real-time transfer of control data

● **High speed data communication module**····· **QJ71DC96**

» High data accuracy communication from the programmable controller to the personal computer can be easily realized with the high-speed data communication module (QJ71DC96). Data can be streamed at high speed to the personal computer by synchronizing with the controller scan cycle without having to continuously poll data as was previously achieved. This feature realizes improved productivity by resulting in real-time control data analysis on the personal computer.

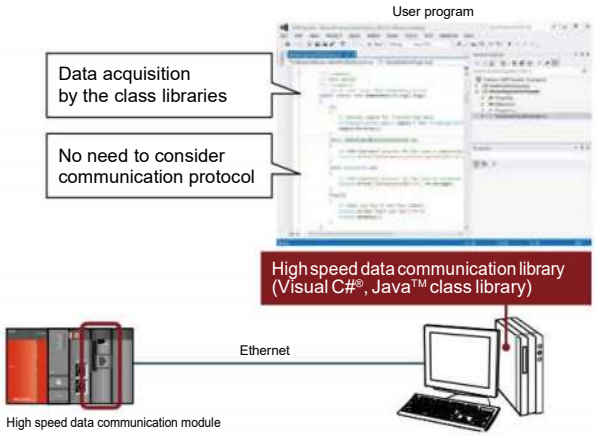
Fast and reliable large data transfer in real-time

● Transfer of large data volumes across a very short sampling period can be realized with "Streaming transfer" feature. High data integrity can be easily achieved across TCIP/IP Ethernet to personal computer based servers.



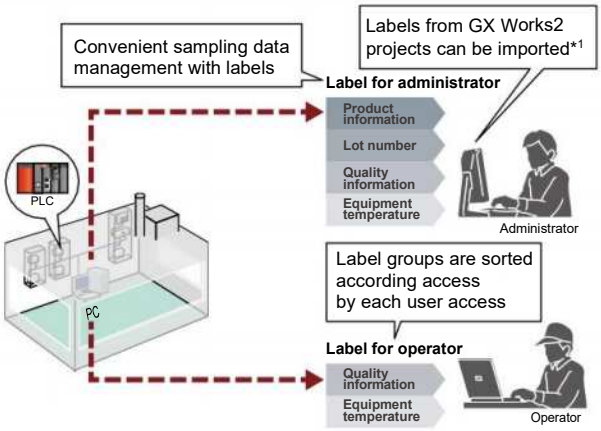
Data acquisition without considering protocol

● Communication between the module and a personal computer is provided in the form of Visual C#® and Java™ class libraries. These class libraries enable a simple personal computer program to acquire data from the programmable controller without considering the communication protocol.



Labels for effective data sampling

● Labeling (naming) each personal computer data makes classifications of transferring data simple. Multiple labels are grouped and sorted as label groups by equipment or user. Label group access control corresponding to user levels is also possible.



*1: The engineering software GX Works2 Version 1.44 W or later is required when the global labels of GX Works2 project are imported to the Configuration Tool of this module.

Ethernet and CC-Link IE Field related products

● Wireless LAN adapter Ethernet

NZ2WL-US (U.S.A)*1*2, NZ2WL-EU (Europe)*1*2, NZ2WL-CN (China)*1*2, NZ2WL-KR (Korea)*1*2, NZ2WL-TW (Taiwan)*1*2

» Wireless LAN (Ethernet) in the factory provides flexibility in installing new line or alteration layouts. Wireless saves your wiring costs.
» Simply installing wireless LAN adapters makes existing FA equipment wireless.
» Compatible with the latest security standards of WPA2/WPA.
» The security prevents unauthorized access from outside.

*1: Each product can be used only in the respective countries.
*2: Supported both Access point and Station. They can be used by changing the setting.

The wireless LAN adapters were developed and are produced with CONTEC Co., ltd.
Please note that the general specifications and guarantee conditions of these products are different from those of programmable controllers (such as MELSEC Series) and CONTEC products.
Refer to the manual for details on the product.

● Industrial switching HUB CC-Link IE Field Ethernet

NZ2EHG-T8, NZ2EHF-T8*3

» NZ2EHG-T8 is compatible with transmission rates of 10 Mbps, 100 Mbps, and 1 Gbps.
» NZ2EHF-T8 is compatible with transmission rates of 10 Mbps and 100 Mbps.
» These switching hubs comply with IEEE802.3ab (1000BASE-T), IEEE802.3u (100BASE-TX), IEEE802.3 (10BASE-T) standards.
» AutoMDI/MDI-X and auto-negotiation are available.
» The automatic power adjustment function can reduce power consumption by up to 80 percent.*4
» These hubs do not use cooling fans, and yet a wide ambient-temperature operating range is permissible (0 to 50°C).
» Quick detach mechanism allows easy DIN rail attachment and detachment.

*3: This model may not be connected directly to the CC-Link IE Field Network (1 Gbps). An Ethernet adapter module NZ2GF-ETB is required. For direct use with the CC-Link IE Field Network, please use NZ2EHG-T8.
*4: For comparison, power consumption was measured when all 8 ports were used and when none of them were used. This function is only available for NZ2EHG-T8.

This series was developed and is produced with Contec Co. Ltd. Please note that the specifications and guarantee conditions of these products are different from those of MELSEC products.
Please refer to the product manual for details.

1 Gbps 100 Mbps

● CC-Link IE Field Network Ethernet adapter module CC-Link IE Field Ethernet

NZ2GF-ETB

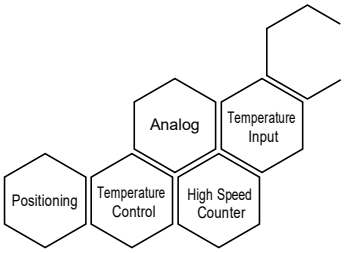
» Using Seamless Message Protocol (SLMP*5), a variety of Ethernet devices such as vision sensors and RFID controllers can be connected to the CC-Link IE Field Network.
» Use a web browser to set station numbers, Ethernet options, and view error history.
» This Ethernet adapter module is compatible with transmission rates of 100 Mbps and 1 Gbps.

*5: SLMP (SeamLess Message Protocol) is a protocol advocated by the CC-Link Partner Association.

Module Lineup

Comprehensive range of I/O and intelligent function modules.

The Q Series I/O and intelligent function module lineup is extensive and capable of meeting the needs of a wide range of applications. Some of the available modules include motion control, serial communication, temperature control, temperature input, standard digital and analog I/O modules, and channel isolated analog modules. Attain the ideal solution for the application, whether it be high speed positioning or high accuracy temperature control.



Input/Interrupt modules

Point	DC input					DC/AC input	AC input	
	5 V DC		5/12 V DC	24 V DC		48 V DC/AC	100…120 V AC	100…240 V AC

64 points	—	—	—	—	—	QY42P	QY82P

*2: Output specifications for I/O combined modules

- **High speed DC input module (positive common type) ……QX40H, QX70H**
- **High speed DC input module (negative common type) ……QX80H, QX90H**

Speed up control by catching the input signal variation at 0 ms*3. Two devices with differing power systems can be connected to the same module using different 8 point common terminals.

*3: The actual response time is 5 µs delay when turning ON, 10 µs delay when turning OFF, because the hardware response time is added.

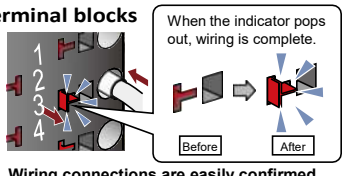
Common type	Input voltage	
	24 V DC	5 V DC
Positive	QX40H	QX70H
Negative	QX80H	QX90H

- **Spring clamp terminal block type input module ……QX10-TS, QX40-TS, QX80-TS**
- **Spring clamp terminal block type output module ……QY10-TS, QY40P-TS, QY80-TS**

Spring clamp terminal blocks visually indicate the connection status. Also, by eliminating screws, wiring and maintenance work is made easier.

Advantages of spring clamp terminal blocks

- Impervious to vibration, secured wiring connections.
- Eliminating screws greatly simplifies conventional maintenance.



Wiring connections are easily confirmed by high-contrast indicators.

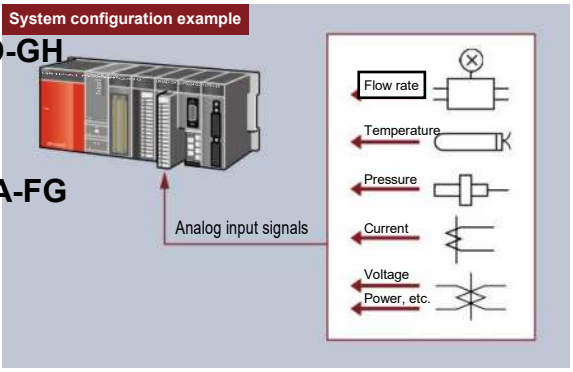
A wide range of application specific intelligent modules

A range of analog modules ideal for process control applications.

Isolated analog modules suitable for process control

- Channel isolated high resolution analog-digital converter module ····· Q64AD-GH
- Channel isolated high resolution analog-digital converter module (with signal conditioning function)····· Q62AD-DGH
- Channel isolated high resolution digital-analog converter module ····· Q62DA-FG
- Channel isolated analog-digital converter module···· Q68AD-G
- Channel isolated analog-digital converter module (with signal conditioning function)····· Q66AD-DG
- Channel isolated digital-analog converter module····· Q66DA-G

System configuration example



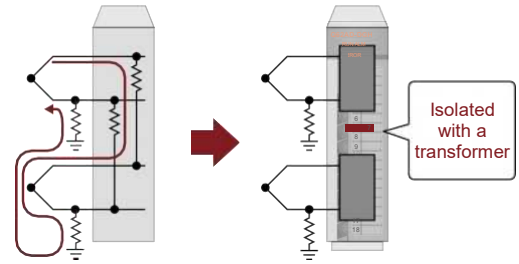
The channel isolated analog modules are specifically designed for process control applications by offering high accuracy conversion combined with high isolation voltage. Flow meters, pressure gauges, etc. can be directly connected to the analog input, and control valves to the analog output. Hardware and installation costs can be substantially reduced because external isolation amplifiers are not required. When used with a general purpose controller, a low cost process control solution can be created.

High dielectric withstand voltage

■ Electric disturbances such as current and noise can be isolated.

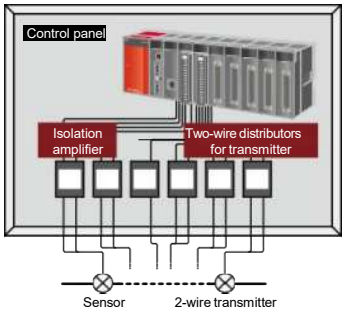
• Standard analog input module

• Isolated analog input module

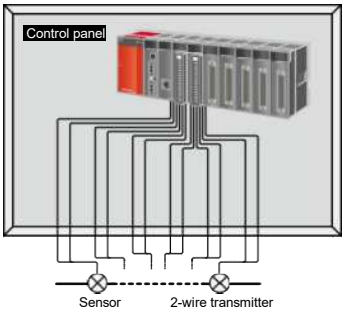


■ External signal converters are not required.

• Without channel isolated analog module



• With channel isolated analog module

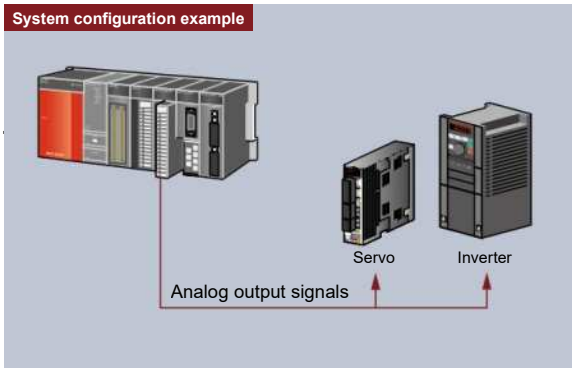


High conversion speed analog modules

- High speed analog-digital converter module····· Q64ADH
- Analog-digital converter module·····Q68ADV, Q68ADI
- High speed digital-analog converter module····· Q64DAH
- Digital-analog converter module ····· Q62DAN, Q64DAN, Q68DAVN, Q68DAIN
- Analog-digital/Digital-analog converter module···· Q64AD2DA

Many high-speed A/D and D/A conversion (analog) modules are available. These modules are feature packed to allow maximum flexibility when connecting to devices. Both speed and accuracy are great enough to control sensitive motion applications using servos or inverters.

System configuration example



High accuracy temperature input modules

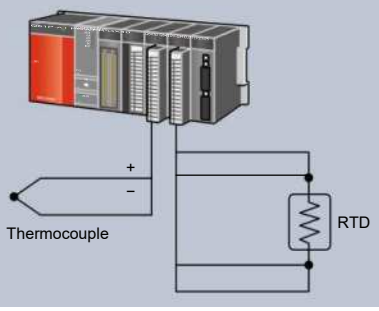
● **Temperature input module**

Thermocouple input module····· **Q64TD, Q64TDV-GH, Q68TD-G-H01, Q68TD-G-H02**

RTD input module····· **Q64RD, Q64RD-G, Q68RD3-G**

Temperature data can be captured by connecting a thermocouple or a resistance temperature detector. Multi-channel (8-channel) input types and channel-isolated types are available. An optimum model for the intended application can be selected.

System configuration example



PID loop control integrated temperature control modules

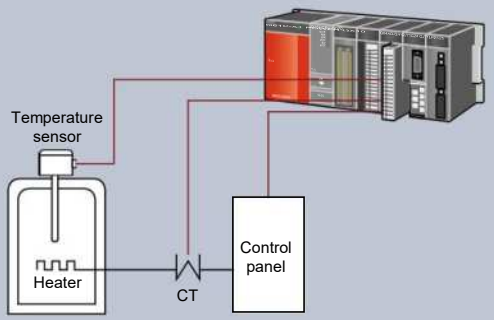
● **Temperature control module**

Thermocouple input module····· **Q64TCTTN, Q64TCTTBWN**

Platinum RTD input module····· **Q64TCRTN, Q64TCRTBWN**

The devices which require high stability of temperature control such as extrusion forming machines, these modules prevent overheating and overcooling. The standard control (heating or cooling) or heating-cooling control (heating and cooling) mode can be selected depending on the machine to be controlled.
In addition, the mixed control mode (combination of standard control and heating-cooling control) can be selected.

System configuration example



- **Peak current suppression function**
  This function avoids simultaneously turning on outputs to control the peak current. It can save energy and reduce the running cost.
- **Simultaneous temperature rise function**
  This function allows several loops to reach the set value at the same time to conduct uniform temperature control.
  It prevents idling and is effective in saving energy and reducing running cost.
- **Self-tuning function**
  The PID constant is automatically adjusted during control.
  The automatic tuning cost (time, materials and power) can be reduced.

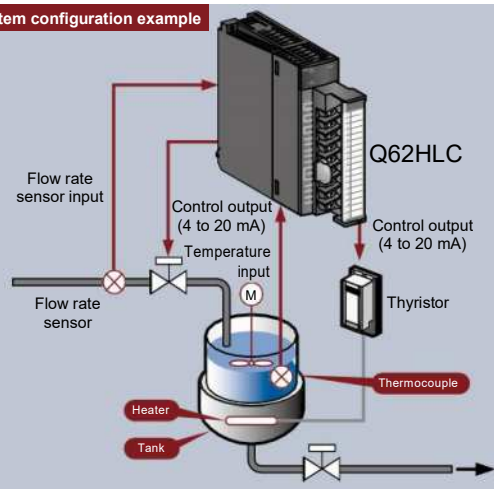
Loop control module ideal for temperature and flow rate control environments which require fast response

● **Loop control module**····· **Q62HLC**

With its speed-proportional PID control format and 25 ms sampling cycle, the loop control module is well suited for high-precision, high-resolution thermocouple inputs, micro voltage inputs, voltage inputs, current inputs, and current outputs. It is also ideal for sudden temperature change control, pressure control, and flow control applications which require fast response.

- Connectable to JIS, IEC, NBS, ASTM standards compliant thermocouples.
- Permits analog value measurements of various input ranges by using micro voltage, voltage, and current input sensors.
- Offers program control while automatically changing the target values (SV) and PID constants [proportional band (P), integral time (I), derivative time (D)] in a time-specific manner, as well as a cascade control function that permits control with CH 1 as the master, and CH 2 as the slave.

System configuration example



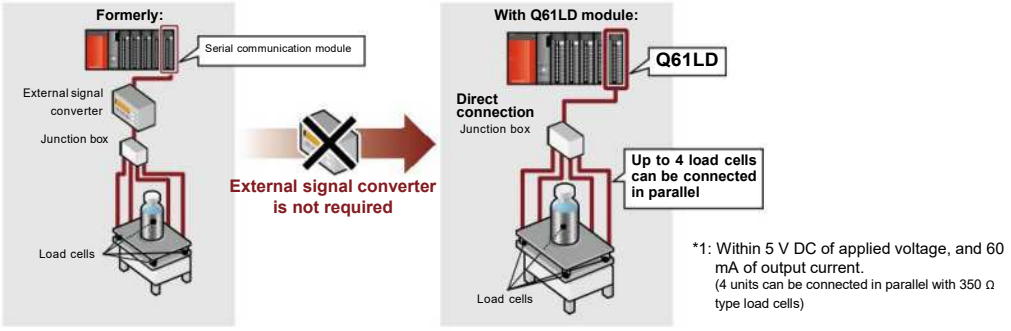
Interface with all types of load cell with the load cell I/P module

● **Load cell input module**·····**Q61LD**

Load cells can now be directly connected to the programmable controller system without requiring an external signal converter.
The module achieves highly accurate measurement with steady data conversion speed that guarantees the accuracy of load cells.

Separate signal converter not required!
Reduce engineering costs by directly connecting a load cell to the programmable controller!

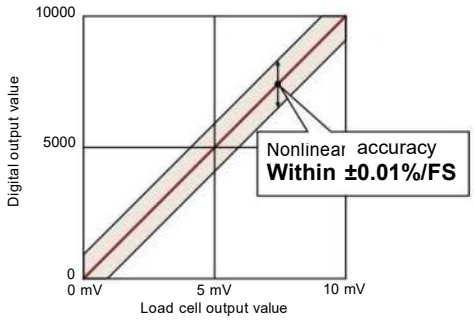
● Any type of load cell*1 such as magnetostriction, capacitive, gyroscope, or strain gauge.
● 6-wire system (combination of remote sensing and ratiometric methods) or 4-wire system load cells.



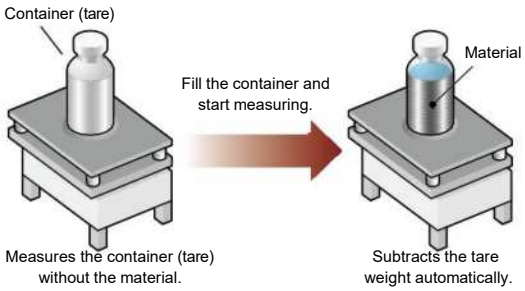
*1: Within 5 V DC of applied voltage, and 60 mA of output current.
(4 units can be connected in parallel with 350 Ω type load cells)

● Applications requiring high accuracy can be achieved by connecting the load cell directly to the programmable controller.

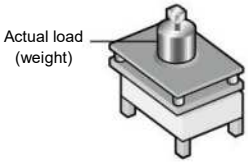
- Nonlinear accuracy: Within ±0.01%/FS
- Zero drift: Within ±0.25 μV/°C RTI
- Gain drift: Within ±15 ppm/°C
  (Load cell rated output is 2 mV/V, ambient temperature is 25°C, and the tare weight subtraction function is not used.)



Zero offset function
This function subtracts the tare weight automatically relative to the load cell usage range when calibrating measuring instruments.
Using this function can improve the accuracy of the measuring instrument.

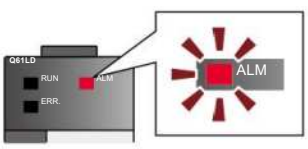


Static load calibration function
The gross weight value can be accurately calibrated by applying the actual load (weight) onto the load cell.



Input signal error detection function
Load cell input signal errors can be detected.

- Input signal error
- Weight capacity over error
- Zero point out of range
- Exceed conversion error



Direct CT sensor connection reduces wiring and saves space

● **CT input module** ····· **Q68CT**

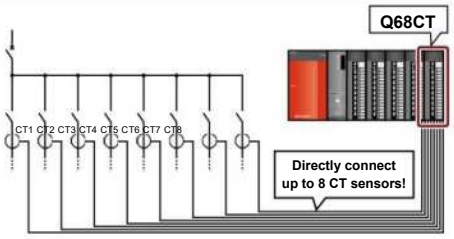
The direct connection of the CT sensor*1 and the programmable controller has eliminated the need to connect a separate signal converter. Very accurate measurements can be achieved with stable data conversion speed for load control of systems and devices, monitoring of operations, and control and monitoring of power systems.

*1: The CT (Current Transformer) sensor refers to an instrument transformer, a current sensor is essential for measuring alternating currents.

Direct CT sensor connection reduces wiring and saves space

● Directly connect to the CT sensor without an external signal converter. The AC current for up to eight channels can be measured with one unit, by that reducing the wiring steps and costs.

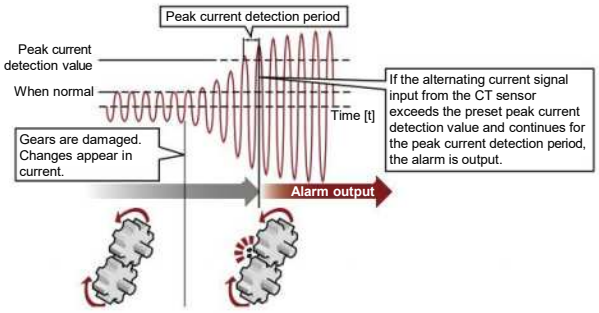
● Set the CT sensor type (input range) for each channel. CT sensors with 0 to 5 A AC or 0 to 600 A AC can be used by one unit.



Predictive maintenance of devices by detecting the peak current!

Peak current detection function

● The device can be serviced and troubleshooting performed by detecting the peak current.
With a motor for example, the load applied on the motor is changed by the gear wear and damage, and the load current suddenly changes. The device trouble can be diagnosed by detecting the transient peak current at this time.



Input signal error detection function

● Over-range (peak value over) of the CT input value can be detected. Since the flow of a large current exceeding the range of the measurement target can be detected, errors in the measurement target can be monitored.

Input range setting	Detection level
0…5 A (AC)	Approximately 6.25 A (AC)
0…50 A (AC)	Approximately 62.5 A (AC)
0…100 A (AC)	Approximately 125 A (AC)
0…200 A (AC)	Approximately 250 A (AC)
0…400 A (AC)	Approximately 500 A (AC)
0…600 A (AC)	Approximately 750 A (AC)

Simple motion module for positioning control and synchronous control.

Advanced control but simple use as the positioning module

Speed/torque control and synchronous control are supported in addition to the traditional positioning control. Using the “simple motion module setting tool”, operations such as positioning setting, monitoring and debugging can be performed easily. In addition, collection of data synchronized with the motion controller can be collected and displayed in waveform.

● Simple motion module

SSCNET #/H connection type ····· QD77MS

The in the above model indicates the number of axes (2, 4,

The SSCNET #/H connection reduces wiring, enables connections of up to 100 m between stations, and easily supports absolute position settings. The upper limit LS, lower limit LS, and near-point dog signals can be input from the servo amplifier, thus greatly reducing wiring. In addition to positioning control and speed control, processes such as synchronous control, cam control, torque control and tightening & press-fit control can be performed.
High compatibility with conventional models, projects and sequence programs for the positioning module (QD75MH) can be used easily in the simple motion module (QD77MS) projects.

System configuration example

		QD77MS2	QD77MS4	QD77MS16
Maximum number of control axes		2-axes	4-axes	16-axes
Servo amplifier connection method		SSCNET #/H		
Maximum distance between stations		100 m		
Control system		PTP (Point to Point) control, path control (both linear and arc can be set), speed control, speed/position switching control, position/speed switching control, synchronous control, cam control, torque control, tightening & press-fit control		
Starting time	1-axis linear control	0.88 ms	0.88 ms	1.77 ms

	3-axes linear interpolation control	—		
	3-axes speed control			
	4-axes linear interpolation control			
	4-axes speed control			

CC-Link IE Field Network connection type ····· QD77GF16

The simple motion module supports the general purpose CC-Link IE Field Network, with its flexible wiring. This module can be used as the CC-Link IE Field’s master station (QJ71GF11-T2 or equivalent)*1 while retaining the simple motion module’s functions. This realizes flexible networking supporting connection to various devices such as HMI (GOT), remote I/O, inverter, etc.

*1: QD77GF16 master station transmission style can use the line type or star type. Up to 104 slave devices can be connected to one network.
*2: The setting and diagnosis function using GX Works2 is disabled.

System configuration example

		QD77GF16
Maximum number of control axes		16-axes
Servo amplifier connection method		CC-Link IE Field Network
Maximum distance between stations		100 m
Control system		PTP (Point to Point) control, path control (both linear and arc can be set), speed control, speed/position switching control, position/speed switching control, synchronous control, cam control
Starting time	1- axis linear control	
	1-axis speed control	
	2- axes linear interpolation control	
	2-axes circular interpolation control	
	2- axes speed control	
	3- axes linear interpolation control	
	3-axes speed control	
	4- axes linear interpolation control	
	4-axes speed control	

Operation cycle	Starting time
0.88 ms	1.77 ms
1.77 ms	3.55 ms
3.55 ms	7.11 ms

A large selection of motion control solutions are available to fit any motion application.

High-speed, accurate positioning control

Various types of motion control are supported including 2 to 4-axes linear interpolation, 2-axes circular interpolation, speed control, speed/position changeover, path control and constant speed control. Making settings (including positioning data), monitoring, and debugging is made much easier using GX Works2's built-in intelligent function module tools or the stand-alone tool, GX Configurator-QP. For servo control, Q Series leverages the benefits of SSCNET, a Mitsubishi high performance motion control network. This allows Mitsubishi intelligent digital servos to be connected by a simple daisy chain cable that reduces cost and increases performance.

● Positioning module

SSCNET # connection type ····· QD75MH

The in the above model indicates the number of axes (1, 2, 4)

Using SSCNET # optical cables minimizes the required wiring, permits distances of up to 50 m between stations, and is highly resistant to EMI/RFI. This format is also compatible with absolute position systems where the home position is established by a home position return data setting operation. Using the CN3 connection, limit switches and proximity DOG inputs can be made directly to the servo amplifier, greatly reducing the required wiring.

System configuration example

		QD75MH	QD75M
Servo amplifier connection method		SSCNET #	SSCNET
Max. distance between stations		50 m	30 m
Control system		PTP (Point To Point) control, path control (both linear and arc can be set), speed control, speed-position switching control, position-speed switching control	
Starting time*1	1-axis linear control	3.5 ms	6.0 ms
	1-axis speed control	3.5 ms	6.0 ms
	2-axes linear interpolation control	4.0 ms	7.0 ms
	2-axes circular interpolation control	4.0 ms	7.0 ms
	2-axes speed control	3.5 ms	6.0 ms
	3-axes linear interpolation control	4.0 ms	7.0 ms
	3-axes speed control	3.5 ms	6.0 ms
	4-axes linear interpolation control	4.0 ms	7.0 ms
	4-axes speed control	4.0 ms	7.0 ms

*1: Using the pre-reading start function, the actual starting time can be shortened.

● Positioning module

Open collector pulse train output type ····· QD75P N

Differential driver pulse train output type ····· QD75D N

The in the above model indicates the number of axes (1, 2, 4)

For compatibility with the widest range of motion hardware, both open collector and differential driver type positioning modules are available. Transmission of high-speed pulses, up to 4 Mpps, to a servo amplifier can be made reliably up to 10 meters away. These pulse train output positioning modules can provide a high level of speed and accuracy for practically any application.

		QD75P N	QD75D N
Pulse train output format		Open collector output	Differential drive output
Max. output pulse		200 kpps	4 Mpps
Max. connection distance to drive unit		2 m	10 m
Control system		PTP (Point To Point) control, path control (both linear and arc can be set), speed control, speed-position switching control, position-speed switching control	
Starting time*2	1-axis linear control	1.5 ms	
	1-axis speed control	1.5 ms	
	2-axes linear interpolation control	1.5 ms	
	2-axes circular interpolation control	2.0 ms	
	2-axes speed control	1.5 ms	
	3-axes linear interpolation control	1.7 ms	
	3-axes speed control	1.7 ms	
	4-axes linear interpolation control	1.8 ms	
	4-axes speed control	1.8 ms	

*2: Using the pre-reading start function, the actual starting time can be shortened.

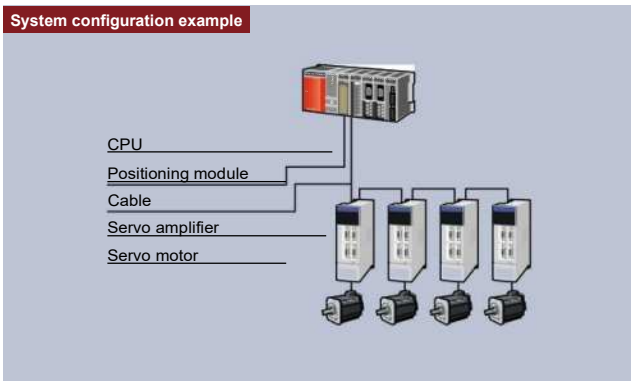
● Positioning module

SSCNET connection type ····· QD75M

The in the above model indicates the number of axes (1, 2, 4).

Connections made using SSCNET greatly reduce the required wiring compared to traditional systems. Not only can servo amplifiers be daisy chained together, but motion control input signals like proximity DOG, etc. can be wired directly to the servo amplifier. Absolute position system implementation is fully supported, and zero point return (OPR) may be executed using a data set.

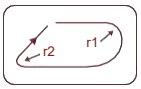
System configuration example

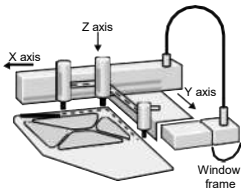


Application example ▸ **Sealing**

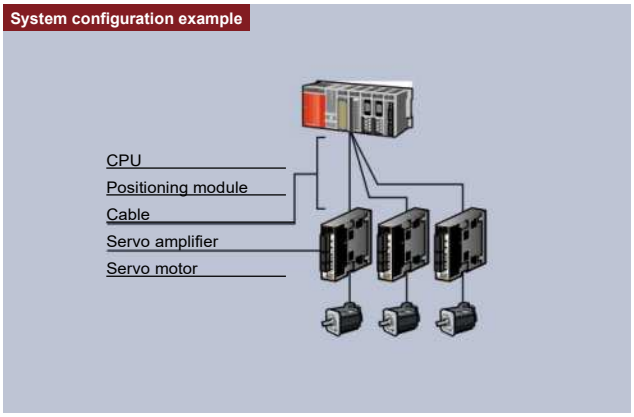
Function

- Constant speed pass control
- Linear, circular interpolation
- High-speed, high-accuracy pass control





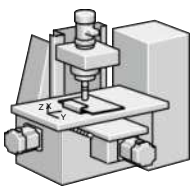
System configuration example



Application example ▸ **X-Y table control**

Function

- 2-axes linear interpolation
- 3-axes linear interpolation
- 2-axes circular interpolation
- Constant speed pass control



The ideal solution for simple multi-axis positioning

These modules are ideal for high-speed linear positioning control in a multi-axis system. Easily satisfying the requirements for simple positioning control applications, these modules include functions, such as positioning control, speed control and variable positioning control.

● Positioning module

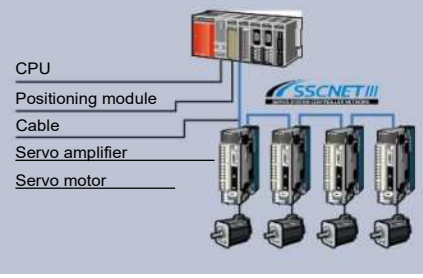
SSCNET # connection type QD74MH

The in the above model indicates the number of axes (8, 1

Control up to 16-axes with a single module. The long list of functions includes positioning to an arbitrary position, incremental feed control, location control, a high-speed operating cycle, SSCNET # connectivity, electronic gears, backlash compensation, absolute position system, and linear interpolation of up to 4-axes.

		QD74MH
Servo amplifier connection method		SSCNET #
Max. distance between stations		50 m
Control system		PTP (Point To Point) control, path control (linear only)
Starting time	1-axis linear control	0.88 ms
	2-axes linear interpolation control	
	3-axes linear interpolation control	
	4-axes linear interpolation control	

System configuration example



● Positioning module

Open collector pulse train output type QD70P

Differential driver pulse train output type QD70D

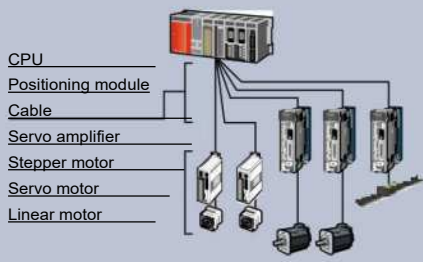
The in the above model indicates the number of axes (4,

These modules are a great match for stepper motor control. Acceleration and deceleration can be performed smoothly with very fine changes in speed. "Fast start processing" is a basic feature that allows for a single axis positioning start time of just 0.1 ms.

		QD70P	QD70D
Pulse train output format		Open collector output	Differential drive output
Max. output pulse		200 kpps	4 Mpps
Max. connection distance to drive unit		2 m	10 m
Control system		PTP (Point To Point) control, path control (linear only), speed-position switching control	
Starting time	1-axis start	0.1 ms	
	4-axes simultaneous start*1	0.2 ms	
	8-axes simultaneous start*1	0.4 ms	

*1: When START signal switches ON within 1 scan. There are no start delays between axes.

System configuration example



Positioning control using encoder feedback ideal for conveyor systems and processing machines

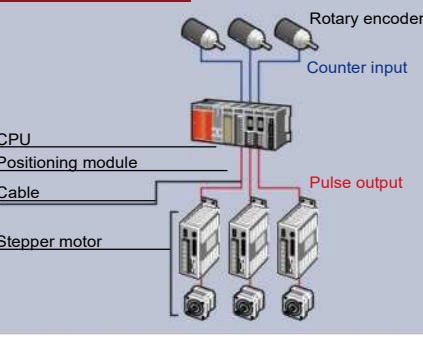
● Positioning module with built-in counter function

Open collector pulse train output type QD72P3C3

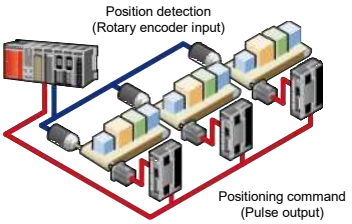
This module combines counter inputs and pulse outputs for 3-axes in a single module to save space and reduce cost. Several useful functions such as 3-axes simultaneous start, target speed change, and coincidence detection are available.

			QD72P3C3
Positioning control	Number of axes		3-axes
	Pulse train output format		Open collector output
	Max. output pulse		100 kpps
	Control system		PTP (Point To Point) control, speed control
	Start time	1-axis start	1 ms
		3-axes simultaneous start	1 ms
Counter function	Number of channels		3 channels
	Count input signal	Phase	1-phase input, 2-phase input
		Signal level	18 mA at 5 V DC, 2…6 mA at 24 V DC
		Pulse input	1 multiple of 2 phases, 2 multiple of 2 phases, 4 multiple of 2 phases, CW/CCW
	Counting speed (max.)		100 kpps

System configuration example



Application example Conveyor position control



A selection of high-speed pulse counter modules for accuracy intensive, high resolution control applications is available.

Pulse input modules capable of high-speed counting

● **High-speed counter module**

Standard type·····**QD62, QD62E, QD62D**
Multi-channel high-speed counter module····· **QD63P6**
4 Mpps compatible high-speed counter module·····**QD64D2**
Multi-function counter/timer module····· **QD65PD2**

Inputs may be connected to a variety of devices for positioning control, precision measurement, etc. The maximum counting speed may be adjusted via parameter (excluding QD64D2) for more reliable counting at lower frequencies.

» External coincidence output (QD64D2 includes 2 per channel): Select coincidence output, continuous comparison (QD64D2 only), or the coincidence detection interrupt function for flexible high-speed external device control.
» Many functions are available to satisfy application requirements including the coincidence output test function (QD64D2 only), latch counter function (excluding QD63P6), and preset function.
» Calculate pulses at speeds up to 8 Mpps (4 multiples of 2 phases). Perform precise position tracking using a high-resolution encoder for demanding applications such as semiconductor and LCD manufacturing. (QD65PD2)

System configuration example

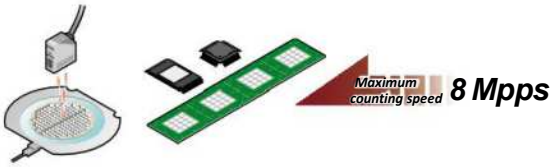
Multi-function counter/timer module (QD65PD2)

• **Perform extremely accurate position tracking!**
Counting speed up to 8 Mpps (4 multiples of 2 phases)



• **Multiple functions designed for ease of use!**

Pulse measurement function
With a resolution of 100 ns, it is possible to perform highly accurate pulse measurement.

PWM output function
Precisely control PWM output up to 200 kHz. With a resolution of 0.1 µs, superfine control of the duty cycle is possible.

Cam switch function
Configure up to 16 cam settings and use up to 8 dedicated outputs. The cam switch function enables highly accurate timing control.

• **Perform sophisticated control using coincidence detection!**
The coincidence output function allows complex applications to be supported. Depending on the situation, either the cam switch function or the coincidence output function can be used.

● **Channel isolated pulse input module**····· **QD60P8-G**

This module is appropriate for the measurement of input pulse counts (related to speed, revolution, instantaneous flow rate, etc.) and the measurement of quantities (length, cumulative flow, and so forth). The QD60P8-G operates on a 10 ms control cycle, thus the minimum value refresh time is 10 ms. The count cycle setting can be changed to the desired time for cumulative count values and moving average pulse counts (sampling pulse counts).

		QD60P8-G
Number of channels		8 channels
Count input signal	Phase	1-phase input
	Signal level	5 V DC/12…24 V DC, ≥ 4 mA
	Pulse input	1-phase pulse input
Counting speed (max.)		30 k/10 k/1 k/100/50/10/1/0.1 pps

Power measurement units for easily measuring various energy information

Rack installation type energy measuring module

- Energy measuring module ····· QE81WH
- Energy measuring module (multi-circuit) ····· QE84WH
- Energy measuring module (three-phase 4-wire product) ····· QE81WH4W
- Energy measuring module (multi-circuit, three-phase 4-wire product) ·· QE83WH4W

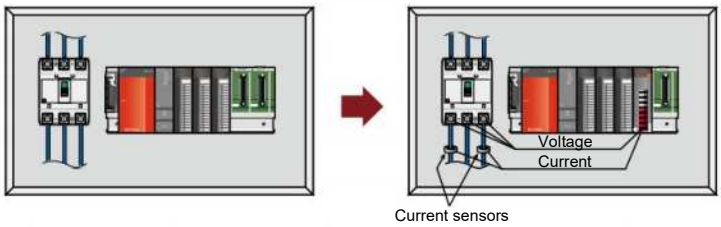
Using only one module, highly detailed information about electric energy (consumption and regeneration), reactive energy, current, voltage, electric power, power factor, and frequency can be measured. Minimum and maximum values are constantly monitored and 2 types of upper/lower limit warnings can be implemented without any programming. The amount of electric power used by output devices only while ON can be measured.
The power rate during device operation and the power rate in takt units can be retrieved. The multi-circuit product allows power to be measured in a smaller space as up to four circuits can be measured with a three-phase 3-wire product in one slot, and up to three circuits with a three-phase 4-wire product. For example, one unit can be used to measure other loads from the control panel trunk.
In addition, the parameters can be set easily with GX Works2 (Version 1.91 V and higher).

Model		QE81WH	QE84WH*1	QE81WH4W	QE83WH4W*1
Phase wire system		Single-phase 2-wire/single-phase 3-wire/three-phase 3-wire		Three-phase 4-wire*2	
Instrument rating	Voltage circuit	110 V AC, 220 V AC common (single-phase 2-wire, three-phase 3-wire)		63.5/110 V AC…277/480 V AC	
		110 V AC (1 - 2 line, 2 - 3 line) 220 V AC (1 - 3 line) (single-phase 3-wire)			
		Using two-stage configuration in combination with commercially-available voltage transformer (VT). Primary voltage value can be set up to 6,600 V.			
	Current circuit	50, 100, 250, 400, 600 A AC (Using dedicated split type current sensor. Each value indicates current sensor's primary current value.)			
		5 A AC (Using dedicated 5 A current sensor. 5 A current sensor is used with two-stage configuration in combination with current transformer (CT). Primary current value can be set up to 6,000 A.)			
	Frequency	50/60 Hz (frequency automatically judged)			
Number of measurement circuits		1 circuit	4 circuits	1 circuit	3 circuits
Measurement items		Power rate (consumption, regenerative), reactive power rate, period power rate, current, voltage, power, power factory, frequency		Power rate (consumption, regenerative), reactive power rate, period power rate, current, voltage, power, reactive power, apparent power rate, power factory, frequency	

*1: Current measurement mode is provided. Up to eight circuits can be measured when measuring only the current value.
*2: The separate voltage transformer (QE8WH4VT) is required for the three-phase 4-wire compatible products.

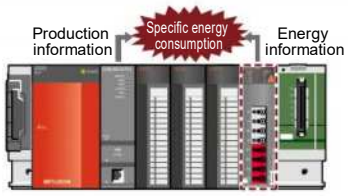
Minimal impact on control panel layout

- By installing the energy measuring module onto the open slot of the base unit, measuring instrument can be added without changing the layout in the control panel.



Allows for detailed power measurement at high speed (250 ms)

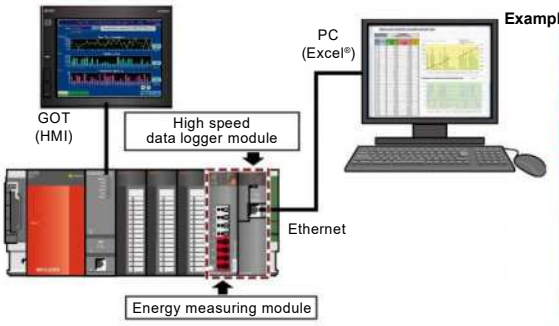
- Allows for easy specific energy consumption*3 management by matching the "production information" of the CPU module with the "energy information" of the energy measuring module.
- Since measured data is automatically collected in a buffer memory at 250 ms, detailed specific energy consumption management is also available.



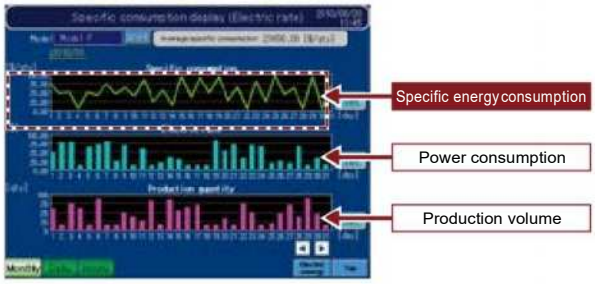
*3: The specific energy consumption is a numerical value displayed by "dividing energy consumption by production volume," which is one type of index that measures energy productivity. Improving this number leads to improved productivity and energy conservation.

Allows for easy construction of a "visualization" system

- Allows for easy graphic display of specific energy consumption with a GOT (HMI) installed on the control panel at the manufacturing site.
- Combination with the "high-speed data logger module (QD81DL96)" allows specific energy consumption analysis to be easily performed with a personal computer.



Example of graphic display of specific energy consumption with GOT (HMI).



Insulation monitoring module measuring leakage current

● **Insulation monitoring module**····· **QE82LG**

Leakage current can be measured for safety measures. Risks of electric shock are detected by monitoring leakage current (Io).
The isolated state of equipment can be constantly monitored.
The resistive leakage current (Ior) is measured to constantly monitor the deterioration of equipment insulation.
Two-stage warning is provided for each measurement item. Two-stage warning for each of leakage current (Io) and resistive leakage current (Ior) can be issued via program-less communication. The two-stage warning function can be used to give a warning for calling for attention and a hazard warning.
One module can monitor two circuits. One module can monitor two circuits of power supplies of the same phase/wire type on the same system.
In addition, the parameters can be set easily with GX Works2 (Version 1.91V and higher).

Measurement items
Leakage current (Io) and resistive leakage current (Ior)

Model			Details
Phase/wire type			Common to single-phase 2-wire and single-phase 3-wire/three-phase 3-wire types
Instrument ratings	Voltage circuit*1*2	Single-phase 2-wire Three-phase 3-wire	Common to 110 V AC and 220 V AC
		Single-phase 3-wire	110 V AC (between wires 1 and 2, between wires 2 and 3), 220 V AC (between wires 1 and 3)
	Leakage current circuit		1 A AC (ZCT is used. Primary current of ZCT)
	Frequency		50/60 Hz (automatic discrimination of frequency)
Number of circuits which can be monitored			2 circuits*3

*1: The module can be connected directly to 110-V and 220-V power supplies. To connect to a 440-V power supply, an external voltage transformer (VT) is necessary. Leakage current cannot be measured if voltage input is not provided.
*2: Resistive leakage current (Ior) can be measured on single-phase 3-wire and three-phase 3-wire delta circuits. On special circuits, such as three-phase 3-wire star circuits, high-resistance grounding circuits and capacitor grounding circuits, only Io can be measured.
*3: Leakage current (Io, Ior) measurement on CH1 and CH2 can be performed only on circuits on the same system as the voltage input.

Early detection of insulation deterioration of production equipment

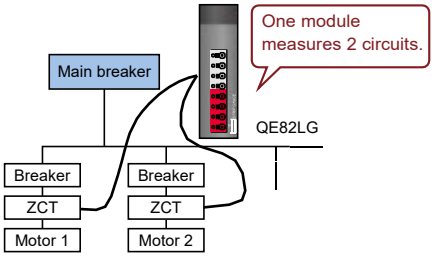
- The structure directly connected to programmable controller in the control panel saves space and facilitates measurement of leakage current in places close to loads.
- Failures caused by leakage (earth fault) and insulation of motor loads in production equipment can be monitored. Progression of insulation deterioration is not overlooked.
- The upper limit warning monitor can be set in two stages. Insulation deterioration and condition can be observed at an early stage, so that preventive measures can be taken before production equipment suddenly stops or goes down.

With conventional insulation monitoring device

The system causing leakage can be identified, but insulation deterioration cannot be located.

With this insulation monitoring module

The detailed monitoring of insulation enables to identify faulty units and locate insulation deterioration.

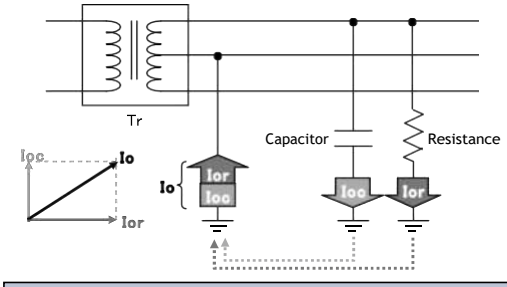


Ior method realizes constant monitoring of insulation deterioration of equipment

- With the conventional systems, such as inverter circuits with large capacitive leakage current (Ioc), it has difficulty for insulation monitoring.
  The module is capable of measuring resistive leakage current (Ior), and removes the capacitive leakage current then monitors the accurate leakage current caused by insulation deterioration.
- Resistive leakage current (Ior) is constantly measured even during operation of equipment. Signs of insulation deterioration can be detected without power interruption.

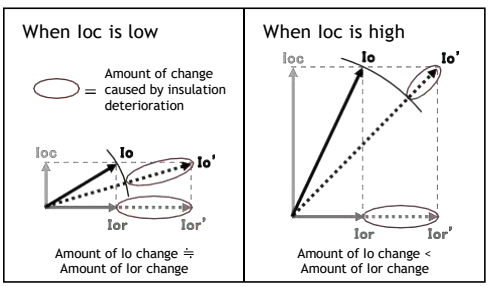
Leakage current (Io) is affected by capacitive leakage current (Ioc) of entire equipment.
Therefore, resistive leakage current (Ior) measurement is effective in diagnosis of insulation deterioration.

■ Method of measuring leakage current (Io measurement and Ior measurement)



Ior: Leakage current caused by insulation deterioration (resistive component in the leakage current)
Ioc: Leakage current (capacitive component of leakage current) flowing even if insulation is in good condition
Io: Leakage current obtained by synthesizing Ior and Ioc (vector synthesis)

- Capacitive leakage current (Ioc) fluctuates in equipment with long wiring or equipment with inverter devices and filters



Linking the sensor with the programmable controller

● **AnyWireASLINK master module** ····· **QJ51AW12AL** DB

The AnyWireASLINK master module links the sensor inputs and outputs to the programmable controller. The module enables flexible layout of sensors with 512 I/O points. The sensor power can be supplied to the AnyWireASLINK transmission line (2-wire) for communication, allowing sensors to be added easily. With the MELSEC-Q/L/F Series, faulty sensors can be detected and the slave module settings can be managed at once by GX Works2 engineering environment, further reducing the engineering time.

AnyWireASLINK

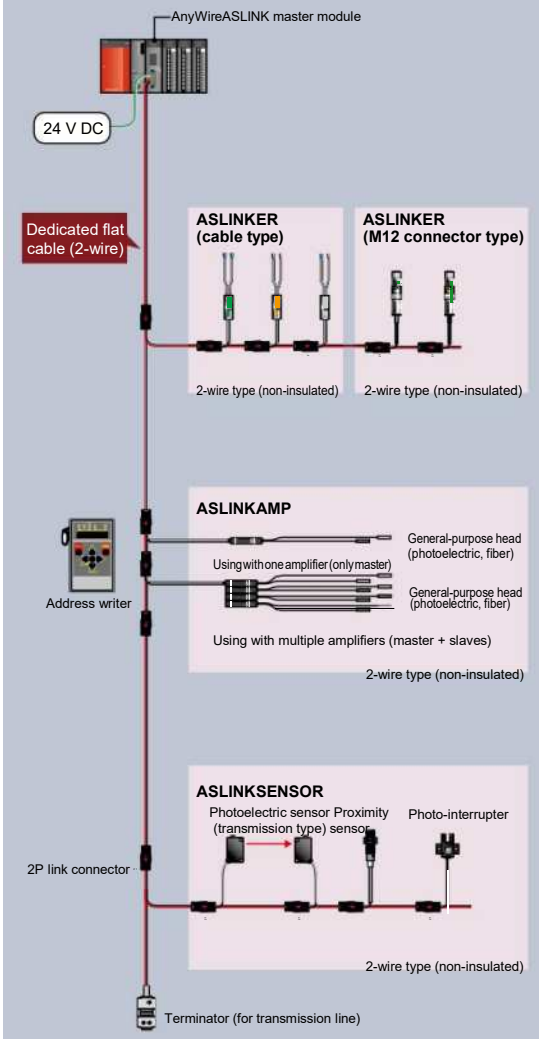
System configuration example

■ **Basic configuration**
Either the 2-wire type or 4-wire slave device can be selected according to the load current for AnyWireASLINK.
In addition to the 2-wire type, a 4-wire type can also be used by supplying the local power.

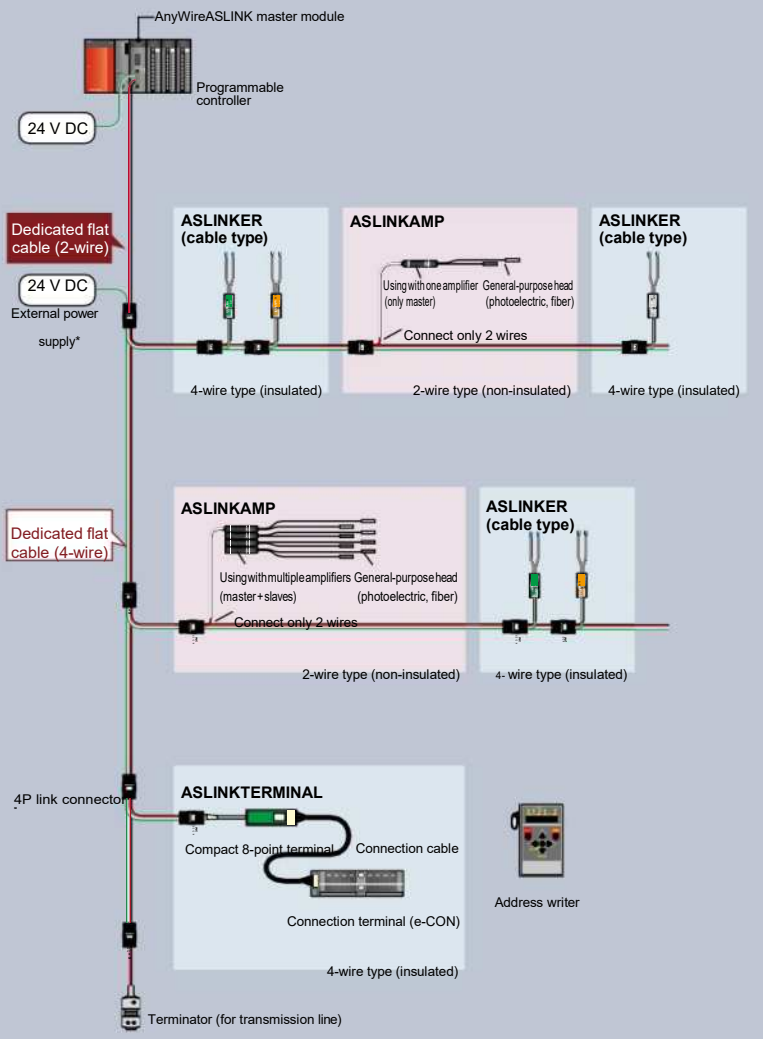
■ **2-wire type**
If the load current is low, 2-wire type (non-insulated) slave devices can be used without an external power supply.

■ **4-wire type**
The 4-wire type (insulated) slave devices require an external 24 V DC power supply to satisfy large load current applications, for example.

Configuration with 2-wire type (with no local power feed)



Configuration with 2-wire/4-wire type (with local power feed)



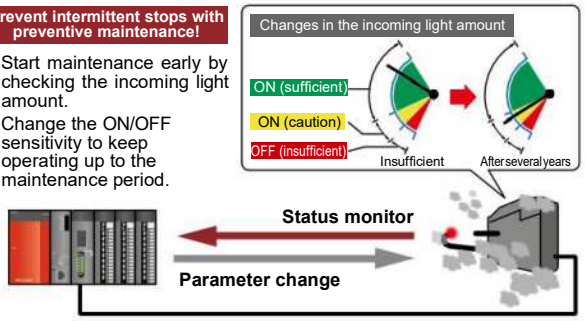
* External power for 4-wire type wiring.

Preventing intermittent operation stops

AnyWireASLINK can be used to monitor and save the sensor information within the programmable controller. Parameter settings of the AnyWireASLINK can also be changed via the programmable controller. Perform "preventive maintenance" with this function to prevent intermittent stops before they happen.

Prevent intermittent stops with preventive maintenance!

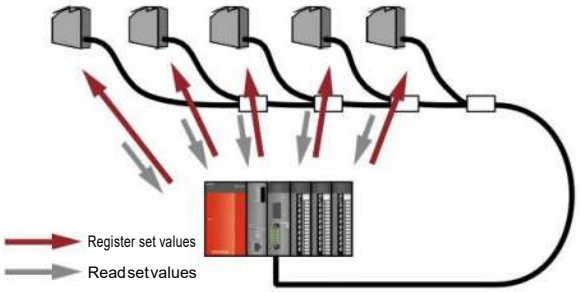
- Start maintenance early by checking the incoming light amount.
- Change the ON/OFF sensitivity to keep operating up to the maintenance period.



Reducing the setup time, and providing the traceability

AnyWireASLINK enables the set value to be registered at once to multiple sensors via a GOT (HMI) or personal computer. Also, the initial set values can be re-confirmed easily without having to read each sensor individually.

- Register set values to multiple sensors, and automatically read the initial set values.



Model	QJ51AW12AL
Number of connected I/O points	Max. 512 points (256 input points/256 output points)
Number of connected modules	Max. 128 modules (varies according to each slave module's current consumption)
Maximum transmission distance (overall length)*1	200 m*2
Transmission method	DC power superimposed total frame cyclic method
Connection style	Bus type (multi-drop method, T-branch method, tree branch method)
Transmission protocol	Dedicated protocol (AnyWireASLINK)
Error control	Checksum, double verification method
Transmission clock	27.0 kHz
RAS function	Transmission cable break position detection function, transmission cable short-circuit detection function, transmission power drop detection function
Transmission cable (DP, DN)	• UL compatible universal 2-wire cable (VCTF, VCT 1.25 mm², 0.75 mm², rated temperature 70°C or more) • UL compatible universal cable (1.25 mm², 0.75 mm², rated temperature 70°C or more) • Dedicated flat cable (1.25 mm², 0.75 mm², rated temperature 90°C)
Power cable (24 V, 0 V)*1	• UL compatible universal 2-wire cable (VCTF, VCT 0.75 mm²…2.0 mm², rated temperature 70°C or more) • UL compatible universal cable (0.75 mm²…2.0 mm², rated temperature 70°C or more) • Dedicated flat cable (1.25 mm², 0.75 mm², rated temperature 90°C)
Transmission cable supply current*1	Using 1.25 mm² cable: Max. 2 A Using 0.75 mm² cable: Max. 1 A
External power supply	Voltage: 21.6…27.6 V DC (24 V DC -10…+15%), ripple voltage 0.5 Vp-p or less Recommended voltage: 26.4 V DC (24 V DC +10%) Module current consumption: 0.1 A Transmission cable current supply: Max. 2 A*1

*1: Refer to the manual for the relation of the overall length, transmission cable (DP, DN) wire diameter and transmission cable current supply. In some slave modules with cables, the wire diameter of the transmission cable (DP, DN) integrated with the module may be 0.75 mm² or less.
*2: With the slave module having an integrated transmission cable (DP, DN) and module, the length of the transmission cable (DP, DN) is included in the overall length.

Software

MELSOFT integrated FA software increases productivity by combining tools for development, maintenance, and operation of Q Series systems

Automation has brought tremendous productivity benefits to industrial and commercial applications. By creating the MELSOFT integrated FA software family of products, Mitsubishi Electric is aiming to bring similar productivity benefits to system designers, automation engineers, operators, and maintenance personnel. MELSOFT engineering tools are undergoing continuous evolution in order to meet the demands of new technologies and applications.

Programmable Controller Engineering Software

GX Works2

GX Works2

GX Works2 focuses on driving down total cost by including features that speed up commissioning, reduce downtime, improve programming productivity, and provide strong security.

L(NA)08122E

For further details, please refer to the "MELSOFT GX Works2" catalog.

● User interface that is "easy to use" by design

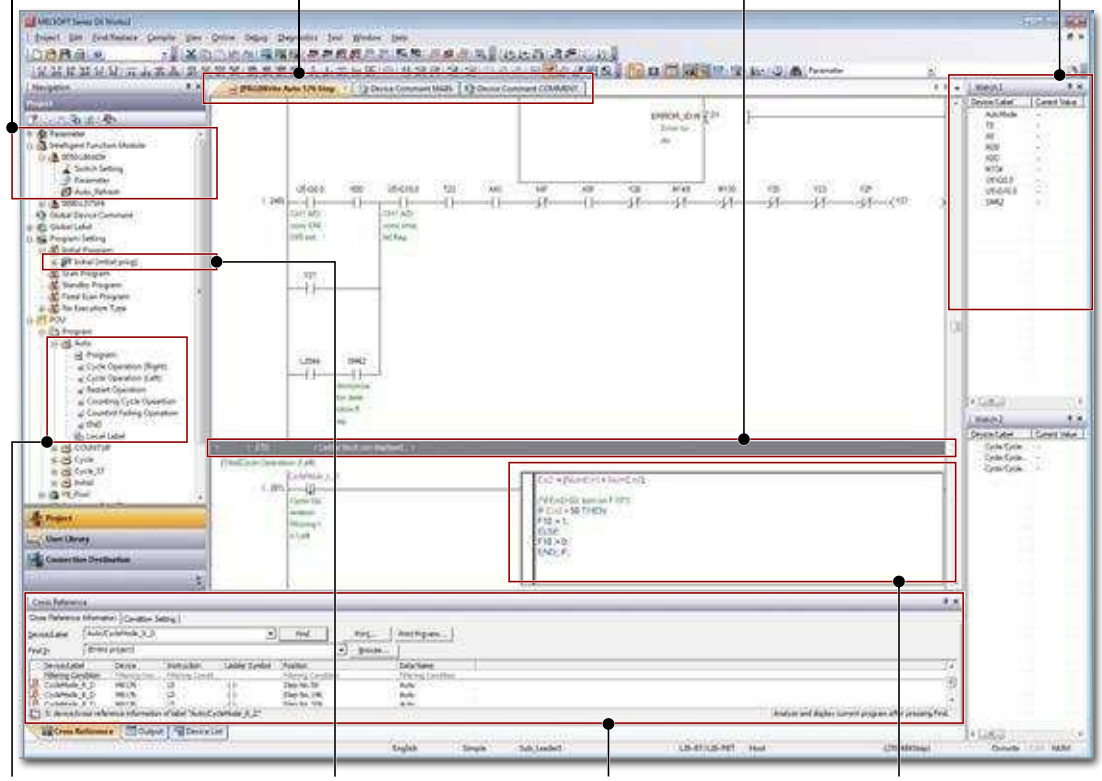
The programming tool GX Works2 has been developed from the ground up to be intuitive for all users and allow anyone to begin programming easily. The user interface and other functions provide a comfortable programming environment that enables improvements in design efficiency.

Fully integrated intelligent function module management tools

Use tabs to easily switch between programs, parameters, and other screens

Improve readability by hiding ladder rungs not relevant to the current operation

Use "Watch windows" to conveniently monitor pertinent values



Project tree gives compressive look at flow of information in program and structure

Program titles help to identify the content of each program

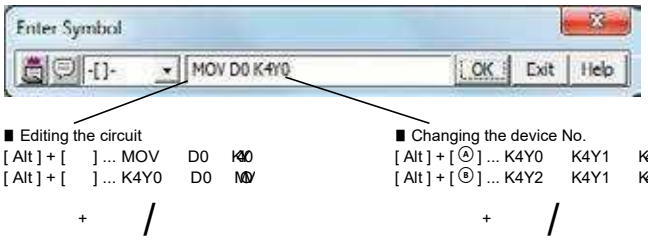
Cross reference devices and labels with ease

Use the Inline-ST*1 feature to quickly write complex expressions in ladder programs

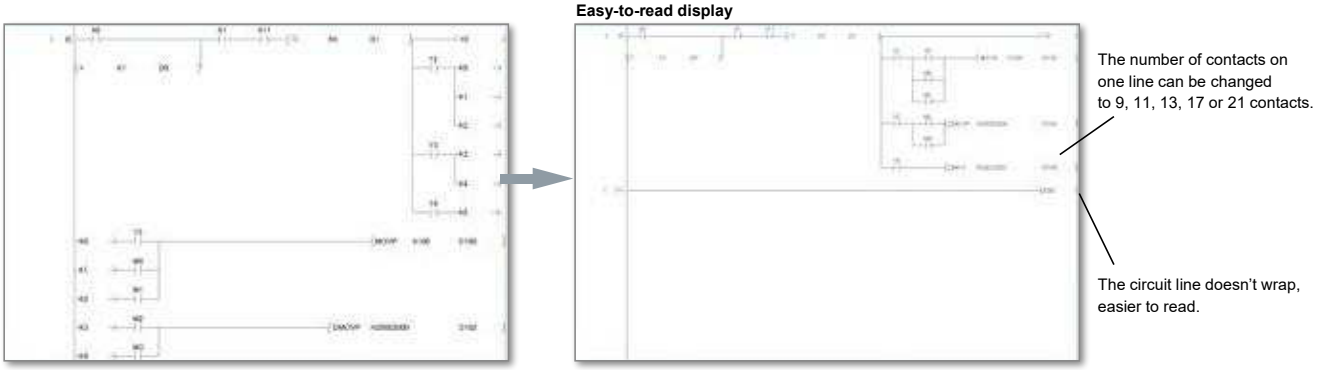
*1 In-line ST can be only be created in projects that use labels.

Easily create circuits with few key inputs

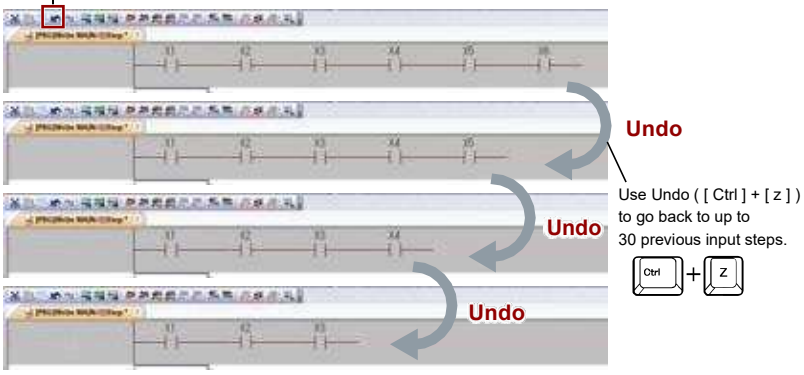
The program can be easily modified using the keyboard shortcut [Alt] + [ ] / [ ] or [Alt] + [ ] / [ ] keys.



Easy-to-read display



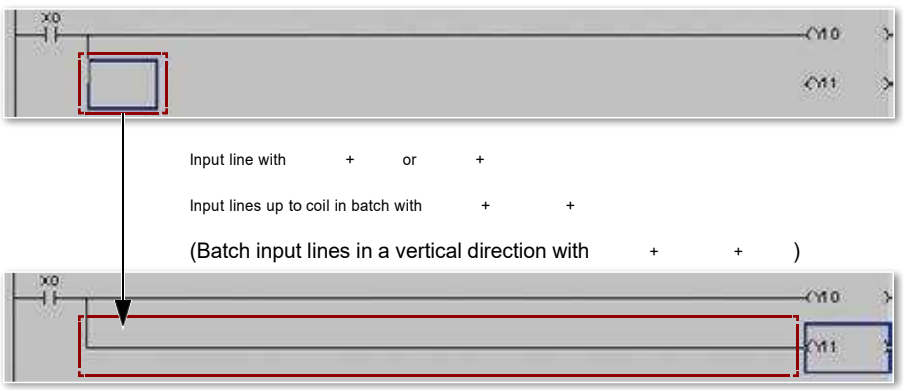
Click the Undo button.



The device number is automatically incremented when repeatedly pasting a cut/copied ladder rung.

Efficiently edit lines with keyboard

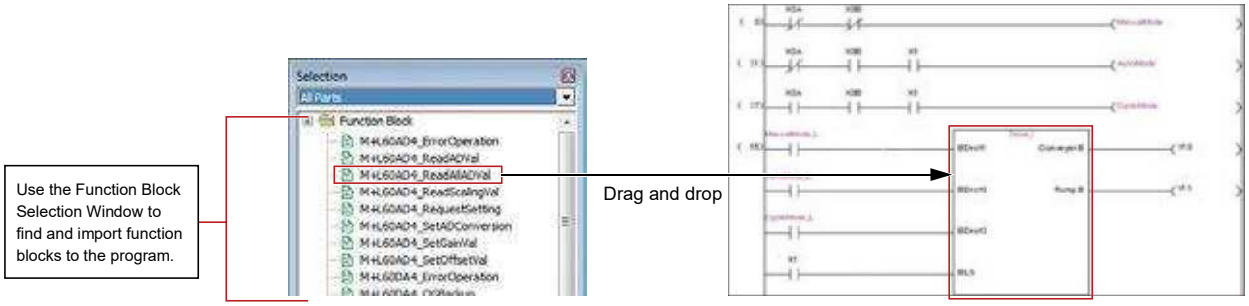
Ladder rungs can be easily modified just by using the various keyboard shortcut keys, eliminating the need to switch to editing mode.



■ How to input a line
Press [Ctrl] + [ ] or [Ctrl] + [ ] at an empty spot.
Press [Ctrl] + [ ] or [Ctrl] + [ ] on top of a line to delete it.

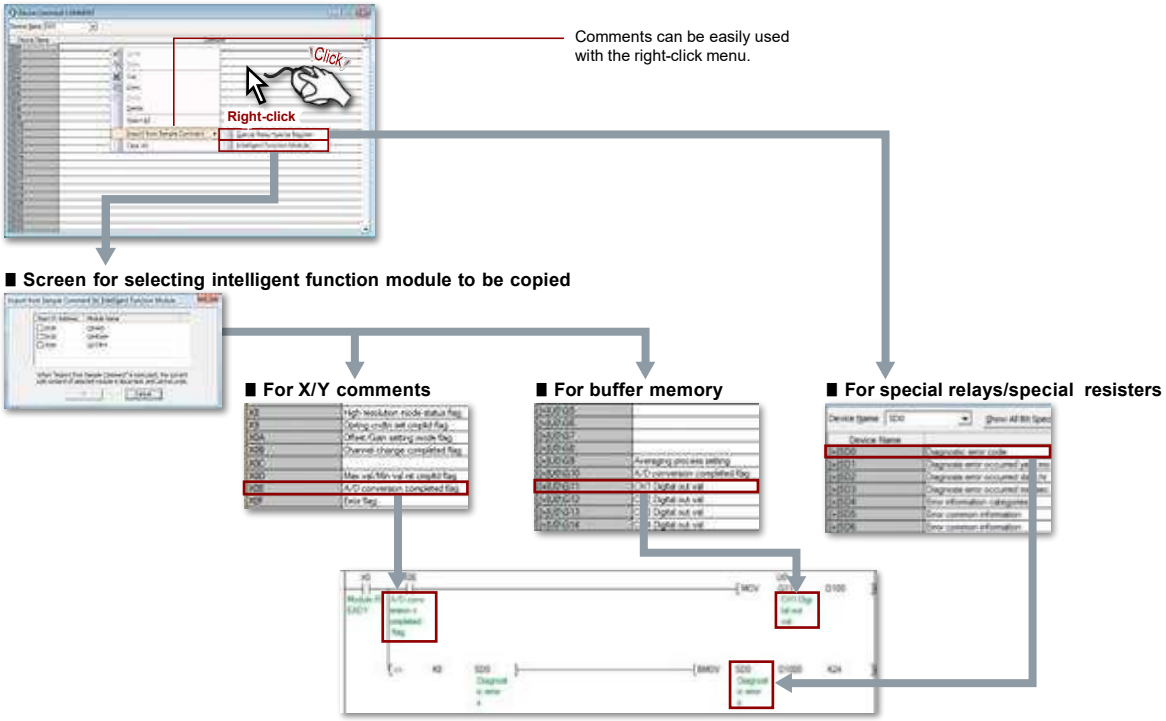
Use function blocks for common operations

Function blocks allow selections of commonly used code to be easily reused and shared among projects. Shared or created function blocks can be added to a program using simple drag and drop operation. Using function blocks effectively results in faster development times with fewer programming mistakes.



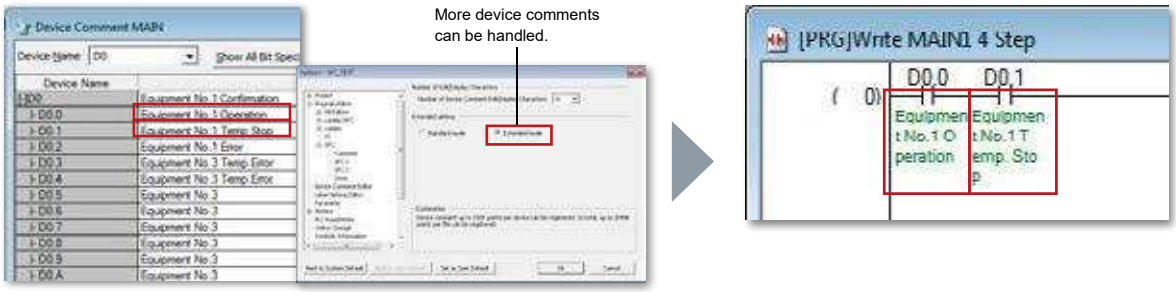
Use sample comments to eliminate the need to input comments

Sample comments are provided for the CPU's special relays/registers and the intelligent function module's buffer memory/XY signals. These can be copied into the project's comments thus greatly reducing the time required for entering device comments.



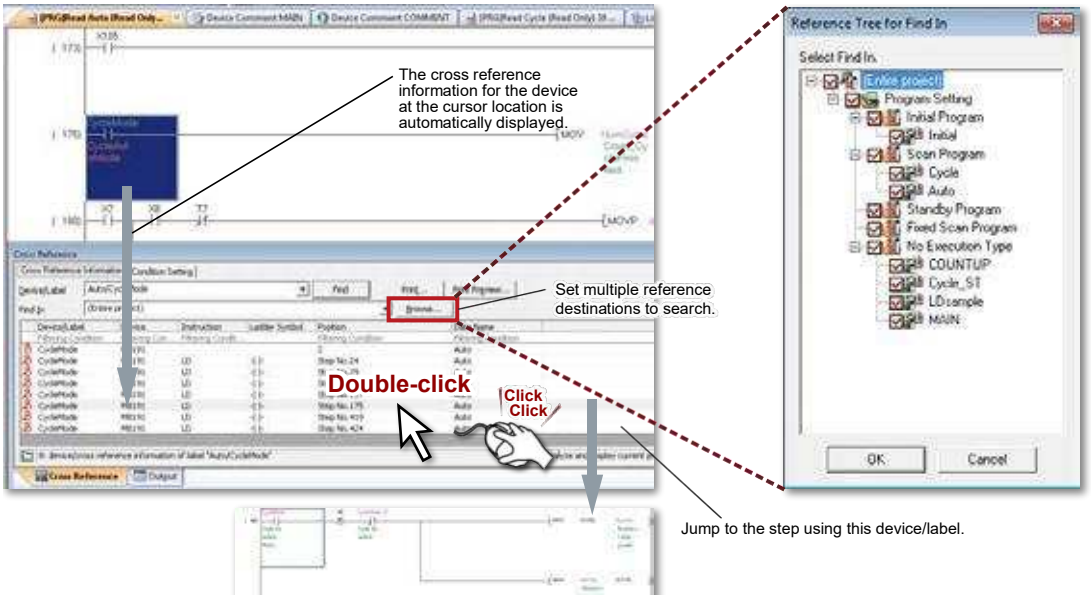
Quickly identify similar devices

Word device comments can be registered per bit with the contents displayed directly on the ladder rung.



Cross referencing interlinked with circuit displays

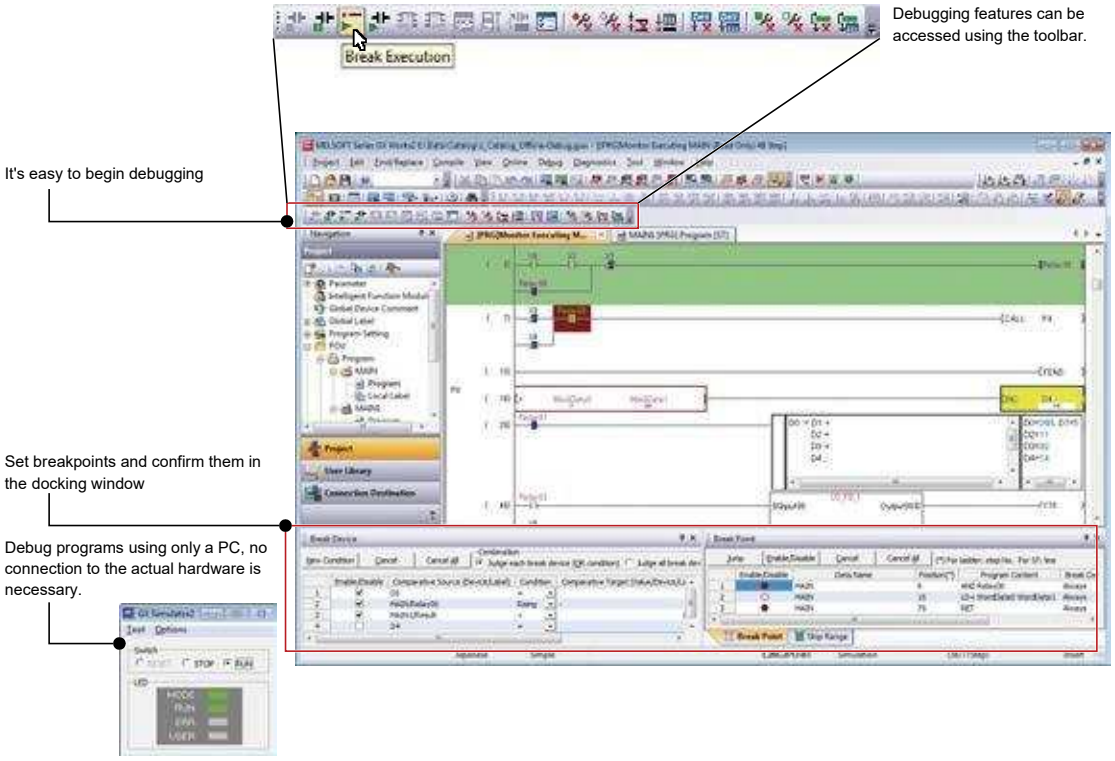
Relevant devices and labels can be searched within the contents of the program by using the cross reference tool.
The results are immediately displayed in the cross reference dialog box conveniently besides the actual program view screen.
It is then very easy to check where the relevant device is actually used within the program, just by double clicking on the target device.



Offline debug without physical hardware

GX Simulator Function

The simulation function is now integrated. The program can be executed in a step-by-step method, finding program errors more easily.

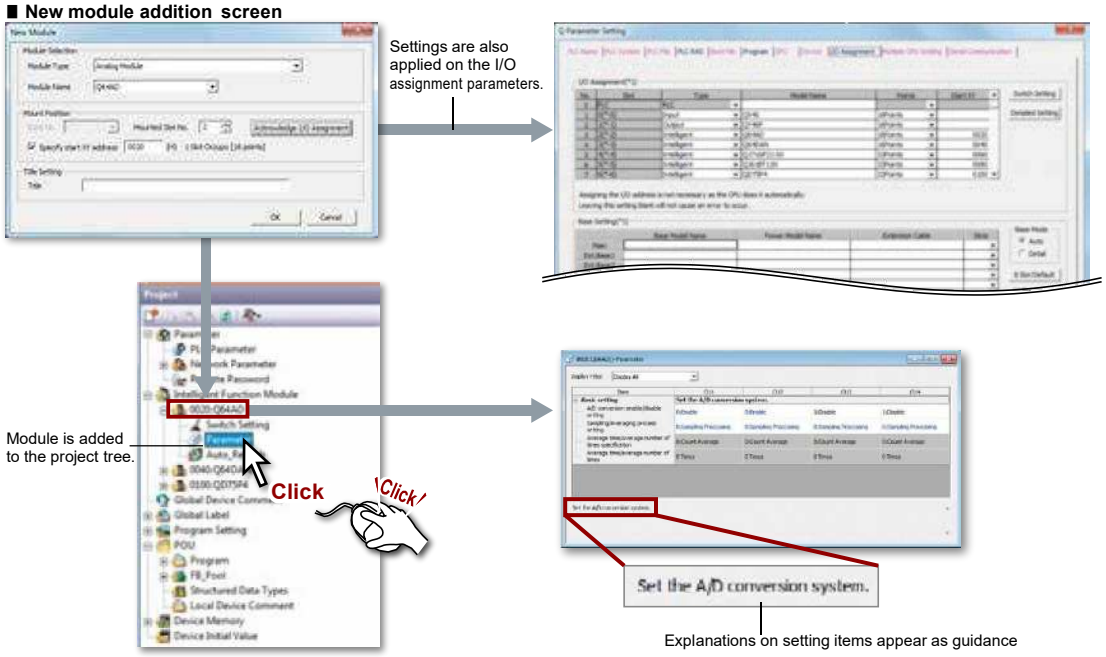


● Integrating the intelligent function module setting tool (GX Configurator)

GX Configurator Function

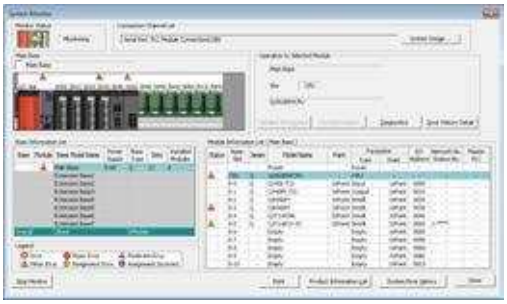
The intelligent function module's setting functions have been unified with GX Works2.
Manage the intelligent function module's setting with a GX Works2 project.

■ New module addition screen



● Visible System monitor function and PLC diagnostics

Operation status of the entire programmable controller system is clearly displayed.
Each module's diagnosis and detailed information is displayed on the monitor for the entire system allowing the problem point to be confirmed quickly.



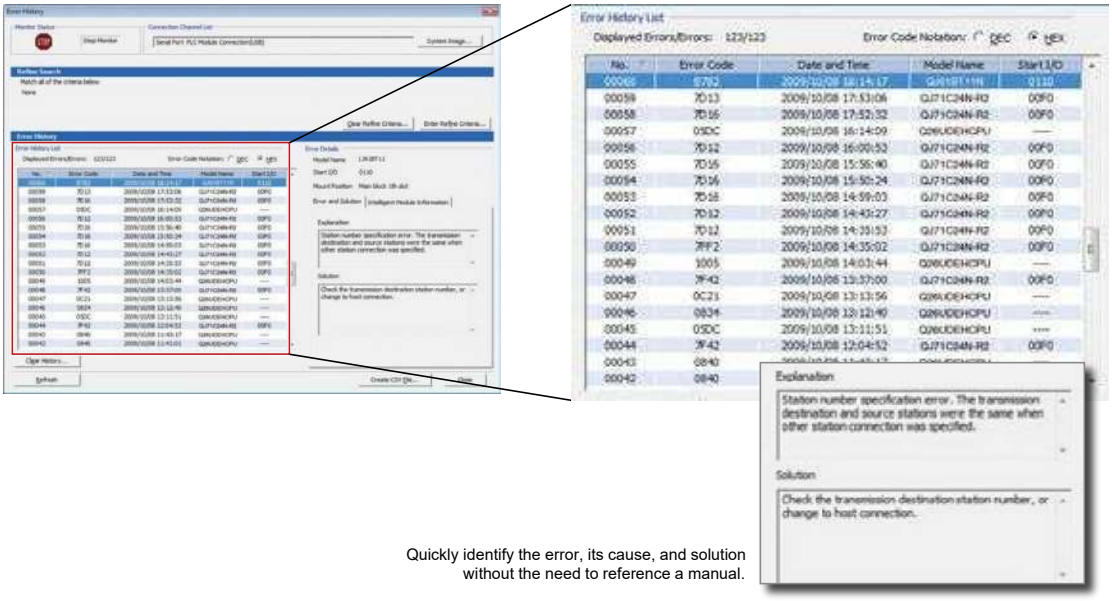
■ **System error history**
Simplify troubleshooting with a combined, time-stamped, error history list for CPUs and intelligent function modules.
The details section provides explanations of error codes and suggested solutions.

■ **Detailed module information**
Resolve intelligent function module issues quickly by clicking on a module to open this function. All of the information relevant to the module is displayed here including error codes, their description, and possible solutions.

■ **PLC diagnostics**
From one central window quickly read error and status information, export log files to CSV, perform remote CPU operations like reset, stop, CPU memory format, and more.

Time-stamped error history list

Simplify troubleshooting with a combined, time-stamped, error history list for the CPU and all expansion modules.
The details section provides explanations of error codes and suggested solutions.



Quickly identify the error, its cause, and solution without the need to reference a manual.

Save, edit labels and parameters with Microsoft® Excel®

Various program data can be exported in CSV file format.
Exporting to CSV format has various advantages, as shown below:

- Data can be utilized on a personal computer even if GX Works2 is not installed
- Data can be saved directly on the personal computer
- Data can be sent and utilized off-site
- Utilization of data for creating documents and graphs are possible using Excel®
- Can use in other software that support CSV format

■ Example of I/O assignment setting CSV file

I/O assignment setting

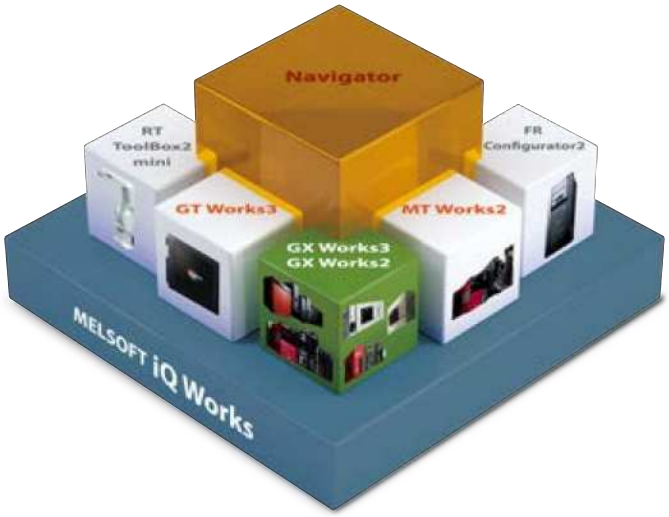
iQ Works



MELSOFT iQ Works

Next Generation Integrated Engineering Environment

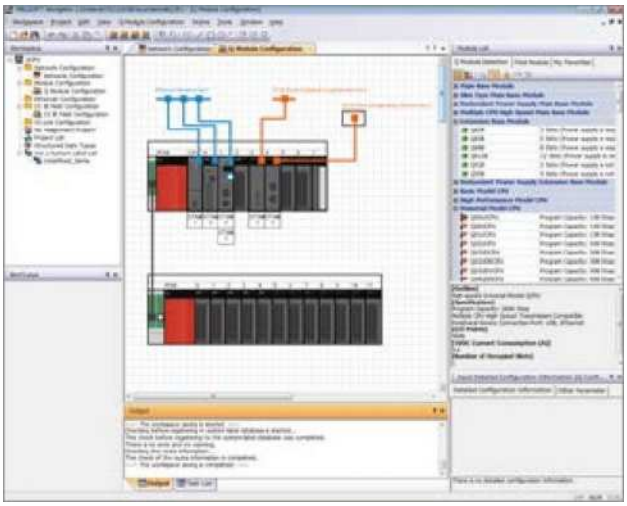
MELSOFT iQ Works is an integrated software suite consisting of GX Works3, GX Works2, MT Works2, GT Works3, RT ToolBox2 mini and FR Configurator2. The advantages of this powerful integrated software suite are that system design is made much easier with a substantial reduction in repetitious tasks, cutting down on errors while helping to reduce the overall TCO.

For further details, please refer to the "MELSOFT iQ Works" catalog.

L(NA)08232ENG

- **Graphical project management**

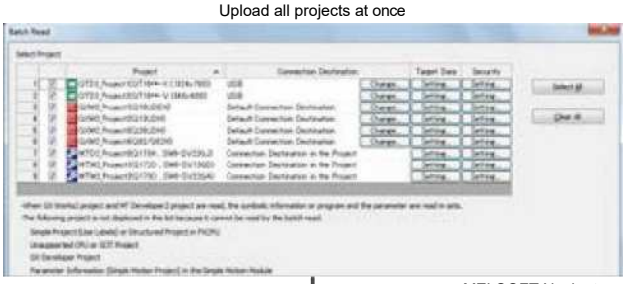
The entire control system is represented using the "Network Configuration", "Module Configuration" and field network configuration windows. System components are easily added using a drag & drop interface, and the validity of the system can be confirmed using the check function to ensure parameters are configured correctly, the power supply is sufficient, etc. Different programmable controller and GOT (HMI) projects can be grouped together (for example by factory, line, and cell) for central management.



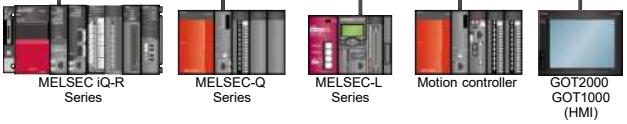
- **Read project data for multiple devices in a batch**

Multiple projects can be read as a block just by having one connection to the programmable controller. If there are multiple devices such as other CPU or GOT (HMI) on the same network as the target master programmable controller, it is possible to upload all projects to each target device without having to individually connect to each device.

Upload all projects at once



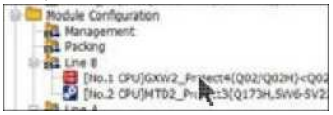
MELSOFT Navigator



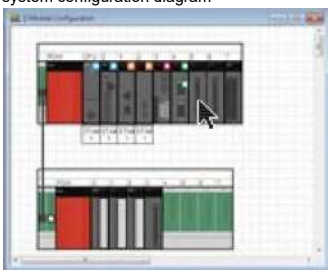
• Automatically start up the relevant maintenance software with a single click

Just double-click on the corresponding project in the system configuration diagram or workspace tree to automatically startup the software relevant for that device. Maintenance can be efficiently performed without having to know and startup each relevant software manually.

Double-click on corresponding project in workspace tree



Double-click on corresponding device in system configuration diagram



Software for corresponding device automatically starts up

- GX Works3
- GX Works2
- MT Works2
- GT Works3
- RT ToolBox2 mini

• Set up field network slave stations

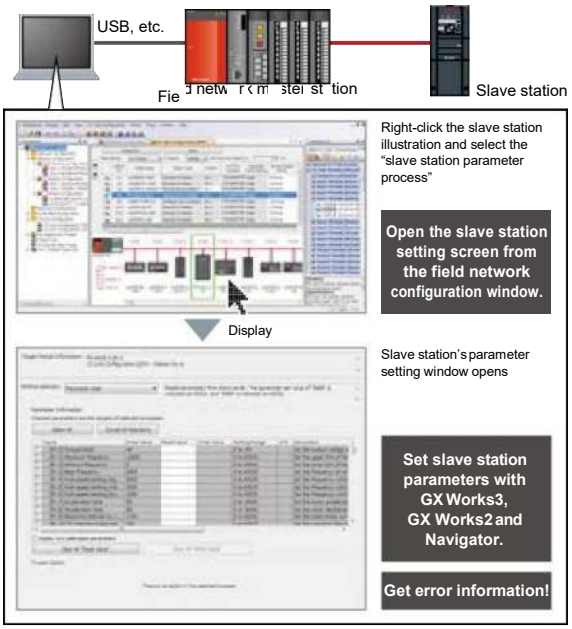
There's no need to prepare a dedicated tool to check or change the parameter settings of a slave station on-site. The latest version of iQ Works includes slave station setting utility. Inverter parameters, for example, can be confirmed or changed for speed adjustment directly from the field network configuration window. In addition, error information can be read easily.

CC-Link IE Field

CC-Link

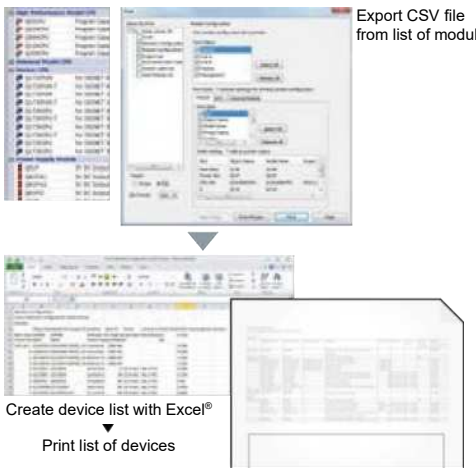
Ethernet

AnyWireASLINK

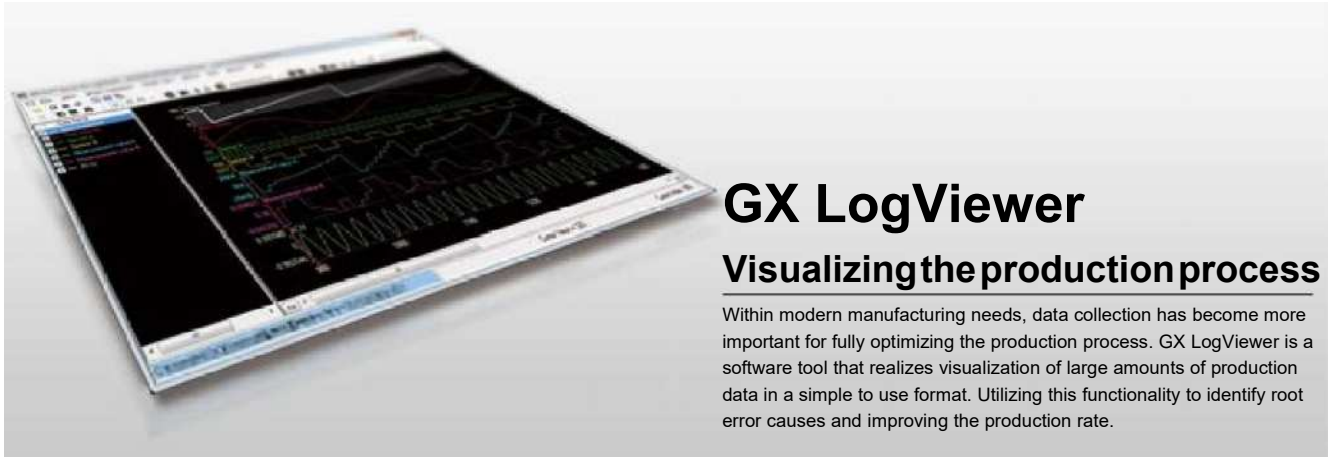


• Prepare a device from the system configuration diagram with no manual inputs

A list of modules used can be exported as a CSV file from the system configuration diagram.
This is particularly useful when utilizing data for creating a bill of materials (BOM) in Excel®, etc.



GX LogViewer



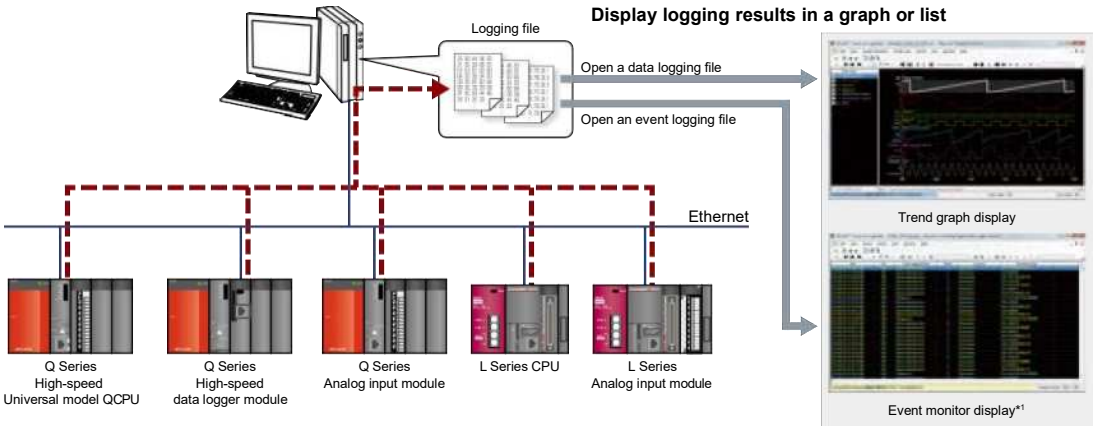
GX LogViewer

Visualizing the production process

Within modern manufacturing needs, data collection has become more important for fully optimizing the production process. GX LogViewer is a software tool that realizes visualization of large amounts of production data in a simple to use format. Utilizing this functionality to identify root error causes and improving the production rate.

• Easily display and analyze large amounts of collected logging data

This tool is used when large amounts of data need to be visualized and collected from the MELSEC-Q Series or MELSEC-L Series. The connection settings and checking of log files are the same as GX Works2 enabling individual connections to each module.

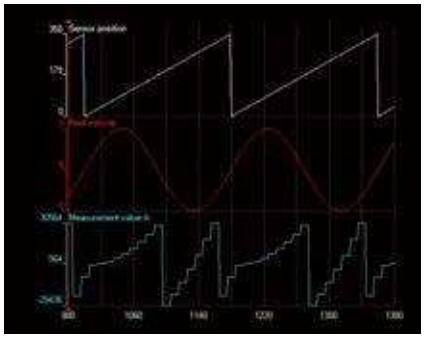


*1: The event monitor display is supported only with the Q Series high-speed logger module.

• Easily adjust graphs without referring to the setup manual

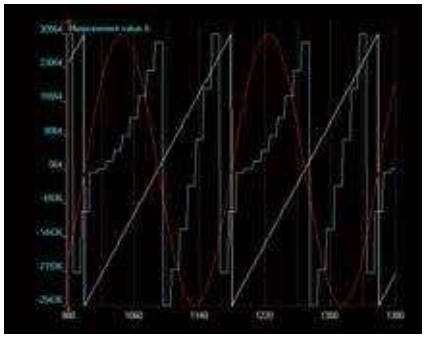
Arranging graphs

Able to arrange each graph so as not to overlap each other. It is easier to display the graphs as each graph is evenly spaced out.



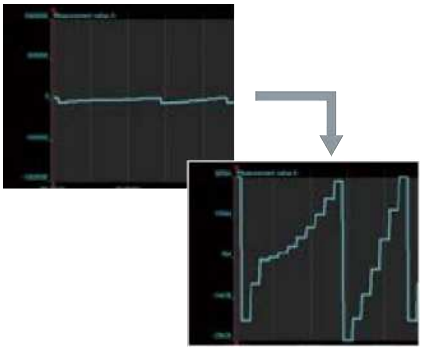
Overlapping graphs

With this it is possible to overlap each graph over one another. Multiple graphs can be compared enabling easier data analysis and comparison.



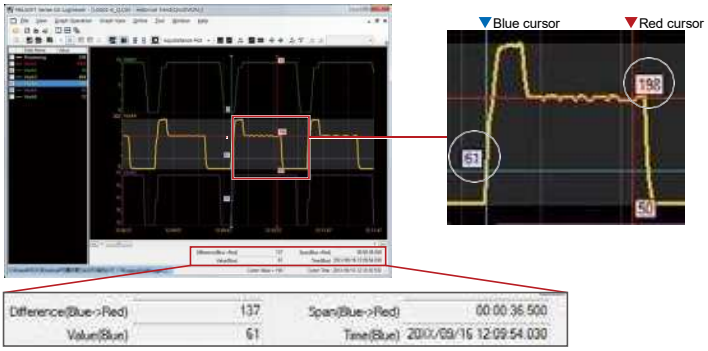
Automatically adjusting graphs

Various attributes of the graph are automatically adjusted (max/min values) as to display the upper and lower limit values better.



Easily confirm changes in data with dual cursors

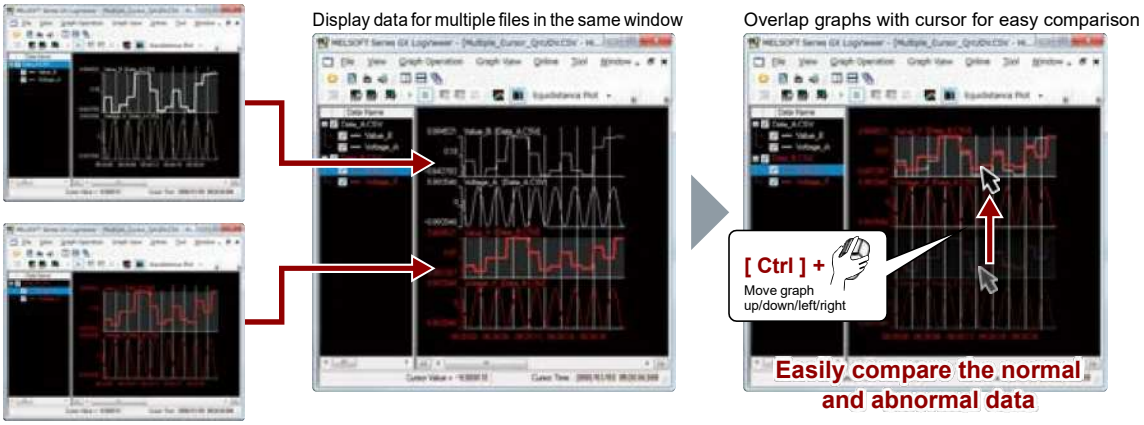
Data changes within a designated time frame can be quickly checked with user-friendly dual cursors (multi-cursors). When the cursors are moved to the point at which changes are to be confirmed, the difference in time and value between those points will appear.



The difference in time and value between the cursors is automatically calculated and displayed.

Display data for multiple files within one graph area for easy comparison

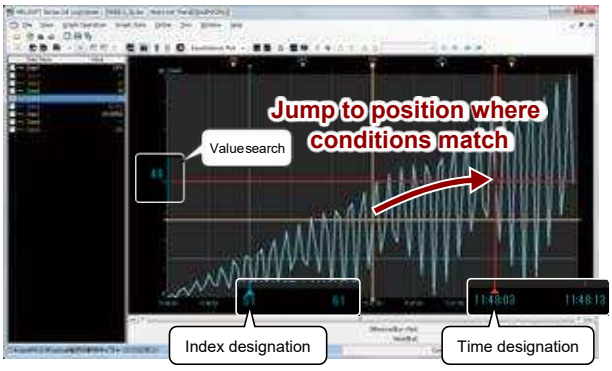
Data for multiple files are displayed with the same time units in the same graph area. The display position within a file can be moved easily. This allows the differences of data within multiple files to be confirmed easily.



Quickly jump cursor to designated position

Cursor jump

Confirm data values by quickly moving the cursor to a designated value, time or index position in the trend graph.



Value search
Values are searched, and the cursor jumps to the position where the conditions match.

Time designation
The cursor jumps to the designated time.

Index designation
The cursor jumps to the designated index.

MELSEC Safety

The concept of safety is shifting from "zero accidents" to "zero risk"

The safety concept has shifted from human intervention based "zero accidents" to risk assessment based "zero risk".
To meet the accompanying needs of this shift, Mitsubishi Electric has introduced MELSEC Safety programmable controller to realize safety control compatible with established MELSEC programmable controller.
MELSEC Safety provides a comprehensive safety control solution.

For further details, please refer to the "Safety Programmable Controller/ Safety Controller/Safety Relay Module MELSEC Safety" catalog.

L(NA)08192E

MELSEC Safety
MITSUBISHI SAFETY FA SOLUTION

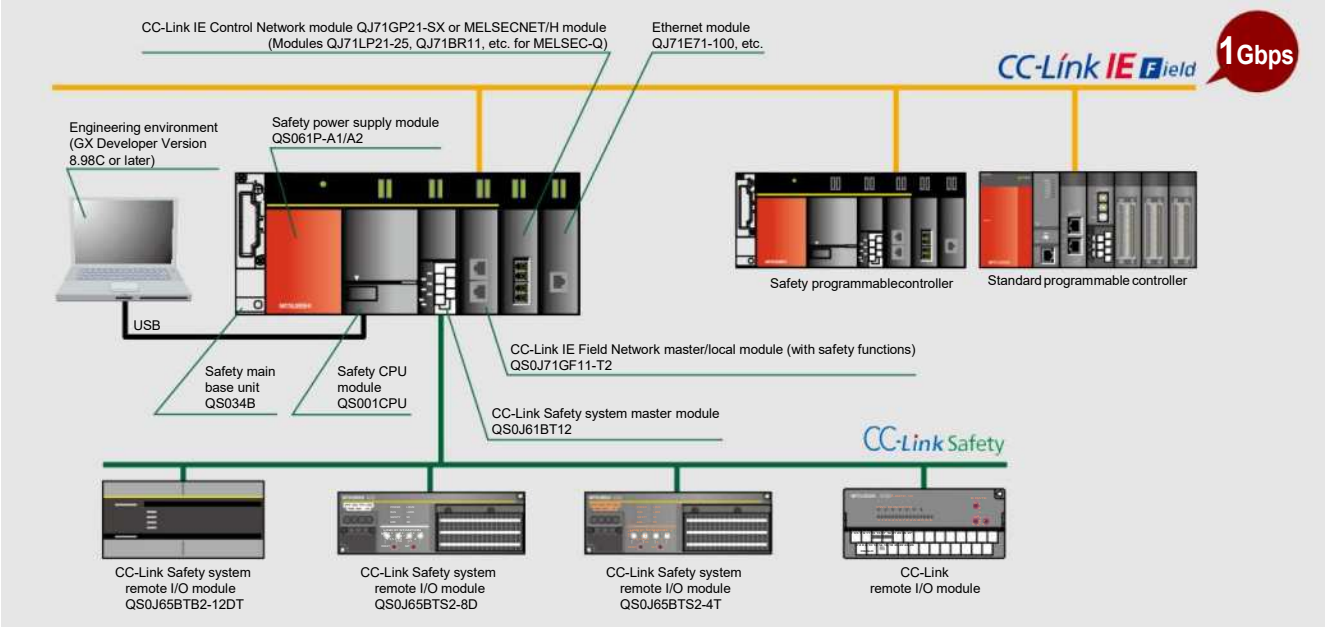
MELSEC Safety realizes visualization of safety information, realizing optimal safety control, and boosting productivity.
The safety components such as Safety programmable controller, Safety controller, and Safety relay module provide a total safety solution.

Safety Programmable Controller MELSEC-QS Series

● Safety CPU*1 ····· QS001CPU

The safety programmable controller is a programmable controller dedicated to safety control, conforming to international standards such as ISO13849-1 PLe and IEC 61508 SIL3. When connected with a safety device, such as an emergency stop switch or light curtain, this programmable controller executes safety control by turning the safety output OFF with a user-created sequence program to stop movement toward a source of hazard, such as a robot.
Machine control of the robot and conveyor, etc., is executed with a standard programmable controller in the conventional manner. The difference between the safety programmable controller and general-purpose programmable controller lies in that if the safety programmable controller itself fails, it performs a self-diagnosis to detect the failure and turn the safety output OFF forcibly. This CPU branches topology using the CC-Link Safety and CC-Link IE Field Network with safety communication function. This is ideal for large control systems requiring many safety I/O points.

*1: The CPU cannot be installed on the Q Series base unit.

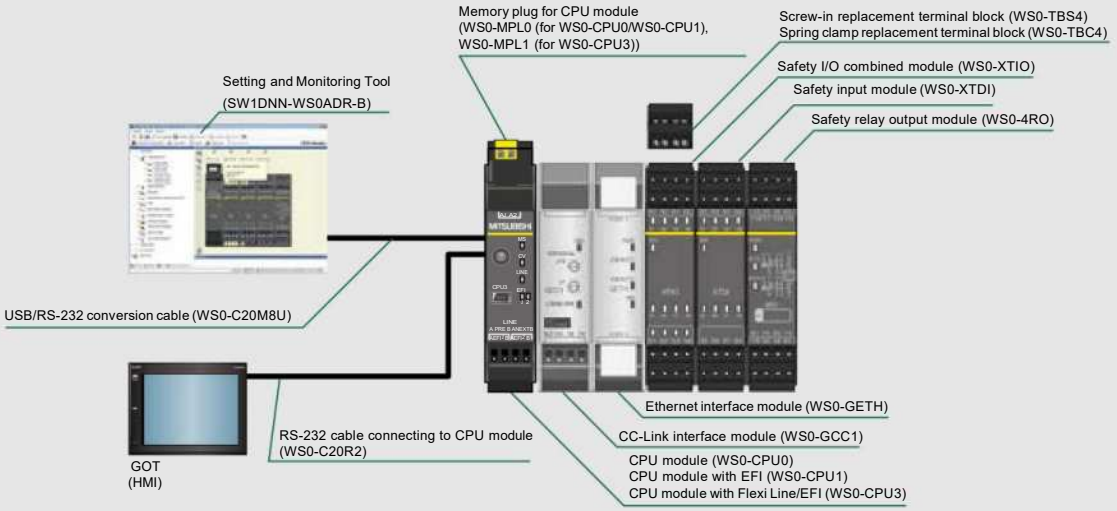


MELSEC-WS Series Safety Controller

● **Safety controller CPU*1** ····· **WS0-CPU0, WS0-CPU1, WS0-CPU3**

The safety controller is a controller dedicated to safety control, conforming to international standards such as ISO13849-1 PLe and IEC 61508 SIL3. The MELSEC-WS is ideal for small to medium-size safety machines and systems. I/O points of up to 144 (no redundancy) and up to 2 network interfaces and the dedicated Setting and Monitoring Tool, which contains safety sensor/switch connections and function blocks, all support the configuration of a safety system.

*1: The CPU cannot be installed on the Q Series base unit.



The MELSEC-WS Series is jointly developed and manufactured by Mitsubishi Electric and SICK

SICK AG, a company based in Germany, is a manufacturer of safety related products and solutions. SICK designs and manufactures a broad range of safety products including industrial-use sensors and automatic identification systems.

MELSEC-QS Series Safety Relay Modules

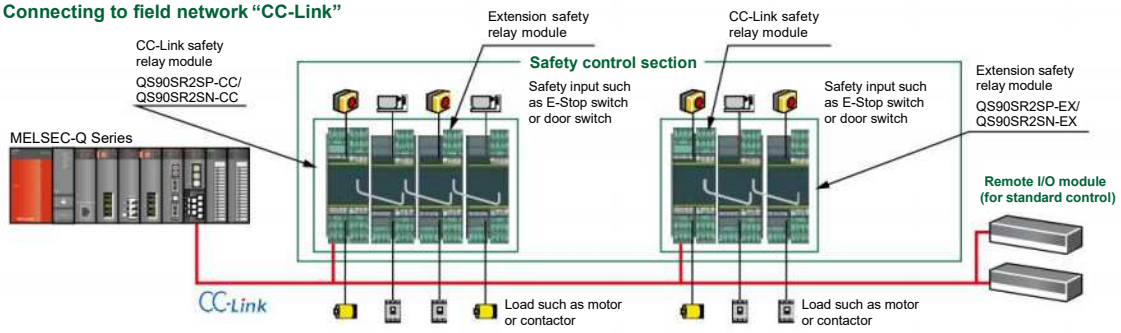
● **Q Series safety relay module** ····· **QS90SR2SP-Q, QS90SR2SN-Q**

● **CC-Link safety relay module** ····· **QS90SR2SP-CC, QS90SR2SN-CC**

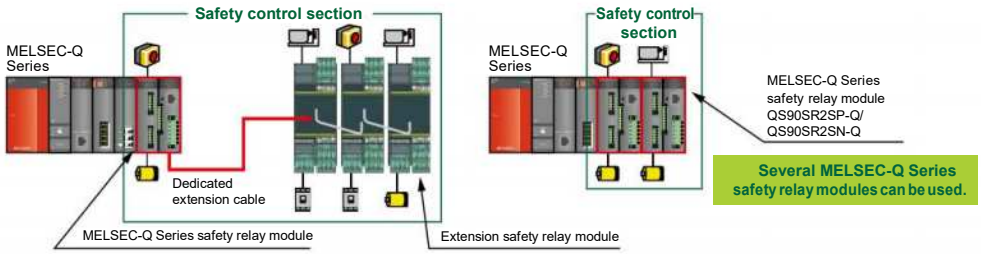
● **Extension safety relay module** ····· **QS90SR2SP-EX, QS90SR2SN-EX**

The safety relay module integrates the emergency stop circuit and the restart circuit with a double safety relay.
A basic safety function can be realized with just wiring, eliminating the need for programming and parameter settings.
Furthermore, the number of I/O points can be increased by adding extension modules.

■ **Connecting to field network "CC-Link"**



■ **Installing on MELSEC-Q Series base unit**



iQ Sensor Solution

A tool for connecting! Visualizing! For a more seamless sensor control!

Sensors used on the manufacturing floor are becoming more intelligent and complex, requiring even more maintenance of equipment and the overall management of various configuration setup software. With iQSS, the intelligent sensor solution provided by Mitsubishi Electric, configuration and maintenance of sensors are further simplified with the connectivity to other components such as automation controllers, HMIs, and engineering software even further enhanced reducing the overall TCO*.

* Total Cost of Ownership

For further details, please refer to the "iQ Sensor Solution Catalog".

L(NA)16029ENG

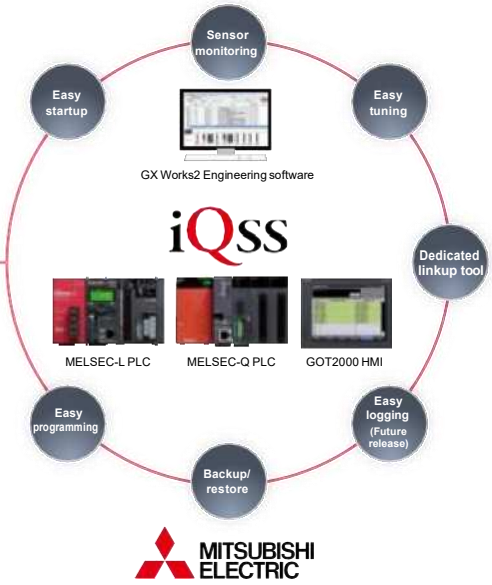
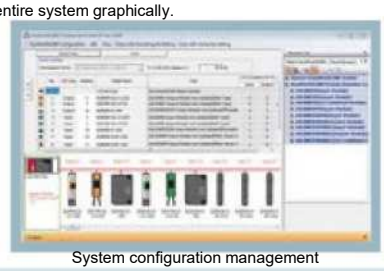
Panasonic BALLUFF Future release MEE



System design

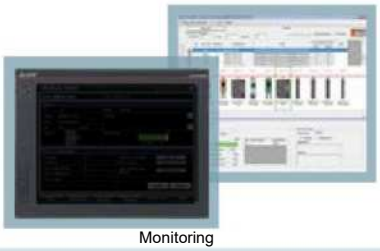
To manage projects simply, we provide a workspace tree that enables projects to be managed in a single location, and a system configuration chart that depicts the entire system graphically.



System configuration management

Implementation

Functions are provided that allow monitoring from a single screen based or the system configuration chart so that the causes of problems can be identified quickly. This also shortens the time taken to adjust sections involving multiple devices.



Monitoring

iQSS

Programming

The labels used by PLCs can also be used by HMIs and sensors. This takes all the bother out of label setting. GOT sample screen libraries, sample ladders and function blocks, etc. are supported.

Label programming

Operation & maintenance

To make backups less laborious, batch read/write functions are provided for PLC, HMI and sensor settings.

Sensor configuration read/write

Further simplifying the management of sensors in the control system

HMI

Combination with GOT for all scenes from startup to maintenance

The GOT2000 boasts advanced functionality, acts as a seamless gateway to other industrial automation devices, all while increasing productivity and efficiency.
The high quality display is designed to optimize operator control and monitoring of device and line statuses. If you are looking for an intuitive operation terminal, the new tablet-like operability and the higher functionality of operation terminal makes the GOT2000 the ideal choice.
Incorporate the GOT2000 to bring forth flexibility, productivity, and quality on a global scale.

For further details, please refer to the "Mitsubishi Graphic Operation Terminal GOT2000 Series Catalog".

L(NA)08270ENG

Graphic Operation Terminal

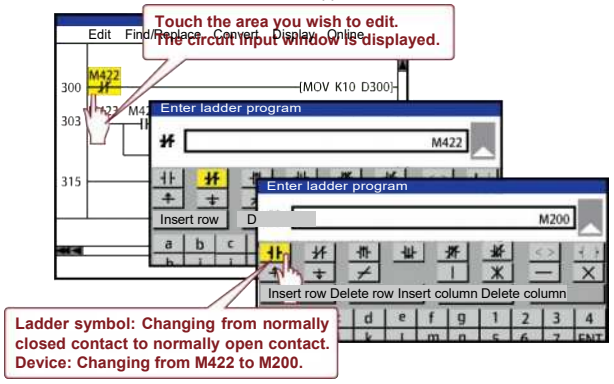
GOT2000 series/GOT1000 series

Ladder programs can easily be edited on the GOT

Sequence Program Monitor (Ladder Editor) ··· GT27/GT25/GT16/GT15

Sequence programs can be edited in a circuit diagram (ladder format). To quickly change contacts in an emergency, sequence programs can be edited in ladder format without using a personal computer.

* Supported by XGA/SVGA/VGA models excluding the 5.7-inch type.
* Process CPUs, redundant CPUs are not supported.



Program debugging can be performed without opening the control panel

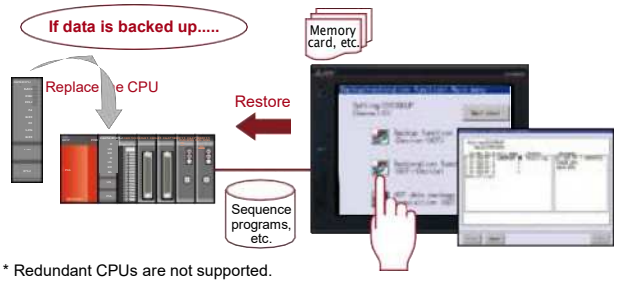
FA Transparent ····· All models

Connected with a PC, the GOT acts as a transparent gateway to enable programming, start up, and adjustment of equipment using GX Works2 or GX LogViewer. Users do not have to bother with opening the control panel or changing cable connections.
(On the GT23, GT21, or GT10 Series, the FA transparent function can be used via the interface on the rear side.)

Programmable controller can be recovered promptly in case of emergency

Backup/Restore ····· GT27/GT25/GT23/GT21/GT16/GT15/GT14/GT12

Sequence programs and parameters can be backed up to the CF card or USB memory in the GOT.
Users can perform batch operation to restore the data to the PLC CPU or motion controller.
Make a data backup in case of a problem such as a dead battery in a PLC CPU to quickly replace the faulty device and restore the system without using a personal computer.

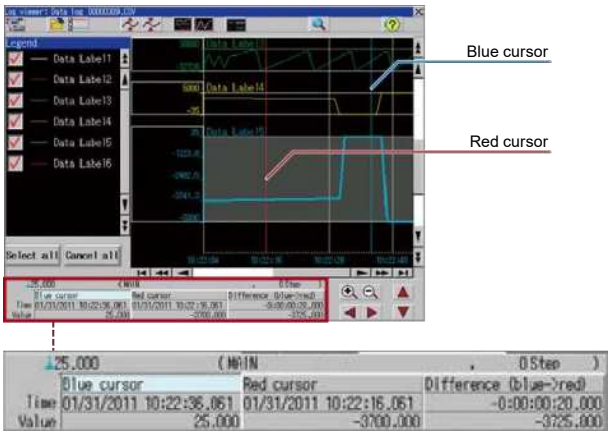


* Redundant CPUs are not supported.

View logging data without a PC

Log Viewer ····· GT27/GT25/GT16

Logging data can be confirmed with the GOT even if a PC is not available on-site, allowing problems to be troubleshooted quickly. Changes in the data can be quickly confirmed with the dual cursors (multi-cursors) that are displayed similar to GX LogViewer.



Programmable controller conditions and errors can be checked quickly

Device Monitor/System Monitor ····· All models

Programmable controller devices can be monitored and changed without use of PC.

Intelligent Module Monitor ····· GT27/GT25/GT16/GT15

Buffer memory values and I/O information can be monitored and changed. QD77GF16, QD77MS, QD73A1 are supported.

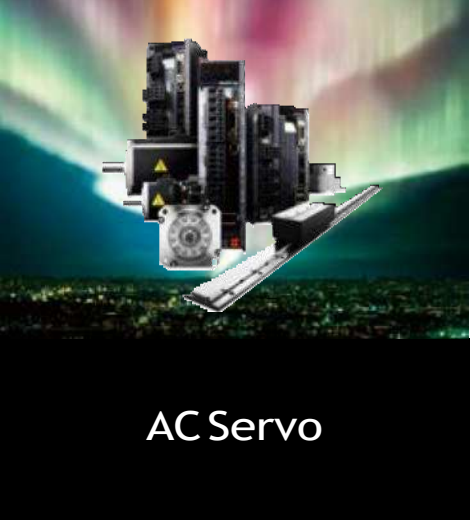
* Supported by XGA/SVGA/VGA models.

Network Monitor ····· GT27/GT25/GT16/GT15

Enable monitoring of the network line statuses of the CC-Link IE Control Network, CC-Link IE Field Network, MELSECNET/H, and MELSECNET/10 on a dedicated screen.

Network Module Status Display ····· GT27/GT25/GT16/GT15

Enable monitoring of LED status, error status, among others of network modules on a GOT.



Man, machine and environment in perfect harmony

MELSERVO-J4 — trusted technology makes an evolutionary leap forward.

Introducing the MELSERVO-J4 series. Offering more than just improved performance, these servos are designed to drive the industries of tomorrow. Backed by Mitsubishi leadership in all-digital technology, MELSERVO has become one of the most globally respected names in factory automation. And now — with the safety, ease of use, and energy-efficient design of the new MELSERVO-J4 series — man, machine and environment can at last work together in perfect harmony.

For further details, please refer to the "MELSERVO-J4" catalog.

MITSUBISHI SERVO AMPLIFIERS & MOTORS

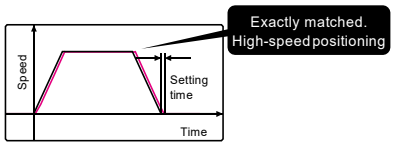
MELSERVO-J4

Machine

The leading edge in drive control

- Industry-leading level of basic performance
- High-resolution absolute position encoder
- Advanced one-touch tuning
- Advanced vibration suppression control@
- Robust filter

[Advanced one-touch tuning]
Servo gains including vibration suppression control and robust filter are adjusted just by turning on the one-touch tuning function. Machine performance is utilized to the fullest using the advanced vibration suppression control function.

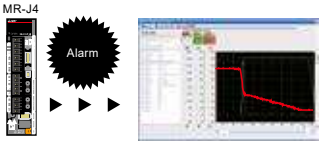


Man

Safety and convenience

- Equipped with the safety observation function (IEC/EN 61800-5-2)
- Tough drive function
- Large capacity drive recorder
- Machine diagnosis function
- MR Configurator2

[Large capacity drive recorder]
Servo data (motor current, etc.) before and after the alarm occurrence are stored in non-volatile memory. Waveforms can be checked in graph. This enables quick and accurate identification of the cause of the alarm.



The Environment

Eco-friendly design that's winning acclaim worldwide

- Multi-axis servo amplifier
- Power monitor function
- Compatible with power regeneration common converter
- Energy-conservation achieved by improved performance

[Power monitor function]
Power consumption is calculated from the data in the servo amplifier such as speed and current, and then displayed, enabling energy-conserving system examination.

SSCNET #/H compatible servo amplifier
MR-J4W2-B
SSCNET #/H compatible 2-axis servo amplifier
MR-J4W3-B
SSCNET #/H compatible 3-axis servo amplifier

With the SSCNET #/H compatible servo amplifier, a synchronous system can be configured using high-speed serial optical communication. Servo system performance and functions are utilized to the fullest when the servo amplifier is combined with the servo system controller.

CC-Link IE Field

MR-J4-B-RJ010 + MR-J3-T10
CC-Link IE Field Network servo amplifier with Motion

The CC-Link IE Field Network interface servo amplifier with Motion is compatible with the Motion control in the Ethernet-based open network.

MR-J4-A
General-purpose interface compatible servo amplifier

The general-purpose interface compatible servo amplifier enables position control by pulse train command and speed/torque control by analog voltage command.

Servo Motors

Rotary servo motor

Small capacity, low inertia
HG-KR Series
Capacity: 50 to 750 W

Small capacity, ultra-low inertia
HG-MR Series
Capacity: 50 to 750 W

Medium capacity, medium inertia
HG-SR Series
Capacity: 0.5 to 7 kW

Medium/large capacity, low inertia
HG-JR Series
Capacity: 0.5 to 55 kW

Ultra-compact size, ultra-small capacity
HG-AK Series
Capacity: 10 to 30 W

Medium capacity, ultra-low inertia
HG-RR Series
Capacity: 1 to 5 kW

Medium capacity, flat type
HG-UR Series
Capacity: 0.75 to 5 kW

Linear servo motor

Core type
LM-H3 Series
Rating: 70 to 960 N

Core type (natural/liquid cooling)
LM-F Series Rating: 300 to 3000 N (natural cooling)
Rating: 600 to 6000 N (liquid cooling)

Core type with magnetic attraction counter-force
LM-K2 Series
Rating: 120 to 2400 N

Coreless type
LM-U2 Series
Rating: 50 to 800 N

Direct drive motor

TM-RFM Series
Rating: 2 to 240 N·m

Inverter

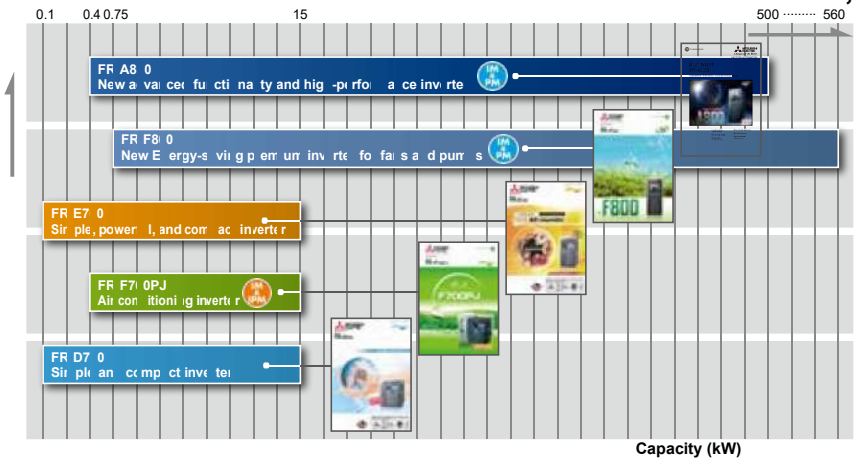
Achieving higher drive performance and energy conservation with inverters

The inverter is a variable frequency power device that can easily and freely change the speed of a 3-phase induction motor.
The Mitsubishi inverter is high-performance and environment-conscious, and complies with global standards.
Select a model from our diverse lineup to match your needs.

Answering various needs with the best choices
Frequency Inverter

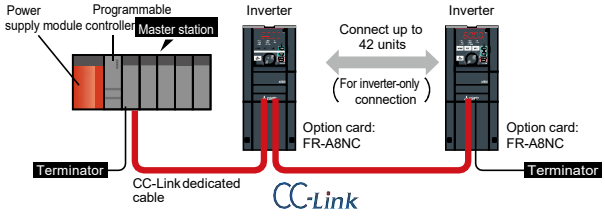
Inverter

- FR800 Series A800, F800
- FR700 Series E700, F700PJ, D700



Control inverter with CC-Link communication

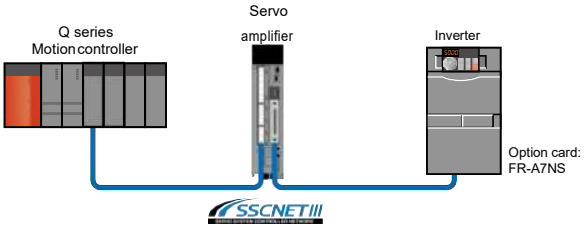
The inverter can be controlled to a programmable controller with CC-Link.*1
This function is supported with CC-Link Ver. 1.1 and Ver. 2.0.
The inverter can be operated and monitored, and the parameters set from the programmable controller.



*1: The inverter option card (FR-A8NC) is required.
Please refer to the relevant catalog for additional information.

Easy synchronous operation with SSCNET # connection

Connect to a motion controller with SSCNET #*2.
SSCNET # uses the high-speed synchronous serial communication method (high-speed, high-accuracy, high-reliability optical communication), and is perfect for synchronous operation.
(SSCNET: Servo System Controller Network)



*2: The inverter option card (FR-A7NS) is required.

Contactors and Motor Starters

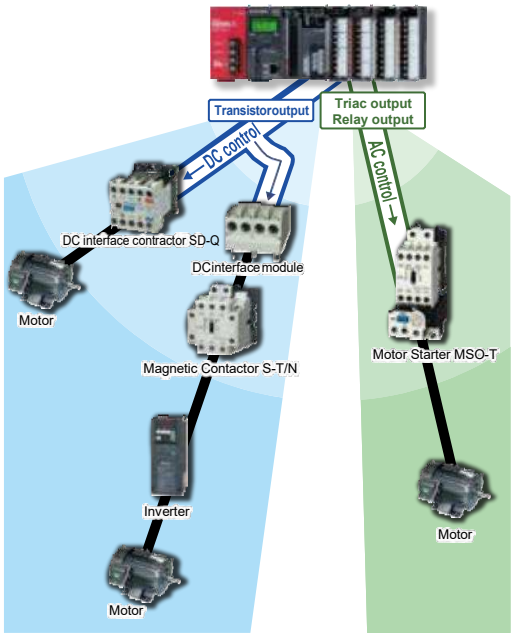
Diverse variations to respond to all situations

The Mitsubishi Electric Contactors and Motor Starters MS-T and MS-N series and DC interface contactor SD-Q series products are equipped with an environment and global compliance, compact size, ease-of-use and safety. Certification to various international standards, this highly reliable magnetic contactor is suitable for a variety of applications from panels to systems.

For further details, please refer to the "Magnetic Motor Starters and Contactors MS-T/N series Catalog".

L(NA)02030

L(NA)74109218



Direct drive with Programmable Controller

MS-T, MS-N, and SD-Q series have small operating coil VA. This means these contactors, especially the SD-Q, are operable with 24 V DC 0.1 A transistor outputs without amplifier relays.

Connectable Connectable with some restrictions Not connectable

		Programmable controller output module type		
		Transistor output	Contact output	Triac output
DC interface contactor SD-Q Series	DC operation			—
Magnetic contactor MS-T Series	AC operation	(Using DC interface module)		
	DC operation			—
Magnetic contactor MS-N Series	AC operation	(Using DC interface module)		○
	DC operation	○	—	—

*: This table shows the relation of the programmable controller output module type and operation interface. There may be restrictions according to the type of frame size, etc., that can be used. Refer to the MS-T/N Series Catalog, or contact a Mitsubishi dealer or Sales Office for details on the types of magnetic switches and models that can be used.

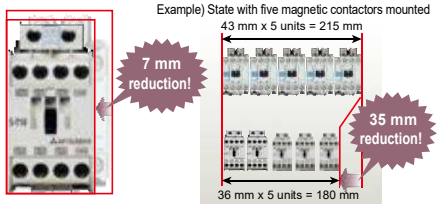
MS-T series (10A to 32A)

Mitsubishi Electric's main series is equipped with a small size, ease-of-use, safety and international compliance. This series greatly contributes to smaller panels, easier selection and compliance with international standards.

10A frame model is just 36 mm wide!!

The industry's smallest width has been realized for the general-purpose magnetic contactor.
The other rated products have also been downsized to help you reduce your panel size.

*: 10A frame general-purpose magnetic contactor (Mitsubishi Electric survey as of Mar. 2015)



Wide range of operation coil ratings!!

The wider operation coil rating ranges allow us to consolidate the number of coil types from 14 types (N Series) to 7 types.
This helps reduce stock and makes it easier to select the required type.

Standard terminal cover!!

The standard terminal cover improves the safety in the panel, and simplifies ordering as a separate model no longer needs to be specified.

SD-Q series

Direct drive is possible with the programmable controller's transistor output. Since a relay and interface module are not required, the number of parts can be reduced, and space can be saved.

Standard surge absorber

Prevent adverse effects onto the peripheral equipment.

Standard terminal cover

A terminal cover with finger protection function is installed as a standard.
This cover answers to user's needs for safety.

Vision Solution

COGNEX® machine vision system and Mitsubishi Electric FA Devices Innovating your production with this integral power.

Functioning as devices that “watch” instead of human eyes, COGNEX machine vision systems have continued to reform automation of production lines. Mitsubishi Electric FA devices, such as programmable controllers, lead the future of automation.
The possibilities of vision system solutions, created in the integration of this spirit of innovation, have continued to increase.

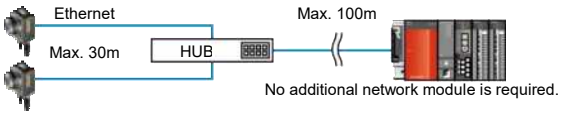
COGNEX In-Sight EZ Series iQSS ready! Device partner

- Entry model ····· EZ-700
- Standard model ····· EZ-720
- High-speed processing model ····· EZ-740
- High resolution model ····· EZ-742

Simple connection

Directly connect with Ethernet

The “In-Sight EZ” can be directly connected to the Ethernet port provided on the “MELSEC-Q Series universal model” and “MELSEC-L ” programmable controller, and to the Ethernet interface module on the MELSEC-F. By using a switching hub, a multi-unit vision system having units installed as far as 100 m away can be created.



Simple communication with SLMP

Now that “In-Sight EZ” supports SLMP, data can be easily written from the vision system to the programmable controller. Communication is easily configured with “EasyBuilder”. Just select the connected device and SLMP, set the programmable controller device used for communication and select the communication data from the list. With the SLMP scanner mode, a trigger can be applied on the vision system via SLMP.

Simple control with function blocks (FB)

Intuitively setup the vision control system from the GX Works2 programming tool utilizing dedicated vision function blocks without having to develop specific programming code.

COGNEX DataMan® Barcode Reader Device partner

- Fixed DataMan ····· DataMan 50/60/300
- Hand-held DataMan ····· DataMan 8050/8100/8500

DataMan - active in various industries

Automotive components | Aero space | Medical devices | Electronic components

● Fixed DataMan 50/60

- Unmatched read rate performance with Hotbars™
- Proprietary Hotbars™ technology
- Solid state design with no moving parts
- Easy setup with three position adjustable lens and integrated lighting aimer
- IP65-rated housing (DataMan 50)
- Supports SLMP (DataMan 60)

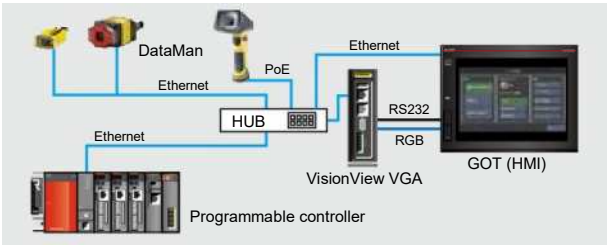
DataMan 50

DataMan 60

● Fixed DataMan 300 Series

- Unprecedented read rate with Hotbars™
- Reads the most difficult-to-read 2-D Direct Part Mark (DPM) codes
- Liquid lens with automatic variable focus
- Intelligent tuning
- Integrated lighting module
- Supports SLMP

DataMan 300



● Hand-held DataMan 8050/8100/8500 Series UltraLight®: Two types of lighting enable optimum reading*1 Newly developed body enhances sturdiness

- Standard automatic focus adjustment function*2
- Supports SLMP
- Cordless capability (up to 30 m communication range)
- Unprecedented read rate with Hotbars™

*1: DataMan 8500
*2: DataMan 8100 and 8500

DataMan 8500

Robot

Simulating people, and then surpassing them

The Mitsubishi Electric industrial robot will revolutionize your manufacturing site with faster, more intrinsic and simpler functions.

Mitsubishi Electric aims to easily realize automated production equipment. In addition to improving the performance of the robot, we propose the “MELFA F Series” which is equipped with intelligent technology we have developed and verified at our own production facilities.

For further details, please refer to the "Mitsubishi INDUSTRIAL ROBOT MELFA F Series" catalog.

L(NA)09067ENG

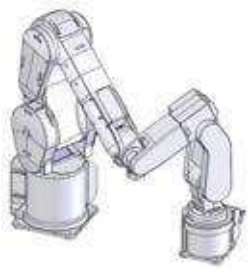
The iQ Platform compatible robot controller increases the speed of data communications between CPUs and dramatically reduces I/O processing times using a high-speed standard base between multiple CPUs.

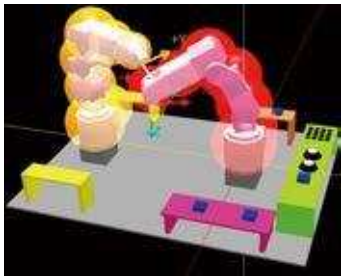
Robot

For automatic prevention of collisions between robots

• Collision avoidance

The software constantly monitors robots motion, predicts collisions before they occur, and immediately stops the robots. This avoids damage to the robot during both the JOG operations and automatic mode operations. Also, this enables the number of interlocks needed to prevent collisions between robots to be reduced. (Alarm shutdown)





Checking interference using the robot with a defined solid model

Decreases downtime during startup operation

Reduces the number of recovery man-hours required after collisions due to teaching operation errors or failure to set interlocks.

Coordinated control between multiple robots

• Coordinated control

Enables coordinated control between multiple robots through CPU connection between the robots. Easy to operate and use under normal operation through individual robot operation.

Enables installation work to be completed while gripper positions between robots are maintained.

Coordinated transport

Enables transport of lengthy or heavy objects using multiple small-sized robots instead of larger ones.

*1: The storage ambient temperature is -20 to 75°C if the system includes the AnS/A Series modules.
*2: The operating ambient humidity and storage ambient humidity are 10 to 90% RH if the system includes the AnS/A Series modules.
*3: Do not use or store the programmable controller under pressure higher than the atmospheric pressure of altitude 0 m.
Doing so can cause a malfunction.
When using the programmable controller under pressure, please contact your sales representative.
*4: This indicates the section of the power supply to which the equipment is assumed to be connected between the public electrical power distribution network and the machinery within premises.
Category @ applies to equipment for which electrical power is supplied from fixed facilities. The surge voltage withstand level for up to the rated voltage of 300 V is 2500 V.
*5: This index indicates the degree to which conductive material is generated in terms of the environment in which the equipment is used.
Pollution level 2 is when only non-conductive pollution occurs. A temporary conductivity caused by condensing must be expected occasionally.

Device initial values									

*1: The USB port terminal is mini-B.
*2: The operation of devices that are not manufactured or recommended as compatible products by Mitsubishi Electric cannot be guaranteed.
*3: The processing speed is the same even when the device is indexed.
*4: The PC MIX value is the average number of instructions such as the basic and data processing instructions executed in 1μs. A larger value indicates a higher processing speed.
*5: Intelligent function module dedicated instructions are not included.
*6: When the QnUD(H)CPU or QnUDE(H)CPU is replaced with the QnUDVCPU, the number of steps in the program may change (increase or decrease). For more information, refer to the relevant manual.
*7: Indicates the number of points in the default state. This can be changed with the parameter.
*8: Indicates the number of points when using the built-in memory (standard RAM). This can be increased with the extended SRAM cassette.
When using together with the extended SRAM cassette, the value obtained by totaling the number of points in the following table is the number of file registers that can be used.

With Q4MCA-1MBS (1 MB)	With Q4MCA-2MBS (2 MB)	With Q4MCA-4MBS (4 MB)	With Q4MCA-8MBS (8 MB)
524288 points	1048576 points	2097152 points	4194304 points

*9: Indicates the number of points when using the built-in memory (standard RAM). This can be expanded with the SRAM card or Flash card. (Writing from the program is not possible with the Flash card.)
Up to 4184064 points can be used with the SRAM card.

Peripheral connection port	USB		
	RS-232		
Memory card interface		(SRAM card, Flash card, ATA card)	
Processing speed*2	LD instruction	34 ns	
	MOV instruction	102 ns	
	PC MIX value (instruction/μs)*3	10.3	
	Floating point addition	0.78 μs	
Total number of instructions*4		778	
Floating point instruction			
Character string processing instruction			
PID instruction			
Process control instruction			
Special function instruction (Trigonometric function, square root, exponential operation, etc.)			
Constant scan (Function for keeping regular scan time)		0.5…2000 ms (setting available in units of 0.5 ms)	
Program capacity		124K steps	252K steps
Number of I/O device points [X/Y]		8192 points	
Number of I/O points [X/Y]		4096 points	
Internal relay [M]*5		8192 points	
Latch relay [L]*5		8192 points	
Link relay [B]*5		8192 points	
Timer [T]*5		2048 points	
Retentive timer [ST]*5		0 point	
Counter [C]*5		1024 points	
Data register [D]*5		12288 points	
Link register [W]*5		8192 points	
Annunciator [F]*5		2048 points	
Edge relay [V]*5		2048 points	
Link special relay [SB]		2048 points	
Link special register [SW]		2048 points	
File register [R, ZR]		131072 points*6	
Step relay [S]		8192 points	
Index register [Z]		16 points	
Pointer [P]		4096 points	
Interrupt pointer [I]		256 points	
Special relay [SM]		2048 points	
Special register [SD]		2048 points	
Function input [FX]		16 points	
Function output [FY]		16 points	
Function register [FD]		5 points	
Local device			
Device initial values			

*1: PX Developer is required for programming by FBD.
*2: The processing speed is the same even when the device is indexed.
*3: The PC MIX value is the average number of instructions such as the basic and data processing instructions executed in 1 μs. A larger value indicates a higher processing speed.
*4: Intelligent function module dedicated instructions are not included.
*5: Indicates the number of points in the default state. This can be changed with the parameter.
*6: Indicates the number of points when the built-in memory (standard RAM) is used. Capacity can be expanded by using an SRAM card or a Flash card. (Writing from a program is not possible with a Flash card.) With an SRAM card, up to 1041408 points can be used.

Module Combinations for Multiple CPU System

Restrictions apply depending on CPU type, the number that can be installed, and supported serial No. For more information, please refer to the relevant users manual for each CPU.

Multiple CPU high speed main base unit (Q3 DB)

Possible
Possible (multiple CPU high-speed communication not available)
Impossible

CPU 1	CPU 2 to 4	High-speed Universal model QCPU	Universal model QCPU		High Performance model QCPU	Process CPU	Motion CPU/ Robot CPU*1/CNC CPU		C Controller CPU

Factory Automation Global website

Mitsubishi Electric Factory Automation provides a mix of services to support its customers worldwide. A consolidated global website is the main portal, offering a selection of support tools and a window to its local Mitsubishi Electric sales and support network.

From here you can find:

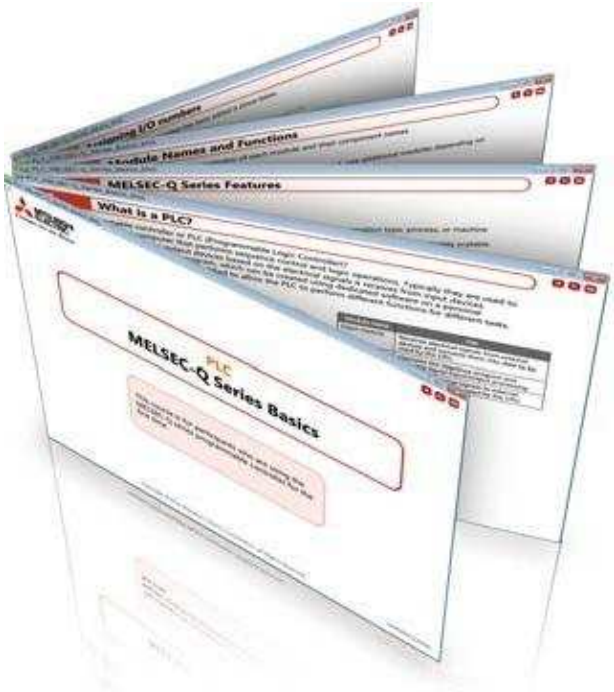
- Overview of available factory automation products
- Library of downloadable literature
- Support tools such as online e-learning courses, terminology dictionary, etc.
- Global sales and service network portal
- Latest news related to Mitsubishi Electric factory automation

Mitsubishi Electric Factory Automation Global website:

www.MitsubishiElectric.com/fa

Online e-learning

An extensive library of e-learning courses covering the factory automation product range has been prepared. Courses from beginner to advanced levels of difficulty are available in various languages.



Beginner level

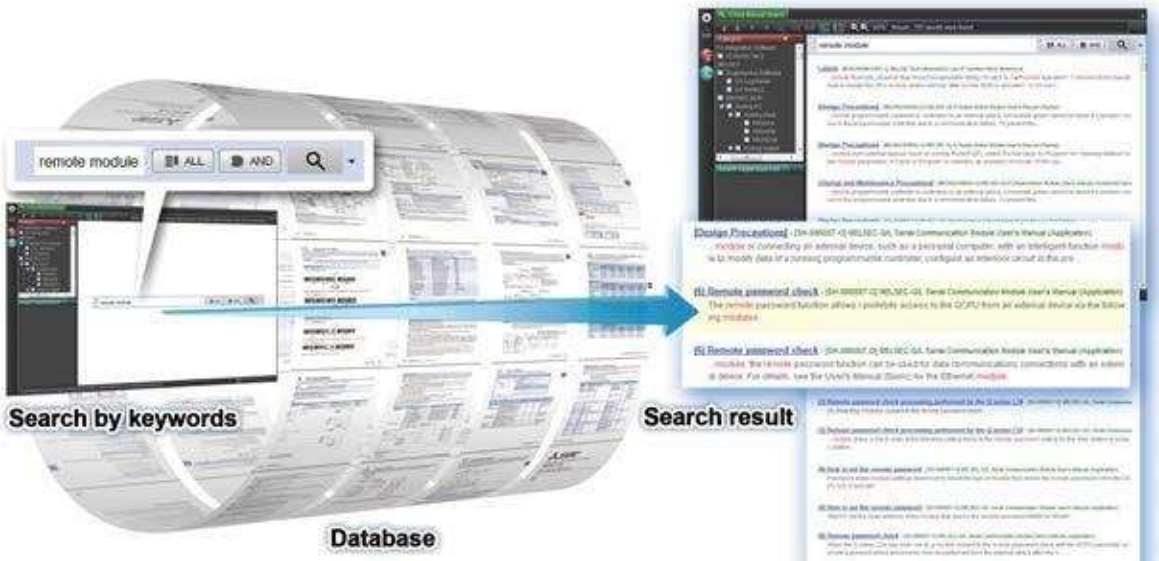
Designed for newcomers to Mitsubishi Electric Factory Automation products gaining a background of the fundamentals and an overview of various products related to the course.

Basic to Advanced levels

These courses are designed to provide education at all levels. Various different features are explained with application examples providing an easy and informative resource for in-house company training.

Innovative next-generation, e-manual

The e-manual viewer is a next-generation digital manual offered by Mitsubishi Electric that consolidates all manuals into an easy-to-use package with various useful features integrated into the viewer. The e-manual is modeled around a centralized database allowing multiple manuals to be cross-searched at once, further reducing the time for reading individual product manuals when setting up a control system.



Key features include

- One-stop database containing all required manuals, with local file cache
- Bundled with GX Works3 engineering software
- Easily download manuals all at once
- Automatic update of manual versions
- Search information across multiple manuals
- Visual navigation from hardware diagram showing various specifications
- Customizable by adding user notes and bookmarks
- Directly port sample programs within manuals to GX Works3

Compliance with international quality assurance standards

All of Mitsubishi Electric's FA products have acquired the international quality assurance "ISO9001" and environmental management system standard "ISO14001" certification. Mitsubishi Electric FA products also comply with many safety and shipping standards, including CE, UL, ABS, and DNV.
*For jointly developed and partner products, guaranteed quality standards may differ. Please refer to the product manuals for details.

Safety Standards

CE	CE : Council Directive of the European Communities
c UL us	UL : Underwriters Laboratories Listing

Shipping Standards

Lloyd's Register	LR : Lloyd's Register of Shipping approval
ClassNK	NK : ClassNK approval
	GL : Germanischer Lloyd approval

DNV	DNV : Norwegian Maritime approval
	ABS : American Bureau of Shipping approval

	RINA : Italian Maritime approval
BUREAU VERITAS	BV : Bureau Veritas approval

Product List

*Please check the compatibility and restrictions of the product in the related manual before purchasing.

[Legend] DB : Double brand product (Note) NEW : Recently released product SOON : Product available soon

CPU module

Type		Model	Outline
High-speed Universal model QCPU		Q03UDVCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 30K steps, basic operation processing speed (LD instruction): 1.9 ns, program memory capacity: 120 KB, peripheral connection ports: USB, Ethernet (Predefined protocol support function), memory card I/F: SD memory card and extended SRAM cassette
		Q04UDVCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 40K steps, basic operation processing speed (LD instruction): 1.9 ns, program memory capacity: 160 KB, peripheral connection ports: USB, Ethernet (Predefined protocol support function), memory card I/F: SD memory card and extended SRAM cassette
		Q06UDVCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 60K steps, basic operation processing speed (LD instruction): 1.9 ns, program memory capacity: 240 KB, peripheral connection ports: USB, Ethernet (Predefined protocol support function), memory card I/F: SD memory card and extended SRAM cassette
		Q13UDVCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 130K steps, basic operation processing speed (LD instruction): 1.9 ns, program memory capacity: 520 KB, peripheral connection ports: USB, Ethernet (Predefined protocol support function), memory card I/F: SD memory card and extended SRAM cassette
		Q26UDVCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 260K steps, basic operation processing speed (LD instruction): 1.9 ns, program memory capacity: 1040 KB, peripheral connection ports: USB, Ethernet (Predefined protocol support function), memory card I/F: SD memory card and extended SRAM cassette
Universal model QCPU		Q00UJCPU	No. of I/O points: 256 points, no. of I/O device points: 8192 points, program capacity: 10K steps, basic operation processing speed (LD instruction): 120 ns, program memory capacity: 40 KB, peripheral connection ports: USB and RS-232, no memory card I/F, 5-slot base, with 100…240 V AC input/5 V DC/3 A output power supply
		Q00UCPU	No. of I/O points: 1024 points, no. of I/O device points: 8192 points, program capacity: 10K steps, basic operation processing speed (LD instruction): 80 ns, program memory capacity: 40 KB, peripheral connection ports: USB and RS-232, no memory card I/F
		Q01UCPU	No. of I/O points: 1024 points, no. of I/O device points: 8192 points, program capacity: 15K steps, basic operation processing speed (LD instruction): 60 ns, program memory capacity: 60 KB, peripheral connection ports: USB and RS-232, no memory card I/F
		Q02UCPU	No. of I/O points: 2048 points, no. of I/O device points: 8192 points, program capacity: 20K steps, basic operation processing speed (LD instruction): 40 ns, program memory capacity: 80 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q03UDCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 30K steps, basic operation processing speed (LD instruction): 20 ns, program memory capacity: 120 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q04UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 40K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 160 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q06UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 60K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 240 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q10UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 100K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 400 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q13UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 130K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 520 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q20UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 200K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 800 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q26UDHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 260K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 1040 KB, multiple CPU high-speed communication, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
	Built-in Ethernet type	Q03UDECPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 30K steps, basic operation processing speed (LD instruction): 20 ns, program memory capacity: 120 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q04UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 40K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 160 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q06UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 60K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 240 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q10UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 100K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 400 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q13UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 130K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 520 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q20UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 200K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 800 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q26UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 260K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 1040 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q50UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 500K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 2000 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card
		Q100UDEHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 1000K steps, basic operation processing speed (LD instruction): 9.5 ns, program memory capacity: 4000 KB, multiple CPU high-speed communication, peripheral connection ports: USB and Ethernet, memory card IF: SRAM card, FLASH card, and ATA card

Note: General specifications and product guarantee conditions of jointly developed products are different from those of MELSEC products.
For more information, please refer to the product manuals or contact your local Mitsubishi representative for details.

CPU module

Type		Model	Outline
Basic model QCPU		Q00JCPU	No. of I/O points: 256 points, no. of I/O device points: 2048 points, program capacity: 8K steps, basic operation processing speed (LD instruction): 200 ns, program memory capacity: 58 KB, peripheral connection ports: RS-232, no memory card I/F, 5-slot base, with 100…240 V AC input/5 V DC/3 A output power supply
		Q00CPU	No. of I/O points: 1024 points, no. of I/O device points: 2048 points, program capacity: 8K steps, basic operation processing speed (LD instruction): 160 ns, program memory capacity: 94 KB, peripheral connection ports: RS-232, no memory card I/F
		Q01CPU	No. of I/O points: 1024 points, no. of I/O device points: 2048 points, program capacity: 14K steps, basic operation processing speed (LD instruction): 100 ns, program memory capacity: 94 KB, peripheral connection ports: RS-232, no memory card I/F
High Performance model QCPU		Q02CPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 28K steps, basic operation processing speed (LD instruction): 79 ns, program memory capacity: 112 KB, peripheral connection ports: RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q02HCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 28K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 112 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q06HCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 60K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 240 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q12HCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 124K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 496 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q25HCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 252K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 1008 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
Process CPU		Q02PHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 28K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 112 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q06PHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 60K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 240 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q12PHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 124K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 496 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q25PHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 252K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 1008 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
Redundant CPU		Q12PRHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 124K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 496 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
		Q25PRHCPU	No. of I/O points: 4096 points, no. of I/O device points: 8192 points, program capacity: 252K steps, basic operation processing speed (LD instruction): 34 ns, program memory capacity: 1008 KB, peripheral connection ports: USB and RS-232, memory card IF: SRAM card, FLASH card, and ATA card
	Tracking cable	QC10TR	Tracking cable 1 m
		QC30TR	Tracking cable 3 m
C Controller CPU		Q24DHCCPU-V	No. of I/O points: 4096 points, endian format: little endian, removable storage: SD memory card, OS: VxWorks® Version 6.8.1
		Q24DHCCPU-LS	No. of I/O points: 4096 points, endian format: little endian, removable storage: SD memory card, OS: No pre-installed operating system (Operating system installed by user)
		Q12DCCPU-V	No. of I/O points: 4096 points, endian format: little endian, removable storage: CompactFlash card, OS: VxWorks® Version 6.4
		Q06CCPU-V	No. of I/O points: 4096 points, endian format: little endian, removable storage: CompactFlash card, OS: VxWorks® Version 5.4
	Bundled product	Q24DHCCPU-V-B019	C Controller (Q24DHCCPU-V) bundled with CIMSNIPER Q24 E, data collection package for EES/FDC/APC (equipped with Simple MES functionality)
		Q24DHCCPU-V-B01D	C Controller (Q24DHCCPU-V) bundled with DNA Designer Q24 E, model based development support tool
		Q24DHCCPU-VG-B000	C Controller (Q24DHCCPU-VG) bundled with GENWARE®3-VG Runtime License Version, runtime library is pre-installed
		Q24DHCCPU-VG-B002	C Controller (Q24DHCCPU-VG) bundled with GENWARE®3-VG Tool License Version, GUI development environment (CI SKETCH-E) is bundled into the Runtime License version
		Q24DHCCPU-LS-B030 NEW	C Controller (Q24DHCCPU-LS) bundled with Lineo uLinux and uLinux Station, web-based application that enables basic Linux system configuration
		Q12DCCPU-V-B011	C Controller (Q12DCCPU-V) bundled with CIMOPERATOR® SECS+ for ADVANCED E, supports SECS-I (SEMI E4), HSMS (SEMI E37)
		Q12DCCPU-V-B013	C Controller (Q12DCCPU-V) bundled with CIMOPERATOR® SECS+ for GEM ADVANCED E, middle kit version that supports GEM (E30) (does not support Trace data collection, Limit monitoring, Document file output)
		Q12DCCPU-V-B015	C Controller (Q12DCCPU-V) bundled with CIMOPERATOR® SECS+ for GEM ADVANCED (Option Pack) E, full kit version that supports GEM (E30) (supports Trace data collection, Limit monitoring, Document file output)
		Q12DCCPU-V-B019	C Controller (Q12DCCPU-V) bundled with CIMSNIPER E, data collection package for EES/FDC/APC (equipped with Simple MES functionality)
		Q12DCCPU-V-B01B	C Controller (Q12DCCPU-V) bundled with CIMSNIPER Light E, data collection package for EES/FDC/APC (not equipped with Simple MES functionality)
		Q12DCCPU-V-B01D	C Controller (Q12DCCPU-V) bundled with DNA Designer E, model based development support tool
	Cable	Q12DCCPU-CBL*1*2*3	RS-232 connection converter cable (custom mini-DIN to 9-pin D-sub connector)

*1: For use with Q24DHCCPU-V, Q24DHCCPU-VG.
*2: For use with Q24DHCCPU-LS.
*3: For use with Q12DCCPU-V.

CPU module

Type	Model	Outline
Battery	Q6BAT	Replacement battery
	Q7BAT	Replacement large-capacity battery
	Q7BAT-SET	Large-capacity battery with holder for installing CPU
	Q8BAT	Replacement large-capacity battery module
	Q8BAT-SET	Large-capacity battery module with CPU connection cable
Extended SRAM cassette	Q4MCA-1MBS*1	Extended SRAM cassette, capacity: 1 MB
	Q4MCA-2MBS*1	Extended SRAM cassette, capacity: 2 MB
	Q4MCA-4MBS*1	Extended SRAM cassette, capacity: 4 MB
	Q4MCA-8MBS*1	Extended SRAM cassette, capacity: 8 MB
SD memory card	NZ1MEM-2GBSD*1*2*3*4 NEW	SD memory card, capacity: 2 GB
	NZ1MEM-4GBSD*1*2*3*4 NEW	SDHC memory card, capacity: 4 GB
	NZ1MEM-8GBSD*1*2*3*4 NEW	SDHC memory card, capacity: 8 GB
	NZ1MEM-16GBSD*1*2*3*4 NEW	SDHC memory card, capacity: 16 GB
Memory card	Q2MEM-1MBS*5	SRAM memory card, capacity: 1 MB
	Q2MEM-2MBS*5	SRAM memory card, capacity: 2 MB
	Q3MEM-4MBS*5	SRAM memory card, capacity: 4 MB
	Q3MEM-4MBS-SET*5	SRAM memory card with cover, capacity: 4 MB
	Q3MEM-8MBS*6	SRAM memory card, capacity: 8 MB
	Q3MEM-8MBS-SET*6	SRAM memory card with cover, capacity: 8 MB
	Q3MEM-CV	Memory card protective cover for the Universal model QCPU (comes with Q3MEM-4MBS-SET/Q3MEM-8MBS-SET)
	Q3MEM-CV-H	Memory card protective cover for the High Performance model, Process, and Redundant CPUs (comes with Q3MEM-4MBS-SET)
	Q2MEM-8MBA*5	ATA card, capacity: 8 MB, to be discontinued (December 2016)
	Q2MEM-16MBA*5	ATA card, capacity: 16 MB
	Q2MEM-32MBA*5	ATA card, capacity: 32 MB
CompactFlash card	GT05-MEM-128MC*4*7	CompactFlash card, capacity: 128 MB
	GT05-MEM-256MC*4*7	CompactFlash card, capacity: 256 MB
	QD81MEM-512MBC*4*7*8	CompactFlash card, capacity: 512 MB
	QD81MEM-1GBC*4*8	CompactFlash card, capacity: 1 GB
	QD81MEM-2GBC*4*8	CompactFlash card, capacity: 2 GB
	QD81MEM-4GBC*4*8	CompactFlash card, capacity: 4 GB
	QD81MEM-8GBC*4*8	CompactFlash card, capacity: 8 GB
Memory card adapter	Q2MEM-ADP	Adapter for Q2MEM memory card's standard PCMCIA slot
SRAM card battery	Q2MEM-BAT	Replacement battery for Q2MEM-1MBS and Q2MEM-2MBS
	Q3MEM-BAT	Replacement battery for Q3MEM-4MBS and Q3MEM-8MBS
Connection cable	QC30R2	RS-232 cable for connecting PC and CPU, 3 m (between mini-DIN6P and Dsub9P)
Cable disconnection prevention holder	Q6HLD-R2	Holder for preventing RS-232 cable (Programmable Controller CPU connection) disconnection

*1: For use with QnUDVCPU.
*2: For use with Q24DHCCPU-V, Q24DHCCPU-VG.
*3: For use with Q24DHCCPU-LS.
*4: Mitsubishi Electric shall not guarantee the operation of any non-Mitsubishi Electric products.
*5: For use with the Universal model QCPUs (except QnUDV), High Performance model QCPUs, process CPUs, and redundant CPUs that are equipped with the memory card interface.
*6: For use with the Universal model QCPUs (except QnUDV) that are equipped with the memory card interface.
*7: For use with Q06CCPU-V.
*8: For use with Q12DCCPU-V.

Base unit

Type	Model	Outline
Main base	Q33B	3 slots, 1 power supply module required, for Q Series modules
	Q35B	5 slots, 1 power supply module required, for Q Series modules
	Q38B	8 slots, 1 power supply module required, for Q Series modules
	Q312B	12 slots, 1 power supply module required, for Q Series modules
Multiple CPU high speed main base	Q35DB	5 slots, power supply module required, for Q Series modules
	Q38DB	8 slots, 1 power supply module required, for Q Series modules
	Q312DB	12 slots, 1 power supply module required, for Q Series modules
Slim type main base	Q32SB	2 slots, 1 slim type power supply module required, for Q Series modules
	Q33SB	3 slots, 1 slim type power supply module required, for Q Series modules
	Q35SB	5 slots, 1 slim type power supply module required, for Q Series modules
Redundant power main base	Q38RB	8 slots, 2 redundant power supply modules required, for Q Series modules
Extension base	Q63B	3 slots, 1 power supply module required, for Q Series modules
	Q65B	5 slots, 1 power supply module required, for Q Series modules
	Q68B	8 slots, 1 power supply module required, for Q Series modules
	Q612B	12 slots, 1 power supply module required, for Q Series modules
	Q52B	2 slots, power supply module not required, for Q Series modules
	Q55B	5 slots, power supply module not required, for Q Series modules
Redundant power extension base	Q68RB	8 slots, 2 redundant power supply modules required, for Q Series modules
Redundant type extension base	Q65WRB*1	5 slots, 2 redundant power supply modules required, for Q Series modules
Extension cable	QC05B	0.45 m cable for connecting extension base unit
	QC06B	0.6 m cable for connecting extension base unit
	QC12B	1.2 m cable for connecting extension base unit
	QC30B	3 m cable for connecting extension base unit
	QC50B	5 m cable for connecting extension base unit
	QC100B	10 m cable for connecting extension base unit
DIN rail mounting adapter	Q6DIN1	DIN rail mounting adapter for Q38B, Q312B, Q68B, Q612B, Q38RB, Q68RB, Q65WRB, Q38DB, and Q312DB
	Q6DIN2	DIN rail mounting adapter for Q35B, Q65B, Q00JCPU, and Q00UJCPU
	Q6DIN3	DIN rail mounting adapter for Q32SB, Q33SB, Q35SB, Q33B, Q52B, Q55B, and Q63B
	Q6DIN1A	DIN rail mounting adapter (with vibration-proofing bracket set) for Q3 B, Q5 B, Q6 B, Q38RB, Q68RB, and Q65WRB
Blank cover	QG60	Blank cover for I/O slot

*1: Only compatible with redundant CPU system.

Power supply module

Power supply	Q61P	Input voltage: 100…240 V AC, output voltage: 5 V DC, output current: 6 A
	Q62P	Input voltage: 100…240 V AC, output voltage: 5/24 V DC, output current: 3/0.6 A
	Q63P	Input voltage: 24 V DC, output voltage: 5 V DC, output current: 6 A
	Q64PN	Input voltage: 100…240 V AC, output voltage: 5 V DC, output current: 8.5 A
Power supply with life detection	Q61P-D	Input voltage: 100…240 V AC, output voltage: 5 V DC, output current: 6 A
Slim type power supply	Q61SP	Input voltage: 100…240 V AC, output voltage: 5 V DC, output current: 2 A
Redundant power supply	Q63RP	Input voltage: 24 V DC, output voltage: 5 V DC, output current: 8.5 A
	Q64RPN	Input voltage: 100…240 V AC, output voltage: 5 V DC, output current: 8.5 A

I/O module

Type		Model	Outline
Input	AC	QX10	16 points, 100…120 V AC, response time: 20 ms, 16 points/common, 18-point terminal block
		QX10-TS	16 points, 100…120 V AC, response time: 20 ms, 16 points/common, 18-point spring clamp terminal block
		QX28	8 points, 100…240 V AC, response time: 20 ms, 8 points/common, 18-point terminal block
	DC (Positive common)*1	QX40	16 points, 24 V DC, response time: 1/5/10/20/70 ms, 16 points/common, positive common, 18-point terminal block
		QX40-TS	16 points, 24 V DC, response time: 1/5/10/20/70 ms, 16 points/common, positive common, 18-point spring clamp terminal block
		QX40-S1	16 points, 24 V DC, response time: 0.1/0.2/0.4/0.6/1 ms, 16 points/common, positive common, 18-point terminal block
		QX40H	16 points, 24 V DC, response time: 0/0.1/0.2/0.4/0.6/1 ms, 8 points/common, positive common, 18-point terminal block
		QX41*2 *3	32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive common, 40-pin connector
		QX41-S1*2	32 points, 24 V DC, response time: 0.1/0.2/0.4/0.6/1 ms, 32 points/common, positive common, 40-pin connector
		QX41-S2*2 *3	32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive common, 40-pin connector
		QX42*2	64 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive common, 40-pin connector
		QX42-S1*2	64 points, 24 V DC, response time: 0.1/0.2/0.4/0.6/1 ms, 32 points/common, positive common, 40-pin connector
	AC/DC	QX50	16 points, 48 V AC/DC, response time: 20 ms, 16 points/common, positive/negative common, 18-point terminal block
	DC sensor	QX70	16 points, 5/12 V DC, response time: 1/5/10/20/70 ms, 16 points/common, positive/negative common, 18-point terminal block
		QX70H	16 points, 5 V DC, response time: 0/0.1/0.2/0.4/0.6/1 ms, 8 points/common, positive common, 18-point terminal block
		QX71*2	32 points, 5/12 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive/negative common, 40-pin connector
		QX72*2	64 points, 5/12 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive/negative common, 40-pin connector
	DC (Negative common) *1	QX80	16 points, 24 V DC, response time: 1/5/10/20/70 ms, 16 points/common, negative common, 18-point terminal block
		QX80-TS	16 points, 24 V DC, response time: 1/5/10/20/70 ms, 16 points/common, negative common, 18-point spring clamp terminal block
		QX80H	16 points, 24 V DC, response time: 0/0.1/0.2/0.4/0.6/1 ms, 8 points/common, negative common, 18-point terminal block
		QX81*3 *4	32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, negative common, 37-pin D-sub connector
		QX81-S2*3 *4	32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, negative common, 37-pin D-sub connector
		QX82 *2	64 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, negative common, 40-pin connector
		QX82-S1*2	64 points, 24 V DC, response time: 0.1/0.2/0.4/0.6/1 ms, 32 points/common, negative common, 40-pin connector
		QX90H	16 points, 5 V DC, response time: 0/0.1/0.2/0.4/0.6/1 ms, 8 points/common, negative common, 18-point terminal block
Output	Relay	QY10	16 points, 24 V DC/240 V AC, 2 A/point, 8 A/common, response time: 12 ms, 16 points/common, 18-point terminal block
		QY10-TS	16 points, 24 V DC/240 V AC, 2 A/point, 8 A/common, response time: 12 ms, 16 points/common, 18-point spring clamp terminal block
		QY18A	8 points, 24 V DC/240 V AC, 2 A/point, response time: 12 ms, 18-point terminal block, all points independent
	Triac	QY22	16 points, 100…240 V AC, 0.6 A/point, 4.8 A/common, response time: 1 ms + 0.5 cycle, 16 points/common, 18-point terminal block, with surge suppression
	Transistor (Sink)	QY40P	16 points, 12…24 V DC, 0.1 A/point, 1.6 A/common, response time: 1 ms, 16 points/common, sink type, 18-point terminal block, overload protection function, overheat protection function, surge suppression
		QY40P-TS	16 points, 12…24 V DC, 0.1 A/point, 1.6 A/common, response time: 1 ms, 16 points/common, sink type, 18-point spring clamp terminal block, overload protection function, overheat protection function, surge suppression
		QY41H	32 points, 5…24 V DC, 0.2 A/point, 2 A/common, response time: 2 us, 32 points/common, sink type, 40-pin connector, with surge suppression
		QY41P*2	32 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, sink type, 40-pin connector, overload protection function, overheat protection function, surge suppression
		QY42P*2	64 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, sink type, 40-pin connector, overload protection function, overheat protection function, surge suppression
		QY50	16 points, 12…24 V DC, 0.5 A/point, 4 A/common, response time: 1 ms, 16 points/common, sink type, 18-point terminal block, with surge suppression and fuse
	Transistor (Independent)	QY68A	8 points, 5…24 V DC, 2 A/point, 8 A/module, response time: 10 ms, sink/source type, 18-point terminal block, with surge suppression, all points independent
	TTL CMOS	QY70	16 points, 5…12 V DC, 16 mA/point, 256 mA/common, response time: 0.5 ms, 16 points/common, sink type, 18-point terminal block, with fuse
		QY71*2	32 points, 5…12 V DC, 16 mA/point, 512 mA/common, response time: 0.5 ms, 32 points/common, sink type, 40-pin connector, with fuse
	Transistor (Source)	QY80	16 points, 12…24 V DC, 0.5 A/point, 4 A/common, response time: 1 ms, 16 points/common, source type, 18-point terminal block, with surge suppression and fuse
		QY80-TS	16 points, 12…24 V DC, 0.5 A/point, 4 A/common, response time: 1 ms, 16 points/common, source type, 18-point spring clamp terminal block, with surge suppression and fuse
		QY81P*4	32 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, source type, 37-pin D-sub connector, overload protection function, overheat protection function, surge suppression
		QY82P*2	64 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, source type, 40-pin connector, overload protection function, overheat protection function, surge suppression
I/O	DC input/ transistor output	QH42P*2 *5	Input: 32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive common, output: 32 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, sink type, 40-pin connector, overload protection function, overheat protection function, surge suppression
		QX48Y57	Input: 8 points, 24 V DC, response time: 1/5/10/20/70 ms, 8 points/common, positive common, output: 7 points, 12…24 V DC, 0.5 A/point, 2 A/common, response time: 1 ms, 7 points/common, sink type, 18-point terminal block, with surge suppression and fuse
		QX41Y41P*2 *5	Input: 32 points, 24 V DC, response time: 1/5/10/20/70 ms, 32 points/common, positive common, output: 32 points, 12…24 V DC, 0.1 A/point, 2 A/common, response time: 1 ms, 32 points/common, sink type, 40-pin connector, overload protection function, overheat protection function, surge suppression
Interrupt module		QI60	16 points, 24 V DC, response time: 0.1/0.2/0.4/0.6/1 ms, 16 points/common, 18-point terminal block

*1: "Positive common" indicates that the positive lead of a DC power supply must be connected to the common terminal.
Accordingly, "Negative common" indicates that the negative lead must be connected to the common terminal.
*2: Connector is not provided. Separately order one of the following: A6CON1/A6CON2/A6CON3/A6CON4.
*3: The rated input currents are different. [QX41: approx. 4 mA, QX41-S2: approx. 6 mA, QX81: approx. 4 mA, QX81-S2: approx. 6 mA]
*4: Connector is not provided. Separately order one of the following: A6CON1E/A6CON2E/A6CON3E.
*5: The number of occupied input/output points is different. [QH42P: 32 points; QX41Y41P: 64 points (first 32 points: input/second 32 points: output)]

I/O module

Type		Model	Outline
Connector		A6CON1	32-point connector soldering type (40-pin connector)
		A6CON2	32-point connector crimp-contact type (40-pin connector)
		A6CON3	32-point connector pressure-displacement (flat cable) type (40-pin connector)
		A6CON4	32-point connector soldering type (40-pin connector, cable connectable in bidirection)
		A6CON1E	32-point connector soldering type (37-pin D-sub connector)
		A6CON2E	32-point connector crimp-contact type (37-pin D-sub connector)
		A6CON3E	32-point connector pressure-displacement (flat cable) type (37-pin D-sub connector)
Spring clamp terminal block		Q6TE-18SN	For 16-point I/O modules, 0.3…1.5 mm² (22…16 AWG)
Terminal block adapter		Q6TA32	For 32-point I/O modules, 0.5 mm² (20 AWG)
		Q6TA32-TOL	Q6TA32 dedicated tool
Connector/terminal block conversion module		A6TBXY36	For positive common input modules and sink output modules (standard type)
		A6TBXY54	For positive common input modules and sink output modules (2-wire type)
		A6TBX70	For positive common input modules (3-wire type)
		A6TBX36-E	For negative common input modules (standard type)
		A6TBX54-E	For negative common input modules (2-wire type)
		A6TBX70-E	For negative common input modules (3-wire type)
		A6TBY36-E	For source output modules (standard type)
		A6TBY54-E	For source output modules (2-wire type)
	Cable	AC05TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 0.5 m
		AC10TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 1 m
		AC20TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 2 m
		AC30TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 3 m
		AC50TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 5 m
		AC80TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 8 m *Common current 0.5 A or lower
		AC100TB	For A6TBXY36, A6TBXY54, and A6TBX70 (positive common/sink type), 10 m *Common current 0.5 A or lower
		AC05TB-E	For A6TBX36-E, A6TBY36-E, A6TBX54-E, A6TBY54-E, and A6TBX70-E (negative common/source type), 0.5 m
		AC10TB-E	For A6TBX36-E, A6TBY36-E, A6TBX54-E, A6TBY54-E, and A6TBX70-E (negative common/source type), 1 m
		AC20TB-E	For A6TBX36-E, A6TBY36-E, A6TBX54-E, A6TBY54-E, and A6TBX70-E (negative common/source type), 2 m
		AC30TB-E	For A6TBX36-E, A6TBY36-E, A6TBX54-E, A6TBY54-E, and A6TBX70-E (negative common/source type), 3 m
		AC50TB-E	For A6TBX36-E, A6TBY36-E, A6TBX54-E, A6TBY54-E, and A6TBX70-E (negative common/source type), 5 m
Relay terminal module		A6TE2-16SRN	For 40-pin connector 24 V DC transistor output modules (sink type)
	Cable	AC06TE	For A6TE2-16SRN, 0.6 m
		AC10TE	For A6TE2-16SRN, 1 m
		AC30TE	For A6TE2-16SRN, 3 m
		AC50TE	For A6TE2-16SRN, 5 m
		AC100TE	For A6TE2-16SRN, 10 m

Analog I/O module

Analog input	Voltage input	Q68ADV	8 channels, input: -10…10 V DC, output (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, 0…16000, -16000…16000, conversion speed: 80 µs/channel, 18-point terminal block
	Current input	Q62AD-DGH	2 channels; input, 4…20 mA DC, output (resolution): 0…32000, 0…64000, conversion speed: 10 ms/2 channels, 18-point terminal block, channel isolated, supplies power to 2-wire transmitter
		Q66AD-DG*1	6 channels, input: 4…20 mA DC (when 2-wire transmitter is connected), 0…20 mA DC, output (resolution): 0…4000, 0…12000, conversion speed: 10 ms/channel, 40-pin connector, channel isolated, supplies power to 2-wire transmitter
		Q68ADI	8 channels, input: 0…20 mA DC, output (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, 0…16000, -16000…16000 conversion speed: 80 µs/channel, 18-point terminal block
	Voltage/current input	Q64AD	4 channels; input -10…10 V DC, 0…20 mA DC, output (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, 0…16000, -16000…16000, conversion speed: 80 µs/channel, 18-point terminal block
		Q64ADH	4 channels; input -10…10 V DC, 0…20 mA DC, output (resolution): 0…20000, -20000…20000, -5000…22500,conversion speed: 20 µs/channel, 18-point terminal block
		Q64AD-GH	4 channels, input: -10…10 V DC, 0…20 mA DC, output (resolution): 0…32000, -32000…32000, 0…64000, -64000…64000, conversion speed: 10 ms/4 channels, 18-point terminal block, channel isolated
		Q68AD-G*1	8 channels, input: -10…10 V DC, 0…20 mA DC, output (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, 0…16000, -16000…16000, conversion speed: 10 ms/channel, 40-pin connector, channel isolated

*1: A connector is not provided. The A6CON4 connector must be ordered separately.

Analog I/O module

Type		Model	Outline
Analog output	Voltage output	Q68DAVN	8 channels, input (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, -16000…16000, output: -10…10 V DC, conversion speed: 80 µs/channel, 18-point terminal block
	Current output	Q68DAIN	8 channels, input (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000; output: 0…20 mA DC, conversion speed: 80 µs/channel, 18-point terminal block
	Voltage/current output	Q64DAH	4 channels, input (resolution): 0…20000, -20000…20000 output: -10…10 V DC, 0…20 mA DC, conversion speed: 20 µs/channel, 18-point terminal block
		Q62DAN	2 channels, input (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, -16000…16000, output: -10…10 V DC, 0…20 mA DC, conversion speed: 80 µs/channel, 18-point terminal block
		Q62DA-FG	2 channels, input (resolution): 0…12000, -12000…12000, -16000…16000, output: -12…12 V DC, 0…22 mA DC, conversion speed: 10 ms/2 channels, 18-point terminal block, channel isolated
		Q64DAN	4 channels, input (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, -16000…16000, output: -10…10 V DC, 0…20 mA DC, conversion speed: 80 µs/channel, 18-point terminal block
		Q66DA-G*1	6 channels, input (resolution): 0…4000, -4000…4000, 0…12000, -12000…12000, -16000…16000, output: -12…12 V DC, 0…22 mA DC, conversion speed: 6 ms/channel, 40-pin connector, channel isolated
Analog input/ output	Voltage and current input/ output	Q64AD2DA	Input: 4 channels, input: -10…10 V DC, 0…20 mA DC » output (resolution): 0…4000, -4000…4000, 0…12000, 0…16000, -16000…16000 » conversion speed: 500 µs/channel output: 2 channels input (resolution): 0…4000, -4000…4000, 0…12000, -16000…16000 » output: -10…10 V DC, 0…20 mA DC » conversion speed: 500 µs/channel 18-point terminal block
Load cell input		Q61LD	1 channel, input (load cell output): 0.0…3.3 mV/V, output (resolution): 0…10000, conversion speed: 10 ms, 18-point terminal block
CT input module		Q68CT	8 channels, input: CT 0…5 A AC, 0…50 A AC, 0…100 A AC, 0…200 A AC, 0…400 A AC, 0…600 A AC, output: 0…10000, 18-point terminal block
Temperature input	Thermocouple	Q64TD	4 channels, thermocouple (B, R, S, K, E, J, T, N), disconnection detection function, conversion speed: 40 ms/channel, channel isolated, 18-point terminal block
		Q64TDV-GH	4 channels, thermocouple (B, R, S, K, E, J, T, N), disconnection detection function, conversion speed: sampling cycle × 3, sampling cycle: 20 ms/channel, channel isolated, 18-point terminal block
		Q68TD-G-H01*1*2	8 channels, thermocouple (B, R, S, K, E, J, T, N), disconnection detection function, conversion speed: 320 ms/8 channels, channel isolated, 40-pin connector
		Q68TD-G-H02*1	8 channels, thermocouple (B, R, S, K, E, J, T, N), disconnection detection function, conversion speed: 640 ms/8 channels, channel isolated, 40-pin connector
	RTD	Q64RD	4 channels, platinum RTD (Pt100, JPt100), disconnection detection function, conversion speed: 40 ms/channel, 18-point terminal block
		Q64RD-G	4 channels, platinum RTD (Pt100, JPt100), nickel RTD (Ni100), disconnection detection function, conversion speed: 40 ms/channel, channel isolated, 18-point terminal block
		Q68RD3-G*1	8 channels, platinum RTD (Pt100, JPt100), nickel RTD (Ni100), disconnection detection function, conversion speed: 320 ms/8 channels, channel isolated, 40-pin connector
Temperature control	Thermocouple	Q64TCTTN	4 channels, thermocouple (K, J, T, B, S, E, R, N, U, L, PL@, W5Re/W26Re), heating control/cooling control/heating-cooling control, sampling cycle: 500 ms/4 channels, channel isolated, 18-point terminal block
		Q64TCTTBWN	4 channels, thermocouple (K, J, T, B, S, E, R, N, U, L, PL@, W5Re/W26Re), heating control/cooling control/heating-cooling control, heater disconnection detection function, sampling cycle: 500 ms/4 channels, channel isolated, two 18-point terminal blocks
	RTD	Q64TCRTN	4 channels, platinum RTD (Pt100, JPt100), heating control/cooling control/heating-cooling control, sampling cycle: 500 ms/4 channels, channel isolated, 18-point terminal block
		Q64TCRTBWN	4 channels, platinum RTD (Pt100, JPt100), heating control/cooling control/heating-cooling control, heater disconnection detection function, sampling cycle: 500 ms/4 channels, channel isolated, two 18-point terminal blocks
Loop control		Q62HLC	2 channels, input: thermocouple/micro voltage/voltage/current, conversion speed (input): 25 ms/2 channels, sampling cycle: 25 ms/2 channels, output: 4…20 mA DC, conversion speed (output): 25 ms/2 channels, 18-point terminal block, with 5 PID control modes

*1: A connector is not provided. The A6CON4 connector must be ordered separately.
*2: Depending on the combination of power source module and base unit, the installable slot position may be limited.

Positioning and pulse I/O module

Type		Model	Outline
Simple motion	With SSCNET #/H connectivity	QD77MS2*1	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET #/H connectivity
		QD77MS4*1	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET #/H connectivity
		QD77MS16*1	16-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET #/H connectivity
	With CC-Link IE Field Network connectivity	QD77GF16*2	16-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 26-pin connector, with CC-Link IE Field Network connectivity
Positioning	Open collector output	QD75P1N*1	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD75P1*1	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD75P2N*1	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD75P2*1	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD75P4N*1	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD75P4*1	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 200 kpps, 40-pin connector
		QD70P4*1	4-axes, control unit: pulse, no. of positioning data: 10/axis, max. output pulse: 200 kpps, 40-pin connector
		QD70P8*1	8-axes, control unit: pulse, no. of positioning data: 10/axis, max. output pulse: 200 kpps, 40-pin connector
	Differential output	QD75D1N*1	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 4 Mpps, 40-pin connector
		QD75D1*1	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 1 Mpps, 40-pin connector
		QD75D2N*1	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 4 Mpps, 40-pin connector
		QD75D2*1	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 1 Mpps, 40-pin connector
		QD75D4N*1	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 4 Mpps, 40-pin connector
		QD75D4*1	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, max. output pulse: 1 Mpps, 40-pin connector
		QD70D4*1	4-axes, control unit: pulse, no. of positioning data: 10/axis, max. output pulse: 4 Mpps, 40-pin connector
		QD70D8*1	8-axes, control unit: pulse, no. of positioning data: 10/axis, max. output pulse: 4 Mpps, 40-pin connector
	With SSCNET connectivity	QD75M1*3	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET connectivity
		QD75M2*3	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET connectivity
		QD75M4*3	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET connectivity
	With SSCNET # connectivity	QD75MH1*3	1-axis, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET # connectivity
		QD75MH2*3	2-axes, 2-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET # connectivity
		QD75MH4*3	4-axes, 2-/3-/4-axis linear interpolation, 2-axis circular interpolation, control unit: mm, inch, degree, pulse, no. of positioning data: 600/axis, 40-pin connector, with SSCNET # connectivity
		QD74MH8	8-axes, control unit: pulse, no. of positioning data: 32/axis, with SSCNET # connectivity
		QD74MH16	16-axes, control unit: pulse, no. of positioning data: 32/axis, with SSCNET # connectivity
	Open collector output with built-in counter function	QD72P3C3*1	Positioning: 3-axes, control unit: pulse, no. of positioning data: 1/axis, max. output pulse: 100 kpps, counter: 3 channels, 100 kpps, count input signal: 5/24 V DC, 40-pin connector
High-speed counter		QD62*3	2 channels, 200/100/10 kpps, count input signal: 5/12/24 V DC, external input: 5/12/24 V DC, coincidence output: transistor (sink), 12/24 V DC, 0.5 A/point, 2 A/common, 40-pin connector
		QD62E*3	2 channels, 200/100/10 kpps, count input signal: 5/12/24 V DC, external input: 5/12/24 V DC, coincidence output: transistor (source), 12/24 V DC, 0.1 A/point, 0.4 A/common, 40-pin connector
		QD62D*3	2 channels, 500/200/100/10 kpps, count input signal: EIA standards RS-422-A (differential line driver), external input: 5/12/24 V DC; coincidence output: transistor (sink), 12/24 V DC, 0.5 A/point, 2 A/common, 40-pin connector
		QD63P6*1	6 channels, 200/100/10 kpps, count input signal: 5 V DC, 40-pin connector
		QD64D2*1	2 channels, 4 Mpps, count input signal: EIA standards RS-422-A (differential line driver), external input: 24 V DC, coincidence output: transistor (sink), 12/24 V DC, 0.5 A/point, 2 A/common, 40-pin connector
		QD65PD2*1	2 Channels Differential input: 40 kpps/400 kpps/800 kpps/2 Mpps/4 Mpps/8 Mpps » Count input signal level: EIA Standards RS-422-A, differential line driver level DC Input: 10 kpps/100 kpps/200 kpps » Count input signal level: 5/12/24 V DC, 7…10 mA external outputs: Transistor (sink type) output, 12/24 V DC 0.1 A/point, 0.8 A/common, 40-pin connector
Channel isolated pulse input		QD60P8-G	8 channels, 30 kpps/10 kpps/1 kpps/100 pps/50 pps/10 pps/1 pps/0.1 pps, count input signal: 5/12…24 V DC

*1: A connector is not provided. The A6CON1/A6CON2/A6CON4 connector must be ordered separately.
*2: A connector is not provided. The LD77MHIOCON connector must be ordered separately.
*3: A connector is not provided. The A6CON1/A6CON2/A6CON3/A6CON4 connector must be ordered separately.

Energy measuring module

Type		Model	Outline
Energy measuring		QE81WH*1	Three-phase 3-wire type, Number of measurement circuits: 1 circuit, Measured items: power rate (consumption, regenerative), current, voltage, power, power factor, etc.
		QE84WH*1*2	Three-phase 3-wire type, Number of measurement circuits: 4 circuits, Measured items: power rate (consumption, regenerative), current, voltage, power, power factor, etc.
		QE81WH4W*1*3	Three-phase 4-wire type, Number of measurement circuits: 1 circuit, Measured items: power rate (consumption, regenerative), current, voltage, power, power factor, etc.
		QE83WH4W*1*2*3	Three-phase 4-wire type, Number of measurement circuits: 3 circuits, Measured items: power rate (consumption, regenerative), current, voltage, power, power factor, etc.
	Option	QE8WH4VT	QE81WH4W, QE83WH4W dedicated voltage transformer (63.5/110 V AC…227/480 V AC)
Isolation monitoring		QE82LG*4	Measured items: leakage current (Io), resistive component leakage current (Ior), number of measured circuits: 2 circuits

*1: Dedicated current sensors are required for operation.
*2: Current measurement mode is provided. Up to eight circuits can be measured when measuring only the current value.
*3: The separate voltage transformer (QE8WH4VT) is required for the three-phase 4-wire compatible products.
*4: Dedicated residual current transformers are required for operation.

Information module

MES interface		QJ71MES96	MES interface module (MX MESInterface and CompactFlash card are required)
	Option	GT05-MEM-128MC	CompactFlash card, capacity: 128 MB
		GT05-MEM-256MC	CompactFlash card, capacity: 256 MB
		QD81MEM-512MBC	CompactFlash card, capacity: 512 MB
		QD81MEM-1GBC	CompactFlash card, capacity: 1 GB
High-speed data logger		QD81DL96	High-speed data logger module 10BASE-T/100BASE-TX (CompactFlash card is required)
	Option	QD81MEM-512MBC	CompactFlash card, capacity: 512 MB
		QD81MEM-1GBC	CompactFlash card, capacity: 1 GB
		QD81MEM-2GBC	CompactFlash card, capacity: 2 GB
		QD81MEM-4GBC	CompactFlash card, capacity: 4 GB
		QD81MEM-8GBC	CompactFlash card, capacity: 8 GB
High-speed data communication		QJ71DC96	High-speed data communication module 10BASE-T/100BASE-TX (CompactFlash card is required)
	Option	QD81MEM-512MBC	CompactFlash card, capacity: 512 MB
		QD81MEM-1GBC	CompactFlash card, capacity: 1 GB
		QD81MEM-2GBC	CompactFlash card, capacity: 2 GB
		QD81MEM-4GBC	CompactFlash card, capacity: 4 GB
		QD81MEM-8GBC	CompactFlash card, capacity: 8 GB
Ethernet		QJ71E71-100	10BASE-T/100BASE-TX BACnet™ client function, MODBUS® TCP master function (using predefined protocol support function)
		QJ71E71-B2	10BASE2
		QJ71E71-B5	10BASE5
Serial communication		QJ71C24N	RS-232: 1 channel, RS-422/485: 1 channel, total transmission speed of 2 channels: 230.4 kbps MODBUS® RTU master function (using predefined protocol support function)
		QJ71C24N-R2	RS-232: 2 channels, total transmission speed of 2 channels: 230.4 kbps MODBUS® RTU master function (using predefined protocol support function)
		QJ71C24N-R4	RS-422/485: 2 channels, total transmission speed of 2 channels: 230.4 kbps MODBUS® RTU master function (using predefined protocol support function)
Intelligent communication		QD51	BASIC program execution module, RS-232: 2 channels
		QD51-R24	BASIC program execution module, RS-232: 1 channel, RS-422/485: 1 channel
		SW1IVD-AD51HP*5	Software package for QD51, AD51H-S3, and A1SD51S

*5: The program is run in Windows® command prompt.

Control network module

Type		Model	Outline
CC-Link IE Control Network		QJ71GP21-SX	Multi-mode fiber optic cable, dual loop, control network (control/normal station)
		QJ71GP21S-SX	Multi-mode fiber optic cable, dual loop, control network (control/normal station), with external power supply function
MELSECNET/H	Optical loop (SI)	QJ71LP21-25	SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, control network (control/normal station) or remote I/O network (remote mater station)
		QJ71LP21S-25	SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, control network (control/normal station) or remote I/O network (remote mater station), with external power supply function
		QJ72LP25-25	SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, remote I/O network (remote I/O station)
	Optical loop (GI)	QJ71LP21G	GI-50/125 fiber optic cable, dual loop, control network (control/normal station) or remote I/O network (remote master station)
		QJ72LP25G	GI-50/125 fiber optic cable, dual loop, remote I/O network (remote I/O station)
	Coaxial bus	QJ71BR11	3C-2V/5C-2V coaxial cable, single bus, control network (control/normal station) or remote I/O network (remote master station)
		QJ72BR15	3C-2V/5C-2V coaxial cable, single bus, remote I/O network (remote I/O station)
	Twist bus	QJ71NT11B	Twisted pair cable, single bus, control network (control/normal station)
CC-Link IE Field Network		QJ71GF11-T2	Master/local station, CC-Link IE Field Network compatible
CC-Link		QJ61BT11N	Master/local station, CC-Link Ver. 2 compatible
CC-Link/LT		QJ61CL12	Master station
FL-net (OPCN-2)	Ver. 2.00	QJ71FL71-T-F01	10BASE-T, 100BASE-TX
		QJ71FL71-B2-F01	10BASE2
		QJ71FL71-B5-F01	10BASE5
	Ver. 1.00	QJ71FL71-T	10BASE-T
		QJ71FL71-B2	10BASE2
		QJ71FL71-B5	10BASE5
MODBUS®		QJ71MB91	MODBUS® RTU/ASCII, RS-232, RS-422/485 configurable as master or slave
		QJ71MT91	MODBUS®/TCP 10BASE-T/100BASE-TX configurable as master or slave
AS-i		QJ71AS92	Master station, AS-Interface Specification Version 2.11 compatible

Digital link sensor

AnyWireASLINK	QJ51AW12AL DB	AnyWireASLINK master module

Compatible module for each protocol

Compatible protocol	Compatible modules	Model	Outline
SLMP (MC protocol)	High-speed Universal model (Built-in Ethernet)	QnUDVCPU	SLMP server function (only MC protocol QnA compatible 3E frame) SLMP client function (using predefined protocol support function)
	Universal model QCPU (Built-in Ethernet)	QnUDE(H)CPU	
	Ethernet interface module	QJ71E71-100	SLMP server function (including MC protocol) SLMP client function (using predefined protocol support function)
BACnet™	High-speed Universal model (Built-in Ethernet)	QnUDVCPU	Compatible BACnet™ object: Analog Input (AI), Binary Input (BI), Binary Output (BO), Accumulator (AC) (using predefined protocol support function)
	Ethernet interface module	QJ71E71-100	
	BACnet™ interface module (3rd party products)	BAQ08V	Compatible BACnet™ object: Analog Input (AI), Analog Output (AO), Analog Value (AV), Binary Input (BI), Binary Output (BO), Binary Value (BV), Multi-state Input (MI), Multi-state Output (MO), Multi-state Value (MV), Accumulator (AC), Calendar (CA), EventEnrollment (EE), Group Object (GR), Notification Class (NC), Schedule (SC), TrendLog (TL), Device (DV), Measurement object (measure)*1, Power demand monitoring (monitor power)*2, Power demand control (control power)*2, Generator load control (generator)*2
MODBUS®/TCP	High-speed Universal model (Built-in Ethernet)	QnUDVCPU	MODBUS®/TCP communication master function (using predefined protocol support function)
	Ethernet interface module	QJ71E71-100	
	MODBUS®/TCP interface module	QJ71MT91	MODBUS®/TCP communication master function/slave function
MODBUS®	Serial communication module	QJ71C24N (-R2/R4)	MODBUS®RTU communication master function (using predefined protocol support function)
	MODBUS® interface module	QJ71MB91	MODBUS® RTU/ASCII communication master function/slave function

*1: ANSI/ASHRAE 2004 and IEIEJ 2006 standards are not supported.
*2: ANSI/ASHRAE 2004 standard is not supported.

Replacement support MELSEC-A/AnS/QnA/QnAS transition products

Type		Model	Outline
Q Large base	Main base	Q35BL*1	5 slots. Power supply module installation required. For Q Series large input/output module installation
		Q38BL*1	8 slots. Power supply module installation required. For Q Series large input/output module installation
	Extension base	Q65BL*1	5 slots. Power supply module installation required. For Q Series large input/output module installation
		Q68BL*1	8 slots. Power supply module installation required. For Q Series large input/output module installation
		Q55BL*1	5 slots. Power supply module installation not required. For Q Series large input/output module installation
	Large blank cover	QG69L*1	For gap adjustment when a previous Q Series module is installed on the Q large base
AnS-sized version Q Large base	Main base	Q35BLS	5 slots. Q Series module installation Attaches to board surface
		Q38BLS	8 slots. Q Series module installation Attaches to board surface
		Q35BLS-D	5 slots. Q Series module installation Attaches to DIN rail
		Q38BLS-D	8 slots. Q Series module installation Attaches to DIN rail
	Extension base	Q65BLS	5 slots. Q Series module installation Attaches to board surface
		Q68BLS	8 slots. Q Series module installation Attaches to board surface
		Q65BLS-D	5 slots. Q Series module installation Attaches to DIN rail
		Q68BLS-D	8 slots. Q Series module installation Attaches to DIN rail
		Q55BLS	5 slots. Q Series module installation Attaches to board surface, power supply module not required
		Q55BLS-D	5 slots. Q Series module installation Attaches to DIN rail, power supply module not required
	Large blank cover	QG69LS	Use to adjust the gap when an existing Q Series unit is installed on the large base unit of the AnS-sized Q.
Q Large I/O	Input	QX11L*1	For replacement of A-Series large type module "AX11". 32 points, 100…120 V AC, response time: 25 ms, 32 points/common, 38-point terminal block
		QX21L*1	For replacement of A-Series large type module "AX21". 32 points, 200…240 V AC, response time: 25 ms, 32 points/common, 38-point terminal block
	Output	QY11AL*1	For replacement of A-Series large type module "AY10A, AY11A". 16 points, contact, 24 V DC/240 V AC, 2 A/point; 16 A/all points, all-point independent contacts, response time: 12 ms, 38-point terminal block
		QY13L*1	For replacement of A-Series large type module "AY13". 32 points, contact, 24 V DC/240 V AC, 2 A/point; 5 A/common, 8 points/common, response time: 12 ms, 38-point terminal block
		QY23L*1	For replacement of A-Series large type module "AY23". 32 points, triac, 100…240 V AC; 0.6 A/point, 2.4 A/common, 8 points/common, response time: 1 ms + 0.5 cycle, 38-point terminal block
		QY51PL	For replacement of A-Series large type module "AY41, AY41P, AY51, AY51-S1". 32 points, transistor (sink), 12/24 V DC; 0.5 A/point; 4 A/common, 16 points/common, response time: 1 ms, 38-point terminal block
High-speed counter		QD62-H01*2	For replacement of A-Series large type module "AD61". 2 channels, 50 kpps, count input signal: 5/12/24 V DC, external input: 5/12/24 V DC, coincidence output: transistor (sync), 12/24 V DC, 0.5 A/point; 2 A/common
		QD62-H02*2	For replacement of A-Series large type module "AD61-S1". 2 channels, 10 kpps, count input signal: 5/12/24 V DC, external input: 5/12/24 V DC, coincidence output: transistor (sync), 12/24 V DC, 0.5 A/point; 2 A/common
Positioning		QD73A1	For replacement of “A1SD70”. 1 axis. Number of positioning data items: 1 data/axis, analog output
Extension base	AnS Series	QA1S51B*3	1 slot. Does not require installation of AnS Series power supply module. For AnS Series module installation
		QA1S65B*3	5 slots. Requires AnS Series power supply module installation. For AnS Series module installation
		QA1S68B*3	8 slots. Requires AnS Series power supply module installation. For AnS Series module installation
	A Series	QA65B*3	5 slots. Requires A Series power supply module installation. For A Series module installation
		QA68B*3	8 slots. Requires A Series power supply module installation. For A Series module installation
Q-AnS base unit conversion adapter		QA1S6ADP	Conversion adapter to connect an AnS/QnAS Series extension base unit to the Q Series system
		QA1S6ADP-S1	Conversion adapter to connect an AnS/QnAS Series extension base unit to the Q Series system (for up to 3 extension base units)
QA base unit conversion adapter		QA6ADP	Conversion adapter to connect an A/QnA Series extension base unit to the Q Series system
For MELSECNET (@) local station		A1SJ71AP23Q*4	Optic cable, duplex loop, MELSECNET (@) local station
		A1SJ71AR23Q*4	3C-2V/5C-2V coaxial cable, duplex loop, MELSECNET (@) local station
For MELSECNET/B local station		A1SJ71AT23BQ*4	Twisted pair cable, single bus, MELSECNET/B local station

*1: Only supported only by High Performance QCPU and Universal QCPU (Excluding Q00UJCPU).
*2: A connector is not provided. Please order one of the following separately: A6CON1/A6CON2/A6CON3/A6CON4
*3: Only supported only by High Performance model QCPU.
*4: Only supported by high performance model QCPU and Universal model QCPU (first five digits of serial No. 13102 or higher).

Network interface board

Type		Model	Outline
CC-Link IE Control Network		Q80BD-J71GP21-SX	PCI bus/PCI-X bus, Japanese/English OS compatible, multi-mode fiber optic cable, dual loop, control network (control/normal station)
		Q81BD-J71GP21-SX	PCI Express bus, Japanese/English OS compatible, multi-mode fiber optic cable, dual loop, control network (control/normal station)
		Q80BD-J71GP21S-SX	PCI bus/PCI-X bus, Japanese/English OS compatible, multi-mode fiber optic cable, dual loop, control network (control/normal station), with external power supply function
		Q81BD-J71GP21S-SX	PCI Express bus, Japanese/English OS compatible, multi-mode fiber optic cable, dual loop, control network (control/normal station), with external power supply function
CC-Link IE Field Network		Q81BD-J71GF11-T2*1	PCI Express compatible, Ethernet connections in line, star, or line and star mixed, configurable as master or local station.
MELSECNET/H(10)	Optical loop (SI)	Q81BD-J71LP21-25	PCI Express bus, Japanese/English OS compatible, SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, control network (control/normal station)
		Q80BD-J71LP21-25	PCI bus, Japanese/English OS compatible, SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, control network (control/normal station)
		Q80BD-J71LP21S-25	PCI bus, Japanese/English OS compatible, SI/QSI/H-PCF/broadband H-PCF fiber optic cable, dual loop, control network (control/normal station), with external power supply function
	Optical loop (GI)	Q80BD-J71LP21G	PCI bus, Japanese/English OS compatible, GI-50/125 fiber optic cable, dual loop, control network (control/normal station)
	Coaxial bus	Q80BD-J71BR11	PCI bus, Japanese/English OS compatible, 3C-2V/5C-2V coaxial cable, single bus, control network (control/normal station)
CC-Link		Q81BD-J61BT11	PCI Express bus, Japanese/English OS compatible, master/local interface board, CC-Link Ver. 2 compatible
		Q80BD-J61BT11N	PCI bus, Japanese/English OS compatible, master/local interface board, CC-Link Ver. 2 compatible

*1: Does not support being used as the master station in a ring network.

Ethernet related products

Wireless LAN Adapter	U.S.A.	NZ2WL-US*2*3 DB	Conforms to IEEE 802.11a, IEEE 802.11b, IEEE 802.11g standards

MELSOFT GX Configurator-SC*4	SW2D5C-QSCU-E	MELSEC-Q dedicated serial communication module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-CT*4	SW0D5C-QCTU-E	MELSEC-Q dedicated high-speed counter module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-TC*4	SW0D5C-QTCU-E	MELSEC-Q dedicated temperature control module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-TI*4	SW1D5C-QTIU-E	MELSEC-Q dedicated temperature input module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-FL*4	SW0D5C-QFLU-E	MELSEC-Q dedicated FL-net module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-PT*4	SW1D5C-QPTU-E	MELSEC-Q dedicated positioning module QD70 setting/monitoring tool	—		*2				
MELSOFT GX Configurator-MB*4	SW1D5C-QMBU-E	MODBUS master module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-AS*4	SW1D5C-QASU-E	AS-i master module setting/monitoring tool	—		*2				
MELSOFT GX Configurator-QP	SW2D5C-QD75P-E	Positioning module QD75P/D/M setting/monitoring tool	—		*2				
MELSOFT GX Explorer	SW2D5C-EXP-E	Maintenance tool	—	—	—			*3	—
MELSOFT GX RemoteService- !	SW2D5C-RAS-E	Remote access tool	—	—	—			*3	—
MELSOFT GX Works	SW4D5C-QSET-E	Set type products (7 in total): GX Developer, GX Simulator, GX Explorer, GX Configurator-AD, DA, SC, CT	*5						
	SW8D5C-GPPLLT-E	GX Developer, GX Simulator, GX Explorer	*5						

*1: The MELSOFT GX Works3 menu is switchable between Japanese, English, and simplified Chinese. (Traditional Chinese and Korean will be supported soon.)
*2: Not compatible with Q50UDEHCPU, Q100UDEHCPU, and QJ71GF11-T2.
*3: Not compatible with Q02PHCPU and Q06PHCPU.
*4: This operates as add-in software for GX Developer. GX Developer is required separately.
*5: To determine which CPUs are supported, refer to the individual products above.

Software MELSOFT PX Series

* Refer to the "Compatible CPUs" table for individual model names.

Type	Model	Outline	Compatible CPU*						
			Universal model			High Performance model	Basic model	Process CPU	Redundant CPU
			QnUDV	QnU	QnUD(E)				
MELSOFT PX Developer	SW1D5C-FBDQ-E	Process control FBD software package	—	—	—	—	—		
	SW1DNC-FBDQMON-E	Process control FBD software package monitoring tool	—	—	—	—	—		
MELSOFT PX Works	SW3D5C-FBDGPP-E	Set type products (6 in total): PX Developer, GX Developer, GX Configurator-AD, DA, CT, TI	*1						

*1: To determine which CPUs are supported, refer to the individual products.

Software MELSOFT MX Series

MELSOFT MX Component	SW4DNC-ACT-E	ActiveX® library for communication							
	SW1DNC-ACTAND-B	Library for communication (for Android application development) (Japanese/English version)							
	SW1MIC-ACTIOS-B	Library for communication (for iOS application development) (Japanese/English version)							
MELSOFT MX Sheet	SW2DNC-SHEET-E*2	Excel® communication support tool							
MELSOFT MX Works	SW2DNC-SHEETSET-E	A set of two products: MX Component, MX Sheet	*3						
MELSOFT MX MESInterface	SW1DNC-MESIF-E	MES interface module QJ71MES96 dedicated information linkage tool	*4						

*2: To use MX Sheet, MX Component is required.
*3: To determine which CPUs are supported, refer to the individual products.
*4: Required when using the MES interface module.

Software MELSOFT iQ Works

MELSOFT iQ Works	SW2DND-IQWK-E	FA engineering software*5 • System Management Software: MELSOFT Navigator • Controller Programming Software: MELSOFT GX Works3*6, GX Works2, GX Developer • Motion Programming Software: MELSOFT MT Works2 • HMI Programming Software: MELSOFT GT Works3 • Robot Programing Software: MELSOFT RT ToolBox2 mini • Inverter Setup Software: MELSOFT FR Configurator2 • MITSUBISHI ELECTRIC FA Library

*5: For detailed information about supported modules, refer to the manuals of the relevant software package.
*6: The MELSOFT GX Works3 menu is switchable between Japanese, English, and simplified Chinese. (Traditional Chinese and Korean will be supported soon.)

Compatible CPUs

Item		Model
Universal model QCPU	QnUDV	Q03UDV, Q04UDV, Q06UDV, Q13UDV, Q26UDV
	QnU	Q00UJ, Q00U, Q01U, Q02U
	QnUD(E)	Q03UD(E), Q04UD(E)H, Q06UD(E)H, Q10UD(E)H, Q13UD(E)H, Q20UD(E)H, Q26UD(E)H, Q50UDEH, Q100UDEH
High Performance model QCPU		Q02, Q02H, Q06H, Q12H, Q25H
Basic model QCPU		Q00J, Q00, Q01
Process CPU		Q02PH, Q06PH, Q12PH, Q25PH
Redundant CPU		Q12PRH, Q25PRH

Precautions before use

This publication explains the typical features and functions of the products herein and does not provide restrictions or other information related to usage and module combinations. Before using the products, always read the product user manuals. Mitsubishi Electric will not be held liable for damage caused by factors found not to be the cause of Mitsubishi Electric; opportunity loss or lost profits caused by faults in Mitsubishi Electric products; damage, secondary damage, or accident compensation, whether foreseeable or not, caused by special factors; damage to products other than Mitsubishi Electric products; or any other duties.

⚠ For safe use

- To use the products given in this publication properly, always read the relevant manuals before beginning operation.
- The products have been manufactured as general-purpose parts for general industries, and are not designed or manufactured to be incorporated in a device or system used in purposes related to human life.
- Before using the products for special purposes such as nuclear power, electric power, aerospace, medicine or passenger-carrying vehicles, consult with Mitsubishi Electric.
- The products have been manufactured under strict quality control. However, when installing the products where major accidents or losses could occur if the products fail, install appropriate backup or fail-safe functions in the system.

YOUR SOLUTION PARTNER

Mitsubishi Electric offers a wide range of automation equipment from PLCs and HMIs to CNC and EDM machines.

A NAME TO TRUST

Since its beginnings in 1870, some 45 companies use the Mitsubishi name, covering a spectrum of finance, commerce and industry.

The Mitsubishi brand name is recognized around the world as a symbol of premium quality.

Mitsubishi Electric Corporation is active in space development, transportation, semi-conductors, energy systems, communications and information processing, audio visual equipment and home electronics, building and energy management and automation systems, and has 237 factories and laboratories worldwide in over 121 countries.

This is why you can rely on Mitsubishi Electric automation solution - because we know first hand about the need for reliable, efficient, easy-to-use automation and control in our own factories.

As one of the world's leading companies with a global turnover of over 4 trillion Yen (over $40 billion), employing over 100,000 people, Mitsubishi Electric has the resource and the commitment to deliver the ultimate in service and support as well as the best products.

Low voltage: MCCB, MCB, ACB

Medium voltage: VCB, VCC

Power monitoring, energy management

Compact and Modular Controllers

Inverters, Servos and Motors

Visualization: HMIs, Software, MES connectivity

Numerical Control (NC)

Robots: SCARA, Articulated arm

Processing machines: EDM, Lasers, IDS

Air-conditioning, Photovoltaic, EDS
